Natural Selection of Altruism The Making Of Fittest Natural This film describes natural selection and adaptation in populations of rock pocket mice living in the American Southwest. Mice living on light-colored sand tend to have light-colored coats, while mice living on patches of dark-colored rock have mostly dark-colored coats. The Making of the Fittest: Natural Selection and Adaptation Tony Allison first noticed a connection between malaria and the sickle cell trait while working in East Africa in the 1950s. The story of his discovery stands as one of the best understood examples of natural selection in humans in which the selective agent,

adaptive mutation, and molecule involved are all known. The Making of the Fittest: Natural Selection in Humans The Making of the Fittest: Natural Selection in Humans • His knowledge of the inheritance pattern of sickle cell disease was informed by the work of Dr. Neel , who mathematically established that sickle cell disease is autosomal recessive. • The knowledge of sickle cell disease began with Dr. Herrick’s diagnosis. 2. The making of the Fittest: Natural Selection and Adaptation ANSWER KEY - “THE MAKING OF THE FITNESS: NATURAL SELECTION AND ADAPTATION”. (Key Concept A) Define “mutation.”. A mutation is a change in

an organism's DNA sequence. Students may also mention that the change is random, but this is not necessary for a complete answer. 2. (Key Concepts A, B, and F)cpb-us-e1.wpmucdn.comThe Making of the Fittest: Natural Selection and Adaptation TEACHING TIPS • Fill a few plastic sandwich bags with 15 grams of paper clips and pass them around so that students have an idea of how much a rock pocket mouse weighs. • You may want to show the film more than once so students can take notes. Encourage them to write downThe Making of the Fittest: LESSON Natural Selection and ...The Making of the Fittest: Natural Selection in Humans SUGGESTED

AUDIENCE This lesson is appropriate for high school biology (all levels including AP and IB) and undergraduate introductory biology. PRIOR KNOWLEDGE Students should have prior knowledge of the basics of Mendelian genetics (genotype, phenotype, homozygous,The Making of the Fittest: LESSON Natural Selection in HumansThe Making of the Fittest: Natural Selection and Adaptation MOLECULAR GENETICS OF COLOR MUTATIONS IN ROCK POCKET MICE.
