households based on household category, income and location. The hypothesis is that propensities for purchase by female head households will be impacted by such

#### **Female Headed Households And Homeownership**

In 2013-17, 13% of households were headed by females, unchanged from 2000 and the same as the national rate. This makes Arkansas 35th in the nation on this indicator, including the 50 states and Washington, D.C. The rate was higher for black or African American households at 28%, though that was a decline from 32% in 2000.

The home-ownership rate in the United States is percentage of homes that are owned by their occupants. In 2009, it remained similar to that in some other post-industrial nations with 67.4% of all occupied housing units being occupied by the unit's owner. Home ownership rates vary depending on demographic characteristics of households such as ethnicity, race, type of household as well as ...
