For the fourth time now, experts in tourism from various countries come to attend the ENTER conference in order to inform themselves and others about the current developments in the usage of information and communication technologies. The ENTER conference is thought as a platform for the exchange of ideas, experiences, opinions, and visions among scientists and practitioners. The visions presented at the last three ENTER conferences have triggered many requirements of important ongoing and planned projects in the application of communication and information technologies in tourism. The scope of the papers of this proceedings covers the most recent and relevant to topics in our area of interest. The sessions are primarily devoted to

intelligent agents and systems, the future role of global (reservation) systems, the new chances of data base applications due to the most recent technological developments. and above all the role of the Internet (and Intranet). I would like to express my cordial thanks to all institutions actively supporting this event, namely: • The Edinburgh & Lothian Tourist Board • The International Federation of Information Technology in Tourism (IFITT) Several people spent numerous hours organizing the scientific programme of EN TER. The names of most of them will appear in the following pages.

THE COMMERCIAL AND FINANCIAL CHRONICLE

Vintage

This novel unfolds over the course of a single day in Istanbul. This is the story of an American woman attempting to leave behind her life in Turkey--to leave without her husband. Catherine has been married for many years to Murat, an influential Turkish real estate developer, and they have a young son together, William. But when she decides to leave her marriage and return home to the U.S. with William and her photographer lover, Murat determines to take a stand. He enlists the help of an American diplomat to prevent his wife and child from leaving the country--but, by inviting this scrutiny into their private lives, Murat becomes only further enmeshed in a web of deception and corruption. As the hidden architecture of these relationships is gradually exposed, we learn the true nature of a cast of struggling artists, wealthy businessmen, expats and spies, a child pulled in different directions by his parents, and, ultimately, a society in crisis. Riveting and unforgettably perceptive, Red Dress

in Black and White is a novel of personal and political intrigue that casts light into the shadowy corners of a nation on the brink.

PROCEEDINGS

Samuel French, Inc.

Elephant tourism is a growing activity in many countries across Asia and Africa and is popular with tourists from all parts of the world. Elephant tourism has grown rapidly, providing the only viable way for elephants and their owners to survive since the banning of logging. Old logging camps have been developed into sanctuaries for some elephants, but many other camps were established as entertainment centres, resulting in serious welfare issues for the elephants and their mahouts. The profits from elephant tourism in Asia have encouraged African operators to follow a similar business model. This book draws attention to the need for a comprehensive and rigorous focus on local solutions to improve the welfare of captive elephants, their mahouts and local residents, and to enhance tourists' experiences of elephant tourism.

This classic study by the eminent Dutch historian of science E. J. Dijksterhuis (1892-1965) presents the work of the Greek mathematician and mechanical engineer to the modern reader. With meticulous scholarship, Dijksterhuis surveys the whole range of evidence on Archimedes' life and the 2000-year history of the manuscripts and editions of the text, and then undertakes a comprehensive examination of all the extant writings. Originally published in 1987. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The "Law & Anthropology Yearbook" brings together a collection of studies that discuss legal problems raised by cultural differences between people and the law to which they are subject. "Volume 8" contains a selection of edited papers presented at the VIth International Symposium of the Commission on Folk Law and Legal Pluralism, dealing with the topic of Indigenous Self-Determination and Legal Pluralism'.

RED DRESS IN BLACK AND WHITE

Child's World

This book constitutes the refereed proceedings of the 13th International Conference on Computer Aided Verification, CAV 2001, held in Paris, France in July 2001. The 33 revised full papers presented were carefully reviewed and selected from 106 regular paper submissions; also included are 13 reviewed tool presentations selected from 27 submissions. The book offers topical sections on model checking and theorem proving, automata techniques, verification core technology, BDD and decision trees, abstraction and refinement, combinations, infinite state systems, temporal logics and verification, microprocessor verification and cache coherence, SAT and applications, and timed automata.

Introduction to Complexity and Complex Systems The Stationery Office

The boundaries between simple and complicated, and complicated and complex system designations are fuzzy and debatable, even using quantitative measures of complexity. However, if you are a biomedical engineer, a biologist, physiologist, economist, politician, stock market speculator, or politician, you have encountered complex systems. Furthermore, your success depends on your ability to successfully interact with and manage a variety of complex systems. In order not to be blindsided by unexpected results, we need a systematic, comprehensive way of analyzing, modeling, and simulating complex systems to predict non-anticipated outcomes. In its engaging first chapters, the book introduces complex systems, Campbell's Law, and the Law of Unintended Consequences, and mathematics necessary for conversations in complex systems. Subsequent chapters illustrate concepts via commonly studied biological mechanisms. The final chapters focus on higher-level complexity problems, and introduce complexity in economic systems. Designed as a reference for biologists and biological engineers, *Introduction to Complexity and Complex Systems* lends itself to use in a classroom course to introduce advanced students studying biomedical engineering, biophysics, or physiology to complex systems. Engaging and illustrative, this book aids scientists and decision makers in managing biological complexity and complex systems.

On Behalf of the President: Presidential Spouses and White House Communications Strategy Today Springer Science & Business Media

Good surface access to airports is crucial. Where it works well, it can have significant positive impacts, both economically and

environmentally. Limited or poor surface access can constrain growth, adversely affect the passenger experience, and force passengers, employees and freight operators to choose modes of travel to and from airports that exacerbate environmental problems and congestion. In the last Parliament, the Transport Committee recommended that the Government should develop a coherent strategy to improve road and rail access to the UK's major airports, and stressed the need for greater connectivity between airports outside South East England. Our inquiry shows that Government has made little headway with this agenda. The absence of a decision on airport expansion in the South East is a major obstruction to progress, and without a master plan for the country, the regions cannot be expected to deliver effectively their own pieces of the jigsaw. Government must take a clear lead on integrated transport planning which will benefit airports and the country as a whole. The Government is working on a draft National Policy Statement on airports. While, for the Government, this is driven primarily by the need to deal with airport expansion in South East England, the NPS must help to clarify how planning decisions will be made in relation to surface access improvements. Decisions about new transport infrastructure need to be taken far enough in advance that their

implications can be taken into account in local development plans. Network Rail, Highways England and their counterparts across the rest of the UK should reflect these decisions in their long-term plans and funding commitments.

Indigenous Law Bulletin Oswaal Books and Learning Private Limited

An editorial team of highly skilled professionals at Arihant, works hand in glove to ensure that the students receive the best and accurate content through our books. From inception till the book comes out from print, the whole team comprising of authors, editors, proofreaders and various other involved in shaping the book put in their best efforts, knowledge and experience to produce the rigorous content the students receive. Keeping in mind the specific requirements of the students and various examinations, the carefully designed exam oriented and exam ready content comes out only after intensive research and analysis. The experts have adopted whole new style of presenting the content which is easily understandable, leaving behind the old traditional methods which once used to be the most effective. They have been developing the latest content & updates as per the needs and requirements of the students making our books a hallmark for quality and reliability for the past 15 years.
