Rhetoric and Wonder in English Travel Writing, 1560-1613 U of Minnesota Press

A survey of the last 100 years of science fiction, with representative stories and illuminating essays by the top writers, poets, and scholars, from Edgar Rice Burroughs and Samuel Butler to Robert A. Heinlein and Jack Vance, from E.E. "Doc" Smith and Clifford D. Simak to Ted Chiang and Charles Stross-- and everyone in between. More than one million words of classic fiction and essays!

Models of Figurative Language Knopf Books for Young Readers

Wonder has an established link to the history and philosophy of science. However, there is little acknowledgement of the relationship between the visual arts and wonder. This book

presents a new perspective on this overlooked connection, allowing a unique insight into the role of wonder in contemporary visual practice. Artists, curators and art theorists give accounts of their approach to wonder through the use of materials, objects and ways of exhibiting. These accounts not only raise issues of a particular relevance to the way in which we encounter our reality today but ask to what extent artists utilize the function of wonder purposely in their work. Psychology Press

The present volume, which is the 5th in the Nigerian Linguists Festschrift Series, is devoted to Professor Munzali A. Jibril, a celebrated icon in university administration, and an erudite Professor of English Linguistics. The title of this special edition was specifically chosen to crown Professor Jibril's academic prowess in both English and indigenous Nigerian languages, and to mark and laud his official departure from active university lectureship. 72 assessed papers are included from the many submitted. Papers cover the main theme of the volume, i.e.

the interaction between English and indigenous Nigerian languages, and there are a number of papers on other secular areas of linguistics such as: language and history, language planning and policy, language documentation, language engineering, lexicography, translation, gender studies, language acquisition, language teaching and learning, pragmatics, discourse and conversational analysis, and literature in English and African languages. There is also a rich section devoted to the major traditional fields of linguistics - phonology, morphology, syntax and semantics.

WONDER IN CONTEMPORARY ARTISTIC PRACTICE

Streamline literacy learning with power-

packed children's books Pam Koutrakos shows how to streamline and integrate literacy instruction using a single children's text for a variety of purposes, weaving together different aspects of literacy from reading and writing to spelling and grammar. This user-friendly resource is packed with ready-to-go lessons and tools to create and teach using multitasking texts. Resources include Full lessons centered on high-quality, inclusive children's literature A DIY section to help teachers plan and teach lessons Dozens of student and classroom examples Printables available online to help with immediate implementation

THE FATE OF WONDER

Wildside Press LLC
Young children love to explore their world through drama—characters, dialogue, story arcs, and props are all standard elements of a child's play. It is no surprise then that professional theatre has long been regarded as a way to support children's social-emotional, cognitive, and creative development. Increasingly, there is an

international interest in theatre for very young audiences, and the Wall Street Journal reported on a "baby boom" in American theatre, with a marked upswing in the number of stage plays being written and produced for toddlers and preschoolers. Fueled by ongoing research into developmental psychology and theatre arts, the Children's Theatre Company (CTC) of Minneapolis presents in this book four of its newly commissioned plays for preschoolers. CTC is widely recognized as the leading theatre for young people and families in North America; it received the 2003 Tony award for regional theatre, and Time magazine rated it the number one children's theatre in the United States. These four plays encompass a broad range of styles and subjects: Bert and Ernie, *Goodnight!* is a musical about Bert and Ernie's unlikely but true friendship, written by Barry Kornhauser and based on the original songs and scripts from Sesame Street. The *Biggest Little House in the Forest* is a toy-theatre play about a group of diverse animals trying to share a very tiny home,

adapted by Rosanna Staffa from the book by Djemma Bider. *The Cat's Journey* is a dazzling shadow-puppet play with a little girl who rides on a friendly cat, written by Fabrizio Montecchi. And Victoria Stewart's *Mercy Watson to the Rescue!*, adapted from the Kate DiCamillo *Mercy Watson* series, is a comic romp featuring the inadvertent heroics of everyone's favorite porcine wonder. While these plays are as different as they could be, they all help young children to develop a moral compass and critical-thinking skills—while also showing them the power of the theatre to amaze, delight, and inspire.

Laughter, Pain, and Wonder Springer
Exploring travellers' tales of wonder in contemporary literature, this study challenges a sensibility of disenchantment with travel. It reassesses travel writing as an aesthetically and ethically innovative form in contemporary international literature, and demonstrates the crucial role of wonder in the travel narratives of writers such as Bruce Chatwin, V.S. Naipaul, and W.G. Sebald. Their 'travellers' tales of

wonder' are read as a challenge to the hubris of thinking the world too well known, and an invitation to encounter the world - including its most troubling histories - with a sense of wonder.

[The Centrality of Wonder in Teaching and Learning Across the Curriculum](#)

University of Delaware Press

During the early modern period, western Europe was transformed by the proliferation of new worlds—geographic worlds found in the voyages of discovery and conceptual and celestial worlds opened by natural philosophy, or science. The response to incredible overseas encounters and to the profound technological, religious, economic, and intellectual changes occurring in Europe was one of nearly overwhelming wonder, expressed in a rich variety of texts. In the need to manage this wonder, to harness this imaginative overabundance, Mary Baine Campbell finds both the sensational beauty of early scientific works and

the beginnings of the divergence of the sciences—particularly geography, astronomy, and anthropology—from the writing of fiction.

Campbell's learned and brilliantly perceptive new book analyzes a cross section of texts in which worlds were made and unmade; these texts include cosmographies, colonial reports, works of natural philosophy and natural history, fantastic voyages, exotic fictions, and confessions. Among the authors she discusses are André Thevet, Thomas Hariot, Francis Bacon, Galileo, Margaret Cavendish, and Aphra Behn. Campbell's emphasis is on developments in England and France, but she considers works in languages other than English or French which were well known in the polyglot book culture of the time. With over thirty well-chosen illustrations, *Wonder and Science* enhances our understanding of the culture of early modern Europe, the history of science, and the development of literary forms, including the novel and ethnography.

The Ecology of Wonder in Romantic and Postmodern Literature

Cornell University Press

A new way of understanding our place in the web of life from a scholar praised for his "graceful prose" (*Publishers Weekly*). The disconnection between humans and nature is perhaps one of the most fundamental problems faced by our species today. This schism is arguably the root cause of most of the environmental catastrophes unraveling around us. Until we come to terms with the depths of our alienation, we will continue to fail to understand that what happens to nature also happens to us. In *The Biology of Wonder* Andreas Weber proposes a new approach to the biological sciences that puts the human back in nature. He argues that feelings and emotions, far from being superfluous to the study of organisms, are the very foundation of life. From this basic premise flows the development of a "poetic ecology" which intimately connects our species to everything that surrounds us—showing that subjectivity and imagination are prerequisites of biological existence. Written by a leader in the emerging fields of biopoetics and

biosemiotics, *The Biology of Wonder* demonstrates that there is no separation between us and the world we inhabit, and in so doing it validates the essence of our deep experience. By reconciling science with meaning, expression, and emotion, this landmark work brings us to a crucial understanding of our place in the rich and diverse framework of life—a revolution for biology as groundbreaking as the theory of relativity for physics. “Grounded in science, yet eloquently narrated, this is a groundbreaking book. Weber’s visionary work provides new insight into human/nature interconnectedness and the dire consequences we face by remaining disconnected.” —Richard Louv, author of *Last Child in the Woods*

Thank You, M'am Corwin Press

In this utterly transporting debut about the power of words, the importance of friendship, and the magic of wonder, Curly Hines must decide whether to fight to save the mountain he calls home. Having lost most of his family to coal mining accidents as a little boy, Curly Hines lives with his grandfather

in the Appalachian Mountains of Wonder Gap, Kentucky. Ever since Curley can remember, Papaw has been giving him a word each week to learn and live. Papaw says words are Curley's way out of the holler, even though Curley has no intention of ever leaving. When a new coal boss takes over the local mining company, life as Curley knows it is turned upside down. Suddenly, his best friend, Jules, is interested in the coal boss's son, and worse, the mining company threatens to destroy Curley and Papaw's mountain. Now Curley faces a difficult choice. Does he use his words to speak out against Big Coal and save his mountain, or does he remain silent and save his way of life? From debut author Mary Knight comes a rich, lyrical, and utterly transporting tale about friendship, the power of words, and the difficult hurdles we must overcome for the people and places we love. Praise for *Saving Wonder* : "Knight delivers a strong environmental message and a language lesson in her debut novel... Readers will feel Curley's sorrow and cheer him on during his campaign to save what he loves most.

Knight frankly addresses the reality of harsh changes, but Curley's spirit, moving people inside and outside the community to act, is inspirational." -- Publishers Weekly
Mentor Texts That Multitask [Grades K-8] Routledge
"First published in 1984 as *The science fiction of Mark Twain* by Archon Books ... North Haven, CT"--T.p. verso.
Time, Doubt and Wonder in the Humanities Routledge
The essays in this groundbreaking collection stage conversations between the thought of the controversial feminist philosopher, linguist and psychoanalyst Luce Irigaray and premodern writers, ranging from Empedocles and Homer, to Shakespeare, Spenser and Donne. They explore both the pre-Enlightenment roots of Luce Irigaray's thought, and the impact that her writings have had on our understanding of ancient, medieval and Renaissance culture. Luce Irigaray has been a major figure in Anglo-American literary theory, philosophy and gender studies ever since her germinal works, *Speculum of the Other Woman* and *This Sex*

Which Is Not One, were published in English translation in 1985. This collection is the first sustained examination of Irigaray's crucial relationship to premodern discourses underpinning Western culture, and of the transformative effect she has had on scholars working in pre-Enlightenment periods. Like Irigaray herself, the essays work at the intersections of gender, theory, historicism and language. This collection offers powerful ways of understanding premodern texts through Irigaray's theories that allow us to imagine our past and present relationship to economics, science, psychoanalysis, gender, ethics and social communities in new ways.

John Marston's The Wonder of Women or The Tragedy of Sophonisba
Xist Publishing

Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua

Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*.

Wittgenstein's Critique of Metaphysics and Modernity
Springer

Kevin M. Cahill reclaims one of Ludwig Wittgenstein's most passionately pursued endeavors: to reawaken a sense of wonder around human life and language and its mysterious place in the world. Following the philosopher's spiritual and cultural criticism and tying it more tightly to the overall evolution of his thought, Cahill frames an original interpretation of Wittgenstein's engagement with Western metaphysics and modernity, better contextualizing the force of his work. Cahill synthesizes several approaches to Wittgenstein's life and thought. He stresses the nontheoretical aspirations of the philosopher's early and later writings, combining key elements from the so-called resolute readings of the

Tractatus with the "therapeutic" readings of Philosophical Investigations. Cahill shows how continuity in Wittgenstein's cultural and spiritual concerns informed if not guided his work between these texts, and in his reading of the *Tractatus*, Cahill identifies surprising affinities with Martin Heidegger's *Being and Time*—a text rarely associated with Wittgenstein's early formulations. In his effort to recapture wonder, Wittgenstein both avoided and undermined traditional philosophy's reliance on theory. As Cahill relates the steps of this bold endeavor, he forms his own innovative, analytical methods, joining historicist and contextualist approaches to text-based, immanent readings. The result is an original, sustained examination of Wittgenstein's thought.

ECOLOGY, ETHICS, ENCHANTMENT

Cornell University Press

Gathers decades of research on figurative language cognition to answer the question, 'Why don't people just say what they mean?'

The Biology of Wonder
Walter de Gruyter GmbH & Co KG

This work's chief aim is to restore to readers, performers, and audiences the richness and vitality of Shakespeare's comedies. Richman explores the way in which a reader's relations to Shakespeare's literary texts differ from those of the relations between performers of Shakespeare's works and their audiences. Richman also examines the forms of humor and empathy that Shakespeare's comedies elicit.

Between the Tick and the Tock Child's World
Originally published in 1980, this is a book about the psychology of figurative language. It is however, eclectic and therefore should be of interest to professionals and students in education, linguistics, philosophy, sociolinguistics, and other concerned with meaning and cognition. The editors felt there was a pressing need to bring together the

growing empirical efforts of this topic. In a sense, recognition of the theoretical importance of figurative language symbolized the transition from the psycholinguistics of the 1960s to that of the late 1970s, that is from a linguistic semantics to a more comprehensive psychological semantics with a healthy respect for context, inference, world knowledge, and above all creative imagination. The organization of the volume reflects the more basic, general concerns with cognition – from historical and philosophical background, through problems of mental representation and semantic theory, to developmental trends, and to applications in problem solving.

CONVERGENCE: ENGLISH AND NIGERIAN LANGUAGES

Wesleyan University Press
Wonder and wonders constituted a central theme in ancient Greek

culture. In this book, Jessica Lightfoot provides the first full-length examination of its significance from Homer to the Hellenistic period. She demonstrates that wonder was an important term of aesthetic response and occupied a central position in concepts of what philosophy and literature are and do. She also argues that it became a means of expressing the manner in which the realms of the human and the divine interrelate with one another; and that it was central to the articulation of the ways in which the relationships between self and other, near and far, and familiar and unfamiliar were conceived. The book provides a much-needed starting point for re-assessments of the impact of wonder as a literary critical and cultural concept both in antiquity and in later periods.
