In order to become a stockbroker and sell securities, you must first pass the Series 7 exam—a 6-hour, 250-question monstrosity. Unlike many standardized tests, the Series 7 exam is harder than it seems, and people who score below 70% must retake the test, having to wait at least a month before retaking it and paying hefty registration fees. Luckily, there's Series 7 Exam For Dummies—the perfect guide that not only shows you how to think like a financial advisor but also like the test designers. Rather than an all-encompassing, comprehensive textbook, this guide covers only what's on the test, offering formulas, tips, and basic info you need to study. It empowers you with the ability to think each problem through and get to the bottom of what's being asked, providing you with everything you need and want to know about: Distribution of profits Types of securities offerings Investing in all types of stock Bond types, prices, yields, and risks Handling margin accounts Characteristics of different investment companies Direct Participation Programs and other types of partnerships Option selling, buying, and trading Security analysis and security markets Packed with

valuable information and know-how, this no-nonsense guide provides a full-length practice exam with answers and explanations. A bonus CD with another simulated practice test is also included. Whether you're preparing to take the test for the first time or the fourth time, Series 7 For Dummies is the book for you! Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

It has been estimated that one-half of all people taking the Series 7 exam will sit for the test a second time. Taking and passing the Series 7 exam gives you the necessary qualifications to make trades with corporate securities, commodities, and futures. Some people say that this exam is the hardest one they have ever taken. To ensure that this is not the case for you, be sure to read 101 Ways to Score Higher on Your Series 7 Exam. In this newly revised book, you will learn about and understand the organization of the exam and the computerized format. You will learn how to read questions correctly, how to control your anxiety, and how to approach each section. In addition, you will be presented with a list of resources to help you prepare and dozens of proven strategies, mindsets, and problem solving methods. This newly revised, second edition of 101 Ways to Score Higher on Your Series 7 Exam is filled with information about stocks, markets, government securities, municipal and corporate bonds, options, indexes, mutual funds, interest funds, interest rates, mortgages, margin accounts, insider trading, short selling, and dividends, which are addressed on the exam. You will also find reviews, practice questions, and tips on avoiding common mistakes. Instead of panicking and worrying about the Series 7, pick up this book and be confident in your test-taking abilities. Whether you are taking the test for the first time or sitting for the second time, you will learn valuable information and practical tips for passing the exam on the first try and improving your score.

*The Uniform Investment Advisor Law Examination* CourseTree Learning

Benjamin Graham referred to it as his "margin of safety." Seth Klarman favors it over all other investment methods. Warren Buffett uses it to make millions for his investors. It's called value investing, and you can make it work wonders for your portfolio. All you need is money to invest, a little patience—and this book. Strategic Value Investing reveals everything you need to know to build a world-class portfolio using value investing as your north star. Written by experts on valuation and financial analysis, this comprehensive guide breaks it all down into an easy-to-implement process. The authors explain the ins and outs of determining when a stock is undervalued, then purchasing it and selling it for a profit when the rest of the world learns what you knew all along. With Strategic Value Investing, you'll learn how to: Distinguish between the various measures of value, including going concern, replacement value, fair market value, book value, and intrinsic value Identify undervalued companies before everyone else, and know what to look for, what to avoid, when to buy, and when to sell The authors teach you how to establish a dispassionate value investing philosophy tailored to your needs. Equally important, they provide the tools you need to adhere to this often contrarian approach regardless of your emotions or crowd sentiment. Get in before the crowd—and get out when the price is right with Strategic Value Investing. Praise for Strategic Value Investing "A book that has much the same character as a good value investor: calm, disciplined, with a grasp both of broad theory and of how to apply it." —JOHN AUTHERS, senior investment columnist, Financial Times "This comprehensive look at valuation techniques is not only insightful, but can be easily put to use by individual and professional investors alike." —CHARLES ROTBLUT, CFA, Vice President, the American Association of Individual Investors "Offers a sound fundamental perspective for those looking to deepen their analysis around stocks. A great resource for all types of value investors." —HEATHER BRILLIANT, CFA, global head of equity research at Morningstar and member of the CFA Institute Board of Governors "This book is of Real Value! It updates the pioneering work of Ben Graham and Phillip Fisher, blending the valuation techniques of the masters (such as Warren Buffett) and provides institutional and individual investors the A to Z of value investing from a practitioner perspective." —JOHN MAGINN, CFA, EVP & CIO, Mutual of Omaha (retired) and coeditor of Managing Investment Portfolios "An actionable road map for implementing a disciplined value investing strategy. Very much in the Ben Graham style. The sophisticated individual investor will find this comprehensive digest a continual and timeless reference." —WALLACE FORBES, CFA, President of Forbes Investors Advisory Institute, Division of Forbes magazine "Many books propose to help you learn how to become a better value investor. This one, which is bound to become a staple of every value investor's library, delivers on its promise." —ROBERT POWELL, editor of Retirement Weekly and columnist of "MarketWatch"

*Asset Pricing* Cengage Learning

Winner of the prestigious Paul A. Samuelson Award for scholarly writing on lifelong financial security, John Cochrane's Asset Pricing now appears in a revised edition that unifies and brings the science of asset pricing up to date for advanced students and professionals. Cochrane traces the pricing of all assets back to a single idea—price equals expected discounted payoff—that captures the macro-economic risks underlying each security's value. By using a single, stochastic discount factor rather than a separate set of tricks for each asset class, Cochrane builds a unified account of modern asset pricing. He presents applications to stocks, bonds, and options. Each model—consumption based, CAPM, multifactor, term structure, and option pricing—is derived as a different specification of the discounted factor. The discount factor framework also leads to a state-space geometry for mean-variance frontiers and asset pricing models. It puts payoffs in different states of nature on the axes rather than mean and variance of return, leading to a new and conveniently linear geometrical representation of asset pricing ideas. Cochrane approaches empirical work with the Generalized Method

of Moments, which studies sample average prices and discounted payoffs to determine whether price does equal expected discounted payoff. He translates between the discount factor, GMM, and state-space language and the beta, mean-variance, and regression language common in empirical work and earlier theory. The book also includes a review of recent empirical work on return predictability, value and other puzzles in the cross section, and equity premium puzzles and their resolution. Written to be a summary for academics and professionals as well as a textbook, this book condenses and advances recent scholarship in financial economics.

When business models collide with the real world, it's often necessary to make rapid and decisive changes. Entrepreneurs call this pivoting - and it is not easy. Now, learn how to leverage design and learning skills to prepare for pivots, manage them effectively, and integrate them into a complete innovation framework that works! Business Model Execution - Navigating with the Pivot is part of Philadelphia University's breakthrough approach to innovation: one that links business, design and engineering, and delivers extraordinary results in both new and existing ventures. First, Dr. Stephen Spinelli and Heather McGowan introduce this "Disrupt Together" approach, explain its deep roots in design thinking, and show how it generates far more high-value ideas for innovation. Next, David Charron drills down to focus specifically on the pivot. Charron covers pivoting at both key phases of the innovation process: the early search phase (before you've already made massive investments in your innovation or business model) and the execution phase (while these investments are already underway). You'll systematically review why pivots often fail - and how to overcome the obstacles that cause them to fail. Business Model Execution - Navigating with the Pivot is one of 15 e-chapters addressing all facets of innovation, from design processes and team development to business models and value delivery. Each is crafted by a pioneering business innovator - and they all integrate into today's most coherent, realistic blueprint for innovation. For all entrepreneurs, executives, managers, strategists, and students who want to drive more value from innovation. David Charron, Senior Fellow and Lecturer in Entrepreneurship at the Haas School of Business, teaches in

its MBA, EW MBA, and executive programs. Berkeley's NSF ICorps faculty lead, he has served as Executive Director of the Lester Center for Entrepreneurship and Innovation and of the Berkeley Innovative Leader Development initiative. An entrepreneur, investor, mentor, and consultant in Silicon Valley, he has spent 25 years focusing on technology commercialization and entrepreneurship with Stanford, MIT, Xerox PARC, and others. He holds a B.S. in Mechanical Engineering from Stanford and an MBA from Berkeley.
