BrazeTec S 15 is a phosphorous-containing brazing alloy with excellent flow characteristics. The brazing alloy is suitable for joining copper to copper or copper-based materials. Technical Data Sheet BrazeTec S 15 - saxonia-tm.de Download Data Sheet (.PDF) "Stresses (compressive, tensile, or shear) due to unequal temperature distribution and non-uniform temperature gradients, cause more failures in high-temperature equipment than all other influences combined amounting to approximately 90% of the total number of cases. Thermal Expansion - Rolled Alloys, Inc. Licensing data collected through October 6, 2020 and: Final Census data compiled through August 2020 : Data listed in order of descending volume imported during last THREE months of census data, including preliminary data : Steel mill categories are defined by 10-digit HTS codes: Data extracted from the import licenses are not official Census data From CANADA Washington Alloy Company has been providing distributors with the highest quality welding consumables, filler metals and accessories for more than 30 years. Offering outstanding customer service, a wide range of products, attractive packaging, and excellent pricing - we are focused on fast, efficient delivery of filler metals and accessories our distributors rely upon. Washington Alloy Company | Welding Products, Wires ... Introducing new alloy data for HAYNES® HR-224® alloy. HAYNES® HR-224® alloy is a new alloy with excellent oxidation resistance and improved fabricability and weldability. Potential uses include applications in heat recuperators, automotive catalytic converters and heat shields, strand annealing furnace tubulars, and other severely oxidizing environments. Home [www.haynesintl.com] Technical Data Sheet ATI 15-5™ The oxidation resistance of the ATI 15-5™ alloy is superior to that of 12 percent chromium alloys like Type 410, but slightly inferior to that of Type 430. Precipitation hardening can produce surface oxidation. WELDABILITY Technical Data Sheet Several other alloy manufacturers entered the alloy 800H (UNS N08810) market and additional creep and rupture data became available. The Metals Property Council for ASME gathered this data and made a new analysis using parametric procedures, involving 87 heats and 1,052 data points. The additional data,

from other manufacturers, included results alloy 800 - Special Metals Corporation TIMETAL 15-3 is a production alloy that is currently used for critical applications on air and space vehicles. TIMETAL 15-3 is usually acceptable for use at temperatures up to 550°F (288°C). Strip is available in gauges from 0.016 in (0.4mm) to 0.094 in (2.4mm). At thinner gauges, TIMETAL 15-3 is less expensive than TIMETAL® 6-4. Ti-15V-3Cr ...
