In what follows, S is the sample space of the experiment in question and E is the event of interest. $n(S)$ is the number of elements in the sample space S and $n(E)$ is the number of elements in the event E.Probability Questions with SolutionsTo answer this one we need to go to the basic definition of a median. Median is the value which has roughly half the values before it and half the values after. The number of values less than 25 are

(36+54+69 = 159) and the number of values greater than 30 are (55+43+25+22+17= 162). So the median should lie somewhere between 25 and 30.41 questions on Statistics for data scientists & analystsIntroductory Statistics . University of Toronto STAB22. An Introduction to Statistics.
