As a developing country, Poland has the advantage of being able to study the successes and failures of more developed countries.

Similarly to many countries, our Polish development path is unique and needs to be documented, both for our own learning, but also to add to the learning of other developing countries. It is not sufficient for us to simply look to the west, since they were on their own unique and different paths. It is extremely important that we make sure that our national perspectives are included in the process of research. On the threshold of the 20th and 21st century, growing numbers of companies are implementing modern systems of cost accounting and one of them is activity-based costing. Due to interest in ABC, and its frequent use among practitioners, the book aim is to analyse the general development and diffusion of activity-based costing as well as its impact in Polish companies. To that end, the book covers: 1. Presentation of activity-based costing concept development as point of reference for further and detailed research in companies (chapter 1 and 2); 2. Analysis of ABC/ABM literature in Polish journals in the dimension of: volume, authorship, research method, focus, and content (chapter 3); 3. Analysis of ABC implementation through questionnaire research on the sample of 495 companies (chapter 4); 4. Examination) of activity-based costing implementation process, structure and use through a questionnaire of 33 ABC users and 4 case studies (chapter 4 and 5); 5. Analysis of the satisfaction and benefits ensuing from ABC through a survey of 28 ABC users, particularly analysis of the attitudes of preparers and users, and also the quality of ABC information (chapter 6). Additionally, the book presents a comparative analysis of the research [survey and case studies, including action research] with similar research conducted both in Poland and in the world.
