"A rich history of a company whose cars, for better and worse, have touched millions of lives, a character study of a brilliant but deeply flawed leader, and a case study in how a corporate culture can turn toxic." —Bethany McLean, *New York Times* Book Review  
*Faster, Higher, Farther* chronicles a corporate scandal that rivals those at Enron and Lehman Brothers—one that will cost Volkswagen more than \$22 billion in fines and settlements. Through meticulous reporting, *New York Times* correspondent Jack Ewing documents why VW felt compelled to install "defeat devices" in diesel vehicles that unlawfully lowered CO2 levels during emissions testing, and how the fraud was committed, covered up, and finally detected. *Faster, Higher, Farther* is a briskly written account of unrivaled corporate greed. Updated with the latest information and a new afterword by the author.

Consumer Reports Books

*Carjacked* is an in-depth look at our obsession with cars. While the automobile's contribution to global warming and the effects of volatile gas prices are widely known, the problems we face every day because of our cars are much more widespread and yet much less known -- from the surprising \$14,000 per year that the average family pays each year for the vehicles it owns, to the increase in rates of obesity and asthma to which cars contribute, to the 40,000 deaths and 2.5 million crash injuries each and every year. *Carjacked* details the complex impact of the automobile on modern society and shows us how to develop a healthier, cheaper, and greener relationship with cars.

The traditional dominance of international markets by companies from the US, Western Europe and Japan can no longer be taken for granted. Emerging market economies, from the powerhouse Chinese economy (set to pass the US in national income by 2020) to dynamic players such as Mexico, South Africa and Indonesia, are rapidly changing the competitive landscape. Companies that can successfully enter these emerging markets may reap rewards and benefits from cost reductions and market opportunities. By understanding their positioning in the global continuum of companies and customers - the global value chain -

businesses can build their strategies for better competition, more effective resource allocation, cost reduction, and a heightened awareness of the risks and benefits. Packed with in-depth case studies of multinationals from both sides of emerging markets, including: Accenture, Walmart, Google, Nike, Novartis, PetroChina, Embraer, Tata Group and FEMSA; Emerging Markets is essential reading for anyone looking to understand the new competitive landscape and how they can maximise the business opportunities available. Online supporting resources include lecture slides that align with each chapter.

Reading Graphic Design in Cultural

Context explains key ways of understanding and interpreting the graphic designs we see all around us, in advertising, branding, packaging and fashion. It situates these designs in their cultural and social contexts. Drawing examples from a range of design genres, leading design historians Grace Lees-Maffei and Nicolas P. Maffei explain theories of semiotics, postmodernism and globalisation, and consider issues and debates within visual communication theory such as legibility, the relationship of word and image, gender and identity, and the impact of digital forms on design. Their discussion takes in well-known brands like Alessi, Nike, Unilever and Tate, and everyday designed things including slogan t-shirts, car advertising, ebooks, corporate logos, posters and music packaging.

**Road & Track** World Bank Publications  
This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers

in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

*Hoover's Masterlist of Major International Companies, 1998-1999* Motorbooks

A resource for anyone interested in international business, this fact-filled guide covers the top 1600 companies in dozens of countries around the world. Companies are indexed by both industry and country. It includes: non-US companies with sales greater than \$5 billion; companies with sales of \$500 million or more with ADRs trading on US exchanges plus nearly 200 others traded OTC; the companies comprising the major indexes from stock markets worldwide (FTSE 100, Nikkei 225, TSE 100, SBF 120 and others); and the top companies from key countries in Europe, Latin America, Africa, Asia and the Pacific Rim.

### **ADWEEK**

Im Jahr 2010 wurden weltweit rund 78 Mio. Kraftfahrzeuge produziert, die Gesamtproduktion von Kraftfahrzeugen in Deutschland belief sich auf fast 6 Mio. Einheiten. Damit beträgt der Anteil der Automobilindustrie am Gesamtumsatz der Industrie in Deutschland etwa 21%. Circa 750.000 Personen sind derzeit direkt in der Automobilbranche beschäftigt. Insgesamt betrachtet, hängen sogar rund 5,3 Mio. Arbeitsplätze in Deutschland in irgendeiner Form vom Automobil ab. Diese Zahlen belegen die wirtschaftliche Bedeutung der Automobilindustrie und damit wird klar, dass unternehmerische Fehlentscheidungen in diesem Industriezweig weitreichende Folgen haben können. Vor allem die Möglichkeit, die Flop-Risiken in der

Automobilindustrie sehr praxisnah untersuchen zu können, brachte mich zu der Wahl dieses Untersuchungsthemas. *F&S Index United States Annual*
