How to Meet & Work with Spirit Guides Springer

The horrific true crime cold case of Marcia Trimble, the little girl who disappeared while selling Girl Scout cookies and was discovered a month later, strangled. This mystery haunted her family for over 30 years... When nine-year-old Marcia Trimble was murdered in 1975, her devastated parents believed justice would be served. But without a clear suspect in sight and without the ability to analyze DNA evidence, fingers pointed toward the family and toward neighborhood boys without any definitive conclusion. Police were left at a loss to find any kind of evidence

that would lay this brutal murder case to rest and bring peace to the long-suffering family of this innocent little girl. *A Season of Darkness* catalogs the gruesome account of the murder and its awful aftermath, detailing the thirty years of wondering, silence, and investigation that would eventually lead to a shocking, unexpected, and long-awaited conclusion.

This fascinating and practical book gives you an alternative method for teaching academic subjects to your students with disabilities--the arts! You'll discover how you can infuse academic material and life skills into arts activities to help exceptional

students learn. Interviews with teachers from The Lab School of Washington--a school at the forefront of learning disabilities education--give you suggestions for a variety of projects that will help your students see science in woodwork, learn vocabulary through theater, and study math through music. Case examples show how this innovative approach builds on students' individual strengths and interests and raises their self-esteem. Order today, and find out how all children can learn through the power of art!

Metrics matter for policy and policy matters for well-being. In this report, the co-chairs of the OECD-hosted High Level Expert Group on the Measurement of Economic Performance and Social Progress, Joseph E. Stiglitz, Jean-Paul Fitoussi and Martine Durand, show how over-reliance on GDP as the yardstick of economic performance misled policy makers who did not see the 2008 crisis coming. When the crisis did hit, concentrating on the wrong indicators meant that governments made inadequate policy choices, with severe and long-lasting consequences for many people. While GDP is the most well-known, and most powerful economic indicator, it can't tell us everything we need to know about the health of countries and societies. In fact, it can't even tell us everything we need to know about economic performance. We need to develop dashboards of indicators that reveal who is benefitting from growth, whether that growth is environmentally sustainable, how people feel about their lives, what factors contribute to an individual's or a country's success. This book looks at progress made over the past 10 years in collecting well-being data, and in using them to inform policies. An accompanying volume, *For Good Measure: Advancing*

Research on Well-being Metrics Beyond GDP, presents the latest findings from leading economists and statisticians on selected issues within the broader agenda on defining and measuring well-being.

Shifting Locales in the Motor Vehicle Industry John Wiley & Sons

The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms' internationalization strategies and the social practices that firms impose. This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued. It highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade. This book looks specifically at the American and Asian car industry.

INDUSTRIAL CLUSTERS, UPGRADING AND INNOVATION IN EAST ASIA

Springer

Fifty years ago--on April 26, 1956--the freighter Ideal X steamed from Berth 26 in Port Newark, New Jersey. Flying the flag of the Pan-Atlantic Steamship Company, she set out for Houston with an unusual cargo: 58 trailer trucks lashed to her top deck. But they weren't trucks--they were steel containers removed from their running gear, waiting to be lifted onto empty truck beds when Ideal X reached Texas. She docked safely, and a revolution was launched--not only in shipping, but in the way the world trades. Today, the more than 200 million containers shipped every year are the lifeblood of the new global economy. They sit stacked on

thousands of "box boats" that grow more massive every year. In this fascinating book, transportation expert Brian Cudahy provides a vivid, fast-paced account of the container-ship revolution--from the maiden voyage of the Ideal X to the entrepreneurial vision and technological breakthroughs that make it possible to ship more goods more cheaply than every before. Cudahy tells this complex story easily, starting with Malcom McLean, Pan-Atlantic's owner who first thought about loading his trucks on board. His line grew into the container giant Sea-Land Services, and Cudahy charts its dramatic evolution into Maersk Sealand, the largest container line in the world. Along the way, he provides a concise, colorful history of world shipping--from freighter types to the fortunes of steamship lines--and explores the spectacular growth of global trade fueled by the mammoth ships and new seaborne lifelines connecting Asia, Europe, and the Americas. Masterful maritime history, Box Boats shows how fleets of these ungainly ships make the modern world possible--with both positive and negative effects. It's also a tale of an historic home port, New York, where old piers lie silent while 40-foot steel boxes of toys and televisions come ashore by the thousands, across the bay in New Jersey.

HOW CONTAINER SHIPS CHANGED THE WORLD

SAGE

This true crime saga reveals the case of a missing Nashville woman, a husband on the run, and a rare cold case murder conviction. Janet March had it all: a corporate lawyer husband, two beautiful children, a promising career as an artist, and a dream house she designed herself. But behind closed doors, her husband led a destructive double life. On August 16, 1996, Janet had an appointment to finally file for divorce. But she never arrived. On the night of August 15, she vanished. Janet's disappearance incited a massive search and media frenzy that revealed her husband Perry's seedy dealings. When he absconded with his children to a new life in Mexico, Janet's parents began a decade-long, international custody battle that culminated in Perry's dramatic extradition to Tennessee.

Meanwhile, the Nashville Police Department never found Janet's body. In spite of overwhelming odds, cold case detectives and prosecutors were determined to get justice—and with the help of a shocking surprise witness, they did.

India has realised, later than many other nations, that in order to prosper in the new world economy it will need to successfully manage its knowledge assets. This book investigates the rise of entrepreneurship and knowledge management. It looks at the high tech sector, how it is at present and its prospects for growth. It then goes on to analyse the effect that the knowledge economy will have on labour, business strategy and corporate restructuring and highlights the challenges that India will face, not least whether it can offer enough employment potential for 1 billion people.

Automotive FDI in Emerging Europe Edward Elgar Publishing
Another true-life travel adventure from the Balding Backpacker; one of the epic tales of modern motoring history. In the late summer of 2003, middle-aged adventurer Richard Meredith and a young student companion borrowed a small family hatchback from General Motors and drove it halfway round the world. GM were hoping to publicise the bankrupt Daewoo car business they bought in South Korea after founder Kim Woo Choong had disappeared with \$2billion of company cash. But they got more than they bargained for - and so did the intrepid duo, defying sandstorms, rioters and gun-totting rebels as they meandered across Europe, battled through the ranks of Taliban and al-Qaeda forces in Afghanistan, and juddered across India into Laos and Vietnam. Contains 16pages of colour photos. -- more at www.mercurybooks.co.uk

BUSINESS TODAY

Springer

"I did not, I wish to state, become a journalist because there was no other 'profession' that would have me. I became a journalist because I did not want to rely on newspapers for information." Love, Poverty and War: Journeys and Essays showcases America's leading polemicist's rejection of consensus and cliché, whether he's reporting from abroad in Indonesia, Kurdistan, Iraq, North Korea, or Cuba, or when his pen is targeted mercilessly at the

likes of William Clinton, Mother Theresa ("a fanatic, a fundamentalist and a fraud"), the Dalai Lama, Noam Chomsky, Mel Gibson and Michael Bloomberg. Hitchens began the nineties as a "darling of the left" but has become more of an "unaffiliated radical" whose targets include those on the "left," who he accuses of "fudging" the issue of military intervention in the Balkans, Afghanistan and Iraq. Yet, as Hitchens shows in his reportage, cultural and literary criticism, and opinion essays from the last decade, he has not jumped ship and joined the right but is faithful to the internationalist, contrarian and democratic ideals that have always informed his work.
