A monster assembled by a scientist from parts of dead bodies develops a mind of his own as he learns to loathe himself and hate his creator. Shelley's suspenseful and

intellectually rich gothic tale confronts some of the most important and enduring themes in all of literature—the power of human imagination, the potential hubris of science, the gulf between appearance and essence, the effects of human cruelty, the desire for revenge and the need for forgiveness, and much more.

Do you feel stuck in life, not knowing how to make it more successful? Do you wish to become more popular? Are you craving to earn more? Do you wish to expand your horizon, earn new clients and win people over with your ideas? How to Win Friends and Influence People is a well-researched and

comprehensive guide that will help you through these everyday problems and make success look easier. You can learn to expand your social circle, polish your skill set, find ways to put forward your thoughts more clearly, and build mental strength to counter all hurdles that you may come across on the path to success. Having helped millions of readers from the world over achieve their goals, the

clearly listed techniques and principles will be the answers to all your questions. *Multiple Perspectives on Research and Practice* McGraw-Hill Education As a result of his visits to classrooms across the nation, Brown has compiled an engaging, thought-provoking collection of classroom vignettes which show the ways in which national, state, and local school politics

translate into changed classroom practices. "Captures the breadth, depth, and urgency of education reform".--Bill Clinton.

BUILDING EVIDENCE FOR SOUND POLICY

Jossey-Bass Incorporated Pub
Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly

coupled with practice. Much of the research is carried out in school settings. Research influences educational practice, and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership (SERP) is designed to make this vision a reality. It proposes a large-scale, coherent program of research and development that would put

the problems of educational practice at its center, and focus on all stages necessary to influence practice. These include theory testing, the development and evaluation of instructional programs, the study of practice in context, and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of

linking research and practice. It is a call to mobilize the nation's resources and political will, the power of scientific research, and the expertise of our educators, to create a more effective research and development program for improving student learning. *Frankenstein* National Academies Press Originally written in 1938 but never published due to its

on: * How to prepare students and teachers to participate in discussion * How to get discussions started * How to keep discussions going * How to ensure that teachers' and students' voices are kept in some sort of balance It considers the influence of factors of race, class and gender on discussion groups and argues that teachers need to intervene to prevent patterns of inequity

present in the wider society automatically reproducing themselves inside the discussion-based classroom. It also grounds the evaluation of discussions in the multiple subjectivities of students' perceptions. An invaluable and helpful resource for university and college teachers who use, or are thinking of using, discussion approaches. How to Study in College National Academies Press

 The Art of Public Speaking is a fantastic introduction to public speaking by the master of the art—Dale Carnegie.
 Featured

within this classic manual are hundreds of tips and tricks on how to become an efficient and effective public speaker. One of the core ideas in his books is that it is possible to change other people's behavior by changing one's reaction to them. This is a fascinating work and is thoroughly recommended for everyone.

Teachers make a difference. The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those attracted to the field and their preparation. Yet there are many questions about how teachers are being prepared and how they ought to be prepared. Yet, teacher preparation is often treated as an afterthought in discussions of improving the public education system. Preparing Teachers addresses the issue of teacher preparation with specific attention to reading, mathematics, and science. The book evaluates the characteristics of the candidates who enter teacher preparation programs, the sorts of instruction and experiences teacher candidates receive in preparation programs, and the extent that the required instruction and experiences are consistent with converging scientific evidence. Preparing Teachers also identifies a need for a data collection model to provide valid and reliable information about the content knowledge, pedagogical competence, and effectiveness of graduates from the

various kinds of teacher preparation programs. Federal and state policy makers need reliable, outcomes-based information to make sound decisions, and teacher educators need to know how best to contribute to the development of effective teachers. Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to

ensuring that the same critiques and questions are not being repeated 10 years from now.

John Wiley & Sons With contributions from leading scholars, this compelling volume offers fresh insights into literacy teaching and learning—and the changing nature of literacy itself—in today's K-12 classrooms. The focus is on varied technologies and literacies

such as social networking sites, text messaging, and online communities. Cutting-edge approaches to integrating technology into traditional, print-centered reading and writing instruction are described. Also discussed are ways to teach the new skills and strategies that students need to engage effectively with digital texts. The book is unique in examining new literacies through multiple

theoretical lenses, including behavioral, semiotic, cognitive, sociocultural, critical, and feminist perspectives.

One of the nation's premier talent agents and career advisors shows you how to catapult your career and your life forward with three key

communication strategies—Authority, Warmth, and Energy. A self-empowerment guide to achieving your fullest professional and personal potential, *Don't Take YES for An Answer* explains why positive feedback limits personal and professional growth and then teaches you how to embrace hard truths and critical feedback to escape mediocrity and break

away from the pack. To stand out, to attract the attention of those who can raise your profile, to protect yourself during lean times, or to gain the interest of future employers, you must harness three critical communication traits that human beings respond to most: AWE: A—Authority, W—Warmth, E—Energy. When all else is equal—education, work ethic, intelligence,

experience, ambition—the single biggest factor in winning business, promotions, friendships, or followers hinges on our ability to communicate and connect. Mastering AWE gives you an unparalleled advantage over the competition, no matter your field. Herz, who has represented and coached dozens of sports, media, and entertainment leaders over the course of nearly three

decades, delivers a step-by-step program that helps you understand and hone your AWE skills. Packed with inspiring success stories, grounded in the latest social psychology and scientific research, and featuring "insider" anecdotes from some of the most popular entrepreneurs and professionals in broadcasting, sports, and the corporate world—many

personally coached by Herz—Don't Take YES for An Answer provides invaluable suggestions and practical techniques for "upping" your AWE in every aspect of your life. *A Handbook for College Teachers* Manjul Publishing From the author of *How to Win Friends and Influence People*. Exponents & Scientific Notation Jossey-Bass Praise for Educating Nurses "This book represents a call to arms, a call for nursing educators and programs to step up in our preparation of nurses. This book will incite controversy, wonderful

debate, and dialogue among nurses and others. It is a must-read for every nurse educator and for every nurse that yearns for nursing to acknowledge and reach for the real difference that nursing can make in safety and quality in health care."
—Beverly Malone, chief executive officer, National League for Nursing "This book describes specific steps that will enable a new

system to improve both nursing formation and patient care. It provides a timely and essential element to health care reform."
—David C. Leach, former executive director, Accreditation Council for Graduate Medical Education "The ideas about caregiving developed here make a profoundly philosophical and intellectually innovative contribution to medicine as

well as all healing professions, and to anyone concerned with ethics. This groundbreaking work is both paradigm-shifting and delightful to read." —Jodi Halpern, author, *From Detached Concern to Empathy: Humanizing Medical Practice* "This book is a landmark work in professional education! It is a must-read for all practicing and aspiring nurse educators, administrators

, policy makers, and, yes, nursing students." —Christine A. Tanner, senior editor, Journal of Nursing Education	"This work has profound implications for nurse executives and frontline managers." —Eloise	Balasco Cathcart, coordinator, Graduate Program in Nursing Administration , New York University
