"A book by one of the 21st century's exciting spiritual thinkers, Lewis Green. Discover the joy and freedom of a life never lived before and expands on these powerful ideas to show how surpassing our ego-based state of consciousness is not only essential to our own happiness, but also the answer to ending conflicts and sufferings throughout the world. Lewis also describes how: Being too attached to the ego creates the dysfunction that leads to anger, jealousy, and unhappiness. Readers awaken to a new state of consciousness and follow the path to a truly fulfilling existence. Spirituality helps to further unleash our life's purpose. This book has inspired and changed tens of millions of lives ... more than any modern book."

Start With Why has led millions of readers to rethink everything

they do – in their personal lives, their careers and their organizations. Now Find Your Why picks up where Start With Why left off. It shows you how to apply Simon Sinek’s powerful insights so that you can find more inspiration at work -- and in turn inspire those around you. I believe fulfillment is a right and not a privilege. We are all entitled to wake up in the morning inspired to go to work, feel safe when we’re there and return home fulfilled at the end of the day. Achieving that fulfillment starts with understanding exactly WHY we do what we do. As Start With Why has spread around the world, countless readers have asked me the same question: How can I apply Start With Why to my career, team, company or nonprofit? Along with two of my colleagues, Peter Docker and David Mead, I created this hands-on, step-by-step guide to help you find your WHY. With detailed exercises, illustrations, and action steps for every stage of the process, Find Your Why can help you address many important concerns, including: * What if my WHY sounds just like my competitor’s? * Can I have more than one WHY? * If my work doesn’t match my WHY, what should I do? * What if my team can’t agree on our WHY? Whether you’ve just started your first job, are leading a team, or are CEO of your own company, the exercises in this book will help guide you on a path to long-term success and fulfillment, for both you and your colleagues. Thank you for joining us as we work together to build a world in which more people start with WHY. Inspire on! -- Simon

A New York Times Bestseller What makes for a happy life, a fulfilling life? A good life? In their “captivating” (The Wall Street Journal) book, the directors of the Harvard Study of Adult Development, the longest scientific study of happiness ever conducted, show that the answer to these questions may be closer than you realize. What makes a life fulfilling and meaningful? The simple but surprising answer is: relationships. The stronger our relationships, the more likely we are to live happy, satisfying, and healthier lives. In fact, the Harvard Study of Adult Development reveals that the strength of our connections with others can predict the health of both our bodies and our brains as we go through life. The invaluable insights in this book emerge from the revealing personal stories of hundreds of participants in the Harvard Study as they were followed year after year for their entire adult lives, and this wisdom was bolstered by research findings from many other studies. Relationships in all their forms—friendships, romantic partnerships, families, coworkers, tennis partners, book club members, Bible study groups—all contribute to a happier, healthier life. And as *The Good Life* shows us, it’s never too late to strengthen the relationships you already have, and never too late to build new ones. *The Good Life* provides examples of how to do this. Dr. Waldinger’s TED Talk about the Harvard Study, “What Makes a Good Life,” has been viewed more than 42 million

times and is one of the ten most-watched TED talks ever. *The Good Life* has been praised by bestselling authors Jay Shetty “an empowering quest towards our greatest need: meaningful human connection”), Angela Duckworth (“In a crowded field of life advice...Schulz and Waldinger stand apart”), and happiness expert Laurie Santos (“Waldinger and Schulz are world experts on the counterintuitive things that make life meaningful”). With “insightful [and] interesting” (Daniel Gilbert, New York Times bestselling author of *Stumbling on Happiness*) life stories, *The Good Life* shows us how we can make our lives happier and more meaningful through our connections to others.

Nearly all large American cities rely on zoning to regulate land use. According to Donald L. Elliott, however, zoning often discourages the very development that bigger cities need and want. In fact, Elliott thinks that zoning has become so complex that it is often dysfunctional and in desperate need of an overhaul. *A Better Way to Zone* explains precisely what has gone wrong and how it can be fixed. *A Better Way to Zone* explores the constitutional and legal framework of zoning, its evolution over the course of the twentieth century, the reasons behind major reform efforts of the past, and the adverse impacts of most current city zoning systems. To unravel what has gone wrong, Elliott identifies several assumptions behind early zoning that no longer hold true, four new land use drivers that have emerged since zoning began, and basic elements of good urban governance that are violated by prevailing forms of zoning. With insight and clarity, Elliott then identifies ten sound principles for change that would avoid these mistakes, produce more livable cities, and make zoning simpler to understand and use. He also proposes five practical steps to get started on the road to zoning reform. While recent discussion of zoning has focused on how cities should look, *A Better Way to Zone* does not follow that trend. Although New Urbanist tools, form-based zoning, and the SmartCode are making headlines both within and outside the planning profession, Elliott believes that each has limitations as a general approach to big city zoning. While all three trends include innovations that the profession badly needs, they are sometimes misapplied to situations where they do not work well. In contrast, *A Better Way to Zone* provides a vision of the future of zoning that is not tied to a particular picture of how cities should look, but is instead based on how cities should operate.

The Monocle Guide to Better Living National Geographic Books

The basis for the wonderfully funny and moving TV series developed by Amy Poehler and Scout Productions A charming, practical, and unsentimental approach to putting a home in order while reflecting on the tiny joys that make up a long life. In Sweden there is a kind of decluttering called *döstädning*, *dö* meaning "death" and *städning* meaning "cleaning." This surprising and invigorating process of clearing out unnecessary belongings can be undertaken at any age or life stage but should be done sooner than later, before others have to do it for you. In *The Gentle Art of Swedish Death Cleaning*, artist Margareta Magnusson, with Scandinavian humor and wisdom, instructs readers to embrace minimalism. Her radical and joyous method for putting things in order helps families broach sensitive conversations, and makes the process uplifting rather than overwhelming. Margareta suggests which possessions you can easily get rid of (unworn clothes, unwanted presents, more plates than you'd ever use) and which you might want to keep (photographs, love letters, a few of your children's art projects). Digging into her late husband's tool shed, and her own secret drawer of vices, Margareta introduces an element of fun to a potentially daunting task. Along the way readers get a glimpse into her life in Sweden, and also become more comfortable with the idea of letting go.

SIN MAKES YOU STUPID

S Scott Jr

Most of us want to make a difference. We donate our time and money to charities and causes we deem worthy, choose careers we consider meaningful, and patronize businesses and buy products we believe make the world a better place. Unfortunately, we often base these decisions on assumptions and emotions rather than facts. As a result, even our best intentions often lead to ineffective—and sometimes downright harmful—outcomes. How can we do better? While a researcher at Oxford, trying to figure out which career would allow him to have the greatest impact, William MacAskill confronted this problem head on. He discovered that much of the potential for change was being squandered by lack of information, bad data, and our own prejudice. As an antidote, he and his colleagues developed effective altruism, a practical, data-driven approach that allows

each of us to make a tremendous difference regardless of our resources. Effective altruists believe that it's not enough to simply do good; we must do good better. At the core of this philosophy are five key questions that help guide our altruistic decisions: How many people benefit, and by how much? Is this the most effective thing I can do? Is this area neglected? What would have happened otherwise? What are the chances of success, and how good would success be? By applying these questions to real-life scenarios, MacAskill shows how many of our assumptions about doing good are misguided. For instance, he argues one can potentially save more lives by becoming a plastic surgeon rather than a heart surgeon; measuring overhead costs is an inaccurate gauge of a charity's effectiveness; and, it generally doesn't make sense for individuals to donate to disaster relief. MacAskill urges us to think differently, set aside biases, and use evidence and careful reasoning rather than act on impulse. When we do this—when we apply the head and the heart to each of our altruistic endeavors—we find that each of us has the power to do an astonishing amount of good.
