At any age or grade level, powerful readers are those who are aware of their thinking as they read. The assumption is that high school students don't need to be taught how to read; but even if they can decode words and gain literal understanding, they often don't think deeply about what they are reading. Presenting a balance of theory and practical lessons, *Powerful Readers* demonstrates that instruction in the key strategies of connecting, visualizing, questioning, inferring, determining importance, and transforming can help students develop their reading skills and get more out of their work with fiction and nonfiction. Step-by-step lessons for introducing and using the strategies, connections to literary devices, and reading lists for each strategy are all part of this valuable resource.

Differentiated Reading for Comprehension is designed to provide high-interest, nonfiction reading

success for all readers. This 64-page book focuses on fourth grade reading skills defined by the Common Core State Standards. Each of 15 stories is presented separately for the below-level, on-level, and advanced students, followed by a series of comprehension questions. Grade four covers such standards as drawing inferences, understanding the different text structures, and comparing and integrating two texts on the same topic. This new series will allow teachers to present the same content to below-level, on-level, and advanced students with these leveled nonfiction stories. It includes multiple-choice, fill-in-the-blank, and true/false questions; short-answer writing practice; and comprehension questions. Students stay interested, build confidence, and discover that reading can be fun! The reading passages will be separated into sections with titles such as *Extreme Places, Amazing People, Wild Animals, Strange and Unexplained, Fascinating Machines, and Amazing Kids.*

The fifth volume of *Imagery* emanates from the matrix of presentations offered after the conventions of the American Association for Mental Imagery for the years 1987 and 1988. The first meeting was held in Toronto; the second at Yale University. An overview of the presentations covered such a variety of subjects that we thought the subtitle would be most appropriately-- *Current Perspectives*. For the first time in five volumes, two contributions are related to anthropological imagery by Caughey and Brink. John Caughey, whose book, *Imaginary Social Worlds* pioneered the social psychology approach to the silent inner imagination, offers a fine chapter in anthropological imagery of his own experiences with Sufi mystics in Pakistan and Micronesian Islanders in the Western Pacific compared to middle-class Americans. Nicholas Brink follows with a chapter on "The Healing Powers of the Native American Medicine Wheel." Theoretical studies with interesting experimental designs are presented by Huneycutt, "A Functional Analysis of Imagined Interaction Activity in Everyday Life" by Kunzendorf and Hoyle on "Auditory Percepts, Mental Images and Hypnotic Hallucinations: Similarities and Differences in Auditory Evoked Potentials"; and by Giambra and Grodsky on "Task- Unrelated Images and Thoughts While Reading." The relationship between creativity and mental imagery is presented by H. Rosenberg and W. Trusheim entitled, "Creative Transformations: How Visual Artists, Musicians and Dancers Use Mental Imagery in Their Work," and Colalillo-Kates discusses "Dreamjournies: Using Guided Imagery and Transformational Fantasy With Children.
