### **Disperse Systems** Pharmaceutical Press

Makoto Takeo Disperse Systems Interesting applications for disperse systems exist in many areas of modern technology. Weight and cost savings achieved in engineered foams for complex designs and computer-modeled optical pigments for creating astounding effects in coatings are but two examples of such diverse applications. In addition to the cost and material reductions already achieved in existing applications, future applications of disperse systems are ripe with many heretofore-undeveloped products processing unprecedented properties. A thorough understanding of the relationship between microscopic composition and the measurable macroscopic behaviour of disperse systems is necessary for technologists to exploit the

unique properties of these systems. With such an understanding, the reader will be equipped to develop new products efficiently and to effectively achieve required material properties. Professor Makoto Takeo, the renowned expert from Portland State University, addresses this need for an understanding of disperse systems in a remarkable new text. The current knowledge base is presented and the underlying principles of these systems are revealed in a straightforward and easily accessible manner. It is an indispensable work for those who want to competently enter this fascinating field, and an absolute must for tomorrow's physicists and materials scientists.

FASTtrack *Pharmaceutics – Dosage Form and Design* focuses on what you really need to know in order to pass your pharmacy exams. It provides concise, bulleted information, key points, tips and an all-important self-assessment section, including MCQs.

Quality Control Methods for Medicinal Plant Materials Universitas Indonesia Publishing

Pharmaceutics is one of the most diverse subject areas in all of pharmaceutical science. In brief, it is concerned with the scientific and technological aspects of the design and manufacture of dosage forms or medicines. An understanding of pharmaceutics is therefore vital for all pharmacists and those pharmaceutical scientists who are involved with converting a drug or a potential drug into a medicine that can be delivered safely, effectively and conveniently to the patient. Now in its fourth edition, this best-selling textbook in pharmaceutics has been brought completely up to date to reflect the rapid advances in delivery methodologies by eye and injection, advances in drug formulations and delivery methods for special groups (such as children and the elderly), nanomedicine, and pharmacognosy. At the same time the editors have striven to maintain the accessibility of the text for students of pharmacy, preserving the balance between being a suitably pitched introductory text and a clear reflection of the state of the art. provides a logical, comprehensive account of drug design and manufacture includes the science of formulation and drug delivery designed and written for newcomers to the design of dosage forms New to this edition New editor: Kevin Taylor, Professor of Clinical Pharmaceutics, School of Pharmacy, University of London. Twenty-two new contributors. Six new chapters covering parenteral and ocular

delivery; design and administration of medicines for the children and elderly; the latest in plant medicines; nanotechnology and nanomedicines, and the delivery of biopharmaceuticals.

Thoroughly revised and updated throughout.

*Pharmaceutics* CRC Press

Pharmaceutics is the science of designing drug dosages. It has three subfields namely formulation science, biopharmaceutics and pharmacokinetics. After the formulation and production of an important drug, it is very essential to find the proportion in which a drug is required. This discipline tries to study the interaction of various quantities of dosages of the formulated drug with the human body, its effects and optimum concentration. This book is a valuable compilation of topics, ranging from the basic to the most complex advancements in this field. For someone with an interest and eye for detail, this book covers the most significant topics in the field of pharmaceutics. It will serve as a valuable source of reference for pharmacologists, researchers and students.

An Illustrated Colour Text Springer Science & Business Media

This book provides the dermatologist with the essential information needed to properly treat all skin types cosmetically. All chapters have been written by female dermatologists with many years of personal experience in the field. The volume includes an overview of the systemic, intrinsic and extrinsic aging process, essential information on anti-aging skin care product ingredients, detailed discussions of patient selection and indications, and a wide range of cosmetic procedures. This concise book allows you - through its well-organized use of sidebars, photographs and illustrations - to extract any

information you may need quickly and easily.

*Poucher's Perfumes, Cosmetics and Soaps* Samudra Biru

An internationally acclaimed reference work recognized as one of the most authoritative and comprehensive sources of information on excipients used in pharmaceutical formulation with this new edition providing 340 excipient monographs. Incorporates information on the uses, and chemical and physical properties of excipients systematically collated from a variety of international sources including: pharmacopeias, patents, primary and secondary literature, websites, and manufacturers' data; extensive data provided on the applications, licensing, and safety of excipients; comprehensively cross-referenced and indexed, with many additional excipients described as related substances and an international supplier's directory and detailed information on trade names and specific grades or types of excipients commercially available.

Food Antioxidants Morgan & Claypool Publishers

A collection of test procedures for assessing the identity, purity, and content of medicinal plant materials, including determination of pesticide residues, arsenic and heavy metals. Intended to assist national laboratories engaged in drug quality control, the manual responds to the growing use of medicinal plants, the special quality problems they pose, and the corresponding need for international guidance on reliable methods for quality control. Recommended procedures - whether involving visual inspection or the use of thin-layer chromatography for the qualitative determination of impurities - should also prove useful to the pharmaceutical industry and pharmacists working with these materials.

**Handbook of Cosmetic Science and Technology, Third Edition** CRC Press

Edited by a team of experienced and internationally renowned contributors, the updated Third Edition is the standard reference for cosmetic chemists and dermatologists seeking the latest innovations and technology for the formulation, design, testing, use, and production of cosmetic products for skin, hair, and nails. New features in the Third Edition: 39 new chapters reorganized by skin functions descriptions of ingredients, products, efficacy measurement, and mechanisms in each chapter revised chapters on skin types, skin perception, and targeted products new chapters on skin aging and cosmetics for the elderly strong emphasis on testing and current methods used for testing, and the evolution of instruments for skin and hair testing new ingredients, delivery systems, and testing methodologies information on skin physiology and cosmetic product design interactions affecting and attributed to cosmetic products cosmetic ingredients, vehicles, and finished products difference between pure cosmetics for enhancement and cosmetics used to treat high quality standards in cosmetic products that improve appearance, protect their targets, and maintain natural functions

**The Art of Writing Reasonable Organic Reaction**

**Mechanisms** John Wiley & Sons

Following its successful predecessor, this book covers the fundamentals, delivery routes and vehicles, and practical applications of drug delivery. In the 2nd edition, almost all chapters from the previous are retained and updated and several new chapters added to make a more complete resource and reference. • Helps readers understand progress in drug delivery

research and applications • Updates and expands coverage to reflect advances in materials for delivery vehicles, drug delivery approaches, and therapeutics • Covers recent developments including transdermal and mucosal delivery, lymphatic system delivery, theranostics • Adds new chapters on nanoparticles, controlled drug release systems, theranostics, protein and peptide drugs, and biologics delivery

### **MOLECULAR MECHANISMS OF SKIN AGING AND AGE-RELATED DISEASES**

Springer Science & Business Media

Intended for students of intermediate organic chemistry, this text shows how to write a reasonable mechanism for an organic chemical transformation. The discussion is organized by types of mechanisms and the conditions under which the reaction is executed, rather than by the overall reaction as is the case in most textbooks. Each chapter discusses common mechanistic pathways and suggests practical tips for drawing them. Worked problems are included in the discussion of each mechanism, and "common error alerts" are scattered throughout the text to warn readers about pitfalls and misconceptions that bedevil students. Each chapter is capped by a large problem set.

Medieval Latin and the Rise of European Love-lyric John Wiley & Sons

Cosmetic science covers the fields from natural sciences to human and social sciences, and is an important interdisciplinary element in various scientific disciplines. *New Cosmetic Science* is a completely updated comprehensive review of its 35 year old counterpart *Cosmetic Science*. *New Cosmetic Science* has been

written to give as many people as possible a better understanding of the subject, from scientists and technologists specializing in cosmetic research and manufacturing, to students of cosmetic science, and people with a wide range of interests concerning cosmetics. The relationship between the various disciplines comprising cosmetic science, and cosmetics, is described in Part I. In addition to discussing the safety of cosmetics, the "Usefulness of Cosmetics", rapidly becoming an important theme, is described using research examples. The latest findings on cosmetic stability are presented, as are databases, books and magazines, increasingly used by cosmetic scientists. Part II deals with cosmetics from a usage viewpoint, including skin care cosmetics, makeup cosmetics, hair care cosmetics, fragrances, body cosmetics, and oral care cosmetics. Oral care cosmetics and body cosmetics are presented with product performance, types, main components, prescriptions and manufacturing methods described for each item. This excellent volume enlightens the reader not only on current cosmetics and usage, but indicates future progress enlarging the beneficial effects of cosmetics. Products with better pharmaceutical properties (cosmeceuticals), working both physically and psychologically, are also highlighted.

### **PHARMACEUTICAL COMPOUNDING AND DISPENSING**

Springer Publishing Company

It is the largest and perhaps the most important organ of our body—it covers our fragile inner parts, defines our social identities, and channels our sensory experiences. And yet we rarely give a thought. With *The Book of Skin*, Steven Connor aims

to change all that, offering an intriguing cultural history of skin. Connor first examines physical issues such as leprosy, skin pigmentation, cancer, blushing, and attenuations of erotic touch. He also explains why specific colors symbolize certain emotions, such as green for envy or yellow for cowardice, as well as why skin is the focus of destructive rage in many people's violent fantasies. The Book of Skin then probes into how skin has been such a powerfully symbolic terrain in photography, religious iconography, cinema, and literature. From the Turin shroud to Ralph Ellison's *Invisible Man* to plastic surgery, *The Book of Skin* expertly examines the role of skin in Western culture. A compelling read that penetrates well beyond skin-deep, *The Book of Skin* validates James Joyce's declaration that "modern man has an epidermis rather than a soul." "Richly conceived and elaborately thought out. No flicker of meaning has escaped Connor's ferocious, all-seeing eye."—Guardian

Kecamatan Sanrobone berada di kabupaten Takalar. Jumlah kelurahan yang ada di kecamatan ini sebanyak 18 kelurahan dan 55 desa. Tiga (4) desa diantaranya merupakan desa yang termasuk desa binaan Yayasan Wakaf Universitas Muslim Indonesia (YW-UMI): Desa Sanrobone, Desa Paddingin dan Desa Tonasa. Kelurahan Sanrobone terletak di Kecamatan Sanrobone ± 12 km di sebelah barat ibukota Kabupaten daerah Tingkat II Takalar. Batas administrasi wilayah Kelurahan Sanrobone yaitu sebelah utara berbatasan dengan desa Paddinging. Sebelah Timur berbatasan dengan desa Banyuanyara. Sebelah Selatan berbatasan dengan Desa Lagaruda. Sebelah Barat berbatasan dengan desa Lagaruda. Kelurahan Sanrobone terdiri atas 10 RK,

24 RT, dan 5 Dusun. Lingkungan, yaitu Dusun Bontowa, Dusun Lau, Dusun Salekowa, Dusun Sanrobone dan Dusun Kassuarrang. Jumlah penduduk berdasarkan data yang diperoleh, jumlah penduduk Kelurahan Sanrobone tahun 2007 adalah 2.530 jiwa. Terdiri dari laki-laki 1.213 jiwa dan perempuan 1.317 jiwa. Transportasi; melihat kekayaan di desa Sanrobone bahwa sarana dan prasarana yang dipergunakan oleh masyarakat sudah cukup moderen dikarenakan kondisi jalan yang tergolong baik dan memadai, sehingga alur transportasi telah berjalan baik. Data observasi dilapangan ditemukan beberapa tumbuhan/tanaman yang banyak dimanfaatkan oleh masyarakat dalam peningkatan kekebalan tubuh (immune booster) terutama pada kondisi saat ini pandemic Covid-19. Diantaranya dibahas dalam bab-bab berikutnya termasuk kajian ilmiah yang dapat menjadi dasar penggunaan tanaman tersebut.

New Cosmetic Science Cambridge University Press

In our modern society, expectations are high, also with respect to our daily diet. In addition to being merely "nutritious", i.e. supplying a variety of essential nutrients, including macro-nutrients such as proteins or micro-nutrients such as minerals and vitamins, it is almost expected that a good diet offers further advantages - especially well-being and health and the prevention of chronic diseases, which are, as we generally tend to grow older and older, becoming a burden to enjoying private life and to the entire society. These additional qualities are often sought in diets rich also in non-nutritive components, such as phytochemicals. In contrast to drugs, which are taken especially to cure or ameliorate diseases, it is expected that a healthy diet acts in particular on the side of prevention, allowing us to become old

without feeling old. In the present book, rather than trying to give an exhaustive overview on nutritional aspects and their link to well-being and health, selected topics have been chosen, intended to address presently discussed key issues of nutrition for health, presenting a reasonable selection of the manifold topics around diet, well-being, and health: from the antioxidants polyphenols and carotenoids, aroma-active terpenoids, to calcium for bone health, back to traditional Chinese Medicine.

Wiley-VCH

Puji syukur kami panjatkan kepada Tuhan Yang Maha Esa yang telah melimpahkan berkat dan karunia-Nya sehingga kami dapat menyelesaikan buku referensi sebagai luaran tambahan dari hasil penelitian dosen pemula program (PDP Kemenristek Dikti 2020) tepat pada waktunya. Buku ini berisi tentang tanaman gatal atau tanaman jelatang (*Urtica dioica* L.) dan penyebarannya, kandungan senyawa kimia yang terdapat di dalamnya, serta pemanfaatan tanaman gatal sebagai antioksidan, anti-aging, antibakteri, antijamur, bahan pangan, simplisia, dan formulasi krim dari ekstrak etanol daun gatal atau daun jelatang (*Urtica dioica* L.) yang dibuat dalam bentuk sediaan krim. Dengan buku referensi ini, diharapkan dapat menambah wawasan, ilmu pengetahuan, dan referensi bagi pengajar, mahasiswa, peneliti, di bidang Farmasi, Biologi, Kimia, Kedokteran, Kesehatan Masyarakat, serta memberi informasi kepada masyarakat. Pada kesempatan ini kami mengucapkan terima kasih kepada Direktorat Riset dan Pengabdian Masyarakat Pengembangan Kementerian Riset, Teknologi, dan Pendidikan Tinggi yang sudah membiayai penelitian PDP 2020. Ucapan terima kasih juga kami sampaikan kepada Universitas Sari Mutiara Indonesia dan LPPM

Universitas Sari Mutiara Indonesia yang telah memfasilitasi penelitian ini. Kami menyadari penulisan buku ini masih jauh dari kesempurnaan, untuk itu kami mengharapkan saran yang membangun dari pembaca agar Buku referensi ini menjadi lebih baik. Akhir kata kami ucapkan terima kasih.

*Cosmetic Formulation of Skin Care Products* Academic Press  
A comprehensive textbook covering the design of dosage forms and all aspects of drug delivery systems. 'Pharmaceutics' in its broadest sense is the 'art of the apothecary' or, in simple terms, pharmaceutical preparations. It remains a diverse subject in the pharmacy curriculum, encompassing design of drugs, their manufacture, and the elimination of micro-organisms from the products. This books encompasses all those areas and pays particular attention to the design of dosage forms and their manufacture.

## DRUGS VS. COSMETICS

Pharmaceutical Press

ICHEST adalah konferensi internasional yang diadakan pada tanggal 12 Desember 2020. Tema utama konferensi ini adalah Kesehatan, Pendidikan, dan Teknologi. Ada sekitar 400 peserta umum, 100 presenter, 47 artikel dan peserta tamu. Pada saat konferensi berlangsung, seluruh peserta terhubung melalui zoom pada waktu yang sama. Dalam konferensi internasional ini kami mengangkat tema utama yaitu Konferensi Internasional pertama tentang Kesehatan, Pendidikan, dan Ilmu Komputer, Universitas Megarezky. Selanjutnya, untuk memudahkan presenter dalam menyampaikan tema yang telah diajukan, kami memperluas dan mereproduksi tema kecil untuk presenter. Antara lain, kebijakan

baru dalam pelayanan kesehatan, pendidikan dan teknologi, kebijakan dalam pembelajaran selama pandemi Covid-19, merumuskan kembali tujuan pembelajaran, dan sebagainya. Buku ini merupakan hasil dari konferensi internasional ini, maka dengan ini pembaca dapat membaca semua artikel yang dipresentasikan pada konferensi tersebut.

**A Definitive Practical Guide** John Wiley & Sons

"This book has succeeded in covering the basic chemistry essentials required by the pharmaceutical science student...the undergraduate reader, be they chemist, biologist or pharmacist will find this an interesting and valuable read."-Journal of Chemical Biology, May 2009 Chemistry for Pharmacy Students is a student-friendly introduction to the key areas of chemistry required by all pharmacy and pharmaceutical science students. The book provides a comprehensive overview of the various areas of general, organic and natural products chemistry (in relation to drug molecules). Clearly structured to enhance student understanding, the book is divided into six clear sections. The book opens with an overview of general aspects of chemistry and their importance to modern life, with particular emphasis on

medicinal applications. The text then moves on to a discussion of the concepts of atomic structure and bonding and the fundamentals of stereochemistry and their significance to pharmacy- in relation to drug action and toxicity. Various aspects of aliphatic, aromatic and heterocyclic chemistry and their pharmaceutical importance are then covered with final chapters looking at organic reactions and their applications to drug discovery and development and natural products chemistry. accessible introduction to the key areas of chemistry required for all pharmacy degree courses student-friendly and written at a level suitable for non-chemistry students includes learning objectives at the beginning of each chapter focuses on the physical properties and actions of drug molecules

Nas Media Pustaka

This book focuses on skin photoaging, the premature aging of skin due to environmental effects such as exposure to UV (UVA, UVB) radiation from the sun. Slowing the aging process and rejuvenation have been one of the major goals of medicine and are in high
