ENCYCLOPEDIA OF THE NEUROLOGICAL SCIENCES

Channel View Publications

The Encyclopedia of the Neurological Sciences, Second Edition, Four Volume Set develops from the first edition, covering all areas of neurological sciences through over 1000 entries focused on a wide variety of topics in neurology, neurosurgery, psychiatry and other related areas of neuroscience. The contributing authors represent all aspects of neurology from many viewpoints and disciplines to provide a complete overview of the field. Entries are designed to be understandable without detailed background knowledge in the subject matter, and cross-referencing and suggested further reading lead the reader from a basic knowledge of the subject to more advanced understanding. The easy-to-use 'encyclopedic-dictionary' format of the Encyclopedia of the Neurological Sciences, Second Edition features alphabetic entries, extensive cross-referencing, and a thorough index for quick reference. The wealth of information provided by these four volumes makes this reference work a trusted source of valuable information for a wide range of researchers, from undergraduate students to academic researchers. Provides comprehensive coverage of the field of neurological science in over 1,000 entries in 4 volumes "Encyclopedic-dictionary" format provides for concise, readable entries and easy searching Presents complete, up-to-date information on 32 separate areas of neurology Entries are supplemented with extensive cross-referencing, useful references to primary research articles, and an extensive index

INTERNATIONAL ENCYCLOPEDIA OF LINGUISTICS

This is the first collection focusing on knowledge socialism, a particularly apt term used to describe a Chinese socialist mode of production and socialist approach to development and modernity based around the rise of peer production, new forms of collaboration and collective intelligence. Making the case for knowledge socialism, the book is intended for students, teacher, scholars and policy theorists in the field of knowledge economy.

Interoperability and Open-Source Solutions for the Internet of Things Springer Nature

This work offers a fresh perspective to the study of 'Europe' by placing the discussion of 'What is Europe?' and 'What is it to be European?', in a wider context of the study of modernity through a collection of nine case studies.

Get the foundational knowledge you need to successfully work in a real-world, clinical lab with Tietz Fundamentals of Clinical Chemistry and Molecular Diagnostics, 8th Edition. From highly respected clinical chemistry expert Nader Rifai, this condensed, easier-to-understand version of the acclaimed Tietz Textbook of Clinical Chemistry and Molecular Diagnostics uses a laboratory perspective to guide you through selecting and performing diagnostic lab tests and accurately evaluating the results. Coverage includes laboratory principles, analytical techniques, instrumentation, analytes, pathophysiology, and more. This eighth edition features new clinical cases from The Coakley Collection, new questions from The Deacon's Challenge of Biochemical Calculations Collection, plus new content throughout the text to ensure you stay ahead of all the latest techniques, instrumentation, and technologies. Condensed version of the clinical chemistry "bible" offers the same authoritative and well-presented content in a much more focused and streamlined manner. Coverage of analytical techniques and instrumentation includes optical techniques, electrochemistry, electrophoresis, chromatography, mass spectrometry, enzymology, immunochemical techniques, microchips, automation, and point of care testing. Updated chapters on molecular diagnostics cover the principles of molecular biology, nucleic acid techniques and applications, and genomes and nucleic acid alterations, reflecting the changes in this rapidly evolving field. Learning objectives, key words, and review questions are included in each chapter to support learning. More than 500 illustrations plus easy-to-read tables help readers better understand and remember key concepts

Encyclopedia of Tourism Springer Science & Business Media

Chemical Modelling: Applications and Theory comprises critical literature reviews of molecular modelling, both theoretical and applied. Molecular modelling in this context refers to modelling the structure, properties and reactions of atoms, molecules & materials. Each chapter is compiled by experts in their fields and provides a selective review of recent literature. With chemical modelling covering such a wide range of subjects, this Specialist Periodical Report serves as the first port of call to any chemist, biochemist, materials scientist or molecular physicist needing to acquaint themselves of major developments in the area. Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research. Compiled by teams of leading authorities in the relevant subject areas, the series creates a unique service for the active research chemist, with regular, in-depth accounts of progress in particular fields of chemistry. Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis. Current subject areas covered are Amino Acids, Peptides and Proteins, Carbohydrate Chemistry, Catalysis, Chemical Modelling. Applications and Theory, Electron Paramagnetic Resonance, Nuclear Magnetic Resonance, Organometallic Chemistry. Organophosphorus Chemistry, Photochemistry and Spectroscopic Properties of Inorganic and Organometallic Compounds. From time to time, the series has altered according to the fluctuating degrees of activity in the various fields, but these volumes remain a superb reference point for researchers.

Tietz Fundamentals of Clinical Chemistry and Molecular Diagnostics 8 E; South Asia Edition;e-Book Council of Europe

In fewer than three hundred years tourism has become a global service industry of great economic, cultural and political importance. Published to critical acclaim, the Encyclopedia of Tourism - now available as a Routledge World Reference title - is the definitive one-volume reference source to this challenging multisectoral industry and multi disciplinary field of study. Comprising over one thousand entries, this volume has been written by an international team of contributors to provide a comprehensive guide to both the manifest and hidden dimensions of tourism. It explores the wide range of definitions, concepts, perspectives and institutions and includes: comprehensive coverage of key issues and concepts definitions of all terms and acronyms entries on the significant institutions, associations and journals in the field country-specific tourism profiles, from Greece to Japan and Kenya to Peru thorough analysis of the trends and patterns of tourism development and growth. The extensive cross-referencing and comprehensive index will assist the reader in making links between the diverse aspects of tourism studies, and the suggestions for further reading are invaluable.

Routledge

These proceedings describe processing, materials, and equipment for CMOS front-end integration including gate stack, source/drain and channel engineering. Topics: strained Si/SiGe and Si/SiGe on insulator; high-mobility channels including III-Vs, etc.; nanowires and carbon nanotubes; high-k dielectrics, metal and FUSI gate electrodes; doping/annealing for ultra-shallow junctions; low-resistivity contacts; advanced deposition (e.g. ALD, CVD, MBE), RTP, UV, plasma and laser-assisted processes.

ADVANCING IOT PLATFORMS INTEROPERABILITY

CABI

It was Oscar Wilde who defined the tragedy of old age by saying that " . . . as soon as you are old enough to know better, you don't know anything at all. " As improvements in the quality of health care bring about longer life, our attention has turned from the prolonging of life to the maintenance of involvement in life. In developed nations, a full 100% increase in the ranks of the elderly has appeared and with the benefits of this prolongation have come new and greater needs of the elderly cohort. Our interest is in those processes that may lead to dementia among the elderly, for in dementia we see a thief that robs victims of their memories and their place in life. This text was conceived and developed from an international conference on neurodevelopment, aging, and cognition; the purpose of this few days a group of experts in these conference was to bring together for a fields from around the world to generate a dialog on common themes and unresolved problems. Our hope was that by keeping the meeting small and informal, we could break through barriers of terminology unique to the areas of developmental neurobiology, neuroscience, cognitive science, and clinical medicine, and have a meaningful discussion on processes that affect the biological integrity and cognitive performance of the aging nervous system.

Handbook of Research on Perception-Driven Approaches to Urban Assessment and Design The Tourism Education Futures Initiative

From the erosion of state legitimacy in Lebanon to the use of smartphones in Kyrgyzstan, from a Polish suburb to the music scene in Azerbaijan, this volume attempts to explain why, in a variety of world regions, a substantial number of people tend to ignore or act against state rules. We propose to look at informality beyond simplistic associations of the phenomenon with a single category such as "informal labour" or "corruption". By doing this, we propose to look for a correlation between the emergence, and persistence, of some informal practices and the quality of governance in a given area. We also suggest that a better understanding of the variety of informal practices present in a region can help conceptualising more adequate interventions and eventually improve the socio-economic conditions of its inhabitants.

Chemical Safety Bentham Science Publishers

Current global economic crises call for social responsibility to replace neo-liberalistic, one-sided and short-term criteria causing monopolies of global enterprises. The triad 'freedom, brotherhood, equality' and 'the invisible hand' support the hypothesis of interdependence among humans. Humanity's existence is endangered under the threat of global capitalism, unless the social responsibility's concept 'everyone's social responsibility impacts everyone in society' becomes the new socio-economic order, realized alongside concepts as 'interdependence' and 'holism' and using its principles of accountability, transparency, ethical behavior, respect for stakeholders, for the rule of law, for international norms and human rights. Social Responsibility - A non-technological innovation process explores the realm of social responsibility in the context of innovation, business practice and economic crises. Readers can apply related principles to their business practices and enhance their business prospects in a modern environment facing the challenges of socio-economic crises. This volume is intended for graduates and professionals working in government organizations and commercial enterprises, to learn basic concepts about social responsibility and introduce holistic management practices in their daily and professional lives.

SOCIAL RESPONSIBILITY - SUSTAINABILITY, EDUCATION AND MANAGEMENT

Bernan Press(PA)

Distinguishing between sustainable development and sustainable tourism, the authors examine whether, and in what form, tourism can contribute to sustainable development and growth. Focusing on different types of tourism appropriate to particular situations, the team of leading contributors draws on examples from around the world - Canada, USA, Spain, Belgium, UK, Australia - to explore tourism's contribution to the economic, social, political and environmental advancement of developing countries and the importance of tourism in industrialised nations. This book examines the new policies and initiatives established by both the private sector and the state to pursue sustainable tourism growth and identifies the opportunities and challenges inherent in achieving it. [Neurodevelopment, Aging and Cognition](#) Springer

This book constitutes the proceedings of the 13th International Conference on Latent Variable Analysis and Signal Separation, LVA/ICA 2017, held in Grenoble, France, in February 2017. The 53 papers presented in this volume were carefully reviewed and selected from 60 submissions. They were organized in topical sections named: tensor approaches; from source positions to room properties: learning methods for audio scene geometry estimation; tensors and audio; audio signal processing; theoretical developments; physics and bio signal processing; latent variable analysis in observation sciences; ICA theory and applications; and sparsity-aware signal processing. Issues in Neuroscience Research and Application: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Neuroscience Research and Application. The editors have built Issues in Neuroscience Research and Application: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Neuroscience Research and Application in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Neuroscience Research and Application: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Towards Economic Inclusion in the Western Balkans Routledge

Bullying is one of the most difficult areas of violence against children to eliminate, especially with the ubiquitous role that internet and mobile technology plays in their life today and the capacity this gives for bullying to continue night and day. Bullying seems to be part of human nature and has been with us since ancient times, but that is no reason to accept it fatalistically as "natural" and, for children, part of growing up. Only in the 1970s was research first undertaken to explore the phenomenon and to attempt to understand why it takes place and its impact on individuals and societies. With the emergence of the internet and social media, bullying has taken a more sinister turn, becoming more relentless, constant and inescapable for victims. This book aims to explain to both experts and the interested layperson what is known about bullying, its causes, effects and, crucially, how it can be reduced, in particular by fostering social and emotional skills in young people. Authors from more than a dozen countries have contributed to this publication, presenting widely differing perspectives, practice and insights on how they are tackling or think we should be tackling modern societal issues such as bullying and hate speech. While some chapters focus more specifically on case studies and what the research tells us, others look at issues related to bringing up and educating children for the world we live in. This publication also provides information on the work of the ENABLE network and aims to introduce readers to the psychologists and researchers, teachers, parents and social media innovators that have helped to shape it.

ISSUES IN NEUROSCIENCE RESEARCH AND APPLICATION: 2011 EDITION

Springer Science & Business Media

The Tourism Education Futures InitiativeRoutledge

Handbook of Nanophysics Springer Science & Business Media

As the world faces many serious challenges informed, courageous and mindful leadership is needed for a better future. The Tourism Education Futures Initiative (TEFI) is the collective effort of a group

of innovative, thoughtful and committed scholars and industry leaders seeking to provide vision, knowledge, and a framework for tourism education programs that promote global citizenship and optimism for a better world. This book consolidates some of TEFI's work as it seeks to be the leading, forward-looking network that inspires, informs and supports tourism educators and students to passionately and courageously transform the world for the better. It makes the case for why change is needed, and how tourism educators can respond to that change with strategies and values-based tools. The book contains papers published in special TEFI issues of the Journal of Teaching in Travel & Tourism (JTTC), which question and explore some of the most important theoretical, conceptual and practical issues facing tourism education now and into the future. The book concludes by integrating the special issues' key contributions with a brief conceptualisation of education futures before it outlines TEFI's framework for action over the coming years. Tourism educators worldwide will find that this volume serves two important purposes. On the one hand, it challenges educators to think both critically and proactively about tourism education, while on the other sharing examples of teaching and learning tools that seek to prepare our students for the future and to be global citizens that live lives of consequence. This book is a collection of articles from the Journal of Teaching in Travel and Tourism.

26TH EUROPEAN SYMPOSIUM ON COMPUTER AIDED PROCESS ENGINEERING

Springer

Agents and multi-agent systems are related to a modern software paradigm which has long been recognized as a promising technology for constructing autonomous, complex and intelligent systems. The topics covered in this volume include agent-oriented software engineering, agent co-operation, co-ordination, negotiation, organization and communication, distributed problem solving, specification of agent communication languages, agent privacy, safety and security, formalization of ontologies and conversational agents. The volume highlights new trends and challenges in agent and multi-agent research and includes 38 papers classified in the following specific topics: learning paradigms, agent-based modeling and simulation, business model innovation and disruptive technologies, anthropic-oriented computing, serious games and business intelligence, design and implementation of intelligent agents and multi-agent systems, digital economy, and advances in networked virtual enterprises. Published papers have been presented at the 9th KES Conference on Agent and Multi-Agent Systems - Technologies and Applications (KES-AMSTA 2015) held in Sorrento, Italy. Presented results should be of value to the research community working in the fields of artificial intelligence, collective computational intelligence, robotics, dialogue systems and, in particular, agent and multi-agent systems, technologies, tools and applications. [Translation Studies](#) Routledge

The countries in the Western Balkans have been severely affected by the wars and conflicts that led to the breakup of former Yugoslavia, by political instability and the effort of creating new states, weak economies and high levels of unemployment, poverty and social exclusion, and inequality. As revealed by recent surveys, such as EBRD's Life in Transition Survey and Eurofound's European Quality of Life Survey, life satisfaction in the region is far below that elsewhere in Europe. In recent years they had achieved a strong impetus of economic growth with falling rates of unemployment and increasing optimism for the future. However, the COVID-19 pandemic of 2020 has brought about a sudden reversal of these trends and a renewed deterioration in the economic outlook, and an increase in social hardships that heralds a repeat of past failures in economic inclusion policies. This book identifies the key challenges in the areas of economic inclusion, focusing on the themes of labour markets, vocational education and skills, female entrepreneurship and the integration of migrants. It considers the opportunities for solutions to "build back better" once the recovery from the COVID-19 crisis begins, and offers proposals for more acceptable, equitable and effective economic inclusion policies.

Databases and Nutrition Elsevier India

Professor Peter Jarvis has spent over 30 years researching, thinking and writing about some of the key and enduring issues in education. He has contributed well over 30 books and 200 papers and chapters in books on learning theory, adult education and learning, continuing professional education, nurse education, primary school education, distance education and third age education. In this book, he brings together 19 key writings in one place. Starting with a specially written Introduction, which gives an overview of Peter's career and contextualises his selection within the development of the field, the chapters cover: Learning Learning and Spirituality Learning and Doing Teaching The End of Modernity Learning in Later Life. This book not only shows how Peter's thinking developed during his long and distinguished career; it also gives an insight into the development of the fields to which he contributed. In the World Library of Educationalists, international scholars themselves compile career-long collections of what they judge to be their finest pieces - extracts from books, key articles, salient research findings, major theoretical and/practical contributions - so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands of their work and see their contribution to the development of a field, as well as the development of the field itself. Contributors to the series include: Richard Aldrich, Stephen J. Ball, John Elliott, Elliot Eisner, Howard Gardner, John Gilbert, Ivor F. Goodson, David Labaree, John White, E.C. Wragg .

INFORMALITY, LABOUR MOBILITY AND PRECARIOUSNESS

Springer

How safe is safe enough? We live in a world that is totally dependent on chemicals, be they agrochemicals, pharmaceuticals, colorants - it is vitally important that we adopt a sustainable strategy for an environment containing some 11 million chemicals. This book provides a pragmatic guide to the basic tools of chemical safety assessment, from information retrieval, through hazard and risk assessment to safety evaluation and legal aspects. It is truly global in coverage with contributors drawn from East and West, North and South. It covers natural and artificial hazards to the environment, including the potentially catastrophic effects of modern warfare, and encompasses pollution of air, water and soil as well as occupational exposure to chemicals. Everyone with a professional interest in pollution control will find this an invaluable source of information - chemists, environmental scientists, chemical engineers, political scientists, toxicologists, ecotoxicologists, in industry, academia, government departments and international agencies - all will be guided and challenged by the wealth of knowledge it contains.
