Improving Oncology Patient Outcomes. Volume 2 Association of Pediatric Oncology Nurses

This book explains how telemedicine can offer solutions capable of improving the care and survival rates of cancer patients and can also help patients to live a normal life in spite of their condition. Different fields of application - community, hospital and home based - are examined, and detailed attention is paid to the use of tele-oncology in rural/extreme rural settings and in developing countries. The impact of new technologies and the opportunities afforded by the social web are both discussed. The concluding chapters consider eLearning in relation to cancer care and assess the scope for education to improve prevention. No medical condition can shatter people's lives as cancer does today and the need to develop strategies to reduce the disease burden and improve quality of life is paramount. Readers will find this new volume in Springer's TLe Health series to be a rich source of information on the important contribution that can be made by telemedicine in achieving these goals.

The needs of cancer patients and their families are complex. Yet still more complex are the powerful social and cultural forces that shape the delivery of cancer care, and the way in which it is experienced. *Cancer Nursing: Care in Context* addresses this by adopting a unique approach that situates cancer care in the context of society's attitudes to the disease, and the broader every-day needs of both patients and their carers. By combining evidenced-based information, a critical view of care and treatment, and 'first-hand accounts' of having cancer and caring for people with cancer, the book provides a new perspective how best to deliver the care that patients truly require. This second edition includes new chapters on prevention, diagnosis, symptoms, self-help and self-management, and living with cancer long-term. It also: * Addresses significant changes in cancer care, including expansion of nursing roles, the establishment of cancer networks and cancer collaborative projects * Considers NICE guidance on Supportive and Palliative care * Incorporates material on prevention and early detection * Includes evidence tables based on relevant literature *Cancer Nursing: Care in Context* is an invaluable resource for all those involved in the provision of cancer care and support to patients and their families.
