 This manual provides corporations and their suppliers with a deeper understanding of the barriers and challenges preventing women-owned businesses from accessing and fully participating in local and global value chains. It provides the tools and techniques for reducing or eliminating these barriers and for leveraging the vast untapped economic potential represented by women-owned businesses. For many women, entrepreneurship offers a path to economic empowerment and it is incumbent upon corporations to help create conditions that permit this.

From Ken Burns's documentaries to historical dramas such as

Roots, from A&E's Biography series to CNN, television has become the primary source for historical information for tens of millions of Americans today. Why has television become such a respected authority? What falsehoods enter our collective memory as truths? How is one to know what is real and what is imagined—or ignored—by producers, directors, or writers? Gary Edgerton and Peter Rollins have collected a group of essays that answer these and many other questions. The contributors examine the full spectrum of historical genres, but also institutions such as the History Channel and production histories of such series as The Jack Benny Show, which ran for fifteen years. The authors explore the tensions between popular history and professional history, and the tendency of some academics to declare the past "off limits" to nonscholars. Several of them point to the tendency for television histories to embed current concerns and priorities within the past, as in such popular shows as Quantum Leap and Dr. Quinn, Medicine Woman. The result is an insightful portrayal of the power television possesses to influence our culture.

Congress passed the Indian Removal Act in 1830 with the intent of moving five large tribes to Indian Territory. The tribes could either move to the reservations or assimilate. As settlers kept moving west, more and more tribes were encountered, and all ultimately found themselves going to reservations. This new way of life was a vast change for the Indians.

This book proposes a revisionist approach to democratic politics. Yaron Ezrahi focuses on the creative unconscious collective imagination that generates ever-changing visions of legitimate power and authority, which compete for enactment and institutionalization in the political arena. If, in the past, political authority was grounded in fictions such as the divine right of kings, the laws of nature, historical determinism and scientism, today the space of democratic politics is filled with multiple alternative social imaginaries of the desirable political order. Exposure to electronic mass media has made contemporary democratic publics more aware that credible popular fictions have greater impact on shaping our political realities than do rational social choices or moral arguments. The pressing political question in contemporary democracy is, therefore, how to select and enact political fictions that promote peace and how to found

the political order on checks and balances between alternative political imaginaries of freedom and justice.
