Name:Combining like
terms calculator -
AlgebratorA regression
model is a linear one
when the model
comprises a linear
combination of the
parameters, i.e., $(.) = \sum$

$= (.)$, where the function
is a function of ..

Letting $= (.)$, we can
then see that in that
case the least square
estimate (or estimator,
in the context of a
random sample), is
given by $\hat{=} -$. For a
derivation of this
estimate see Linear
least squares
(mathematics).Least
