INTERNATIONALE Edition 3 .0 2017 -09 INTERNATIONAL STANDARD INTERNATIONALE j62056 Overview j62056 is a Java implementation of the IEC 62056-21 protocol (modes A, B, C, and D). It can be used to develop individual IEC 62056-21 master applications that read metering data from slaves such as gas, water, heat, or electricity meters. j62056 Overview – IEC 62056-21 – OpenMUC Standards Australia is the country's leading independent, non-governmental, not-for-profit standards organisation. We are also Australia's representatives of the International Organization for Standardization (ISO) and International Electrotechnical Commission (IEC). Find out more IEC 62056-5-3:2017 - Standards Australia As defined in 62056-1-0, the IEC 62056 DLMS/COSEM suite provides specific communication

profile standards for communication media relevant for smart metering. Such communication profile standards specify how the COSEM data model and the DLMS/COSEM application layer can be used on the lower communication media specific - protocol layers. Edition 1.0 2016-11 TECHNICAL SPECIFICATION The DLMS / COSEM standard suite (IEC 62056 / EN 13757- 1) is the most widely accepted international standard for utility meter data exchange. This global acceptance is clearly demonstrated by the continued fast growth of the membership of the DLMS User Association and by the number of meter types certified to be DLMS / COSEM compliant. DLMS / COSEM for smart metering | Smart Energy International 01/12/09 METRING INDIA 2009_ CPRI 13. The IEC 62056 is an open protocol exclusively evolved for Metering purpose. It operates at meter level. A wide range of data types like Instantaneous values, Tariff readings, Parameter profiles, Demand values etc can be read either selectively or in groups. Meter Interoperability Standards and Protocols to ensure a ... This American National Standard is an adoption of IEC 62056-8-20 Ed.1 Electricity Metering Data Exchange – The DLMS/ COSEM Suite Part 8-20: Mesh Communication Profile for Neighbourhood Networks. Any reference in this standard to an IEC 62056 part is understood to mean a reference to the equivalent ANSI/IEC 62056 part, where it exists. ANSI C12/IEC 62056-8-20 ED1.0 American National Standard ... DLMS or Device Language Message Specification (originally Distribution Line Message Specification), is the suite of standards developed and maintained by the DLMS User Association and has been co-opted by the IEC TC13 WG14 into the IEC 62056 series of standards. DLMS COSEM Training: January 2012 The DLMS COSEM Workshop and the AMI Conference concluded on 19th February 2009 at New Delhi. The Workshop introduced the DLMS COSEM / IEC 62056 protocol to the Indian audience of utilities, regulators and the meter manufacturers. The workshop by DLMS UA President and IEC TC 13 secretary Gyozo Kmety was well received. DLMS COSEM This first edition cancels and replaces the first edition of IEC 62056-31, issued in 1999, and constitutes a technical revision. The main technical changes are: - addition of a profile which makes use of the IEC 62056 DLMS/COSEM Application layer and COSEM object model, IEC 62056-3-1:2013 - IEC Standards - VDE Publishing House IEC 62056-7-3:2017 specifies DLMS/COSEM wired and wireless M-Bus communication profiles for local and

neighbourhood networks. It is restricted to aspects concerning the use of communication protocols in conjunction with the COSEM data model and the DLMS/COSEM application layer.

The DLMS / COSEM standard suite (IEC 62056 / EN 13757- 1) is the most widely accepted international standard for utility meter data exchange. This global acceptance is clearly demonstrated by the continued fast growth of the membership of the DLMS User Association and by the number of meter types certified to be DLMS / COSEM compliant.
