MULTIPLE CHOICE QUESTIONS IN HOSPITAL PHARMACY

Pharmaceutical Press

This user-friendly text, written in a clear and friendly manner by leading experts in the field, is intended primarily for undergraduate athletic training students. It encourages students to understand both the how and the why of therapeutic modality use so readers become thinking, decision-making professionals. It provides the knowledge needed to evaluate and select the most appropriate modality. All major modalities used to treat orthopedic injury and pain are covered, from electrotherapy to therapeutic heat and cold to therapeutic massage.

2400 MULTIPLE CHOICE QUESTIONS

Oxford University Press, USA

This second edition provides 2400 multiple choice questions on human anatomy and physiology, and some physical science, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses and as such reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.

A hand book on Postgraduate Entrance Examination in Physiotherapy is designed to meet the needs of undergraduate, graduate, post graduate and Postdoctoral Physiotherapy students preparing for their internal, preliminary, terminal, university and competitive entrance exams etc. Historically, E.L. Thorndike developed an early multiple choice test but Frederick J. Kelly was the first to use such items as part of a large scale assessment in 1915. Since then, it has become one of the popular formats of educational testing. Assessment is a critical component of instruction; if it is used properly then it can aid in accomplishing key curricular goals. Multiple choice questions or multiple choice format of question or the one best answer question has become one of widely used, well-established, reliable method of assessing knowledge for various Physiotherapy examinations conducted in Physiotherapy core subjects. Like other methods of assessment, they have their own strengths and weaknesses.
