This book is the most comprehensive, helpful and up to date guide ever written on selecting, equipping and sailing a cruising yacht. Indispensable for prospective boat buyers and cruisers, whether coastal or world-girdling, it covers all the technical and practical aspects of cruising yachts and systems in one unique book. Nigel Calder, one of

the most respected nautical how-to authors with extensive cruising experience and a rare ability to reduce complexities to simple explanations, explains not only how to select and equip a yacht for coastal or offshore cruising, but also how to sail and navigate it, addressing the concerns of beginners and experienced owners alike. This is the book the cruising world has welcomed as a must have reference. There is, quite literally, nothing else like it. 'The indispensable crew - no boat should sail without Calder aboard' Yachting Monthly 'This is the one book you would choose for your desert island shipwreck scenario - it would solve all your problems!' ## THE BEST USED BOAT NOTEBOOK

Running Press Miniature Editions  
This manual takes both novice and experienced boatowner through minor to major repairs of electrical systems, engines, electronics, steering systems, generators, pumps, cookers, spars and rigging. When it was first published in 1990, the Boatowner's Mechanical & Electrical Manual broke new ground. It was hailed as the first truly DIY manual for boatowners and has sold in its thousands ever since. There have been significant changes in boat systems since then, particularly electrical systems, and this fourth edition has been fully updated to reflect these developments and expand its predecessor's worldwide popularity.
