The volume deals with the relationship between dialogue and rhetoric. The actual state of the art in dialogue analysis is characterized by a tendency to overcome the distinction between competence and performance and to combine components from both sides of the dichotomy, in a way which includes rules as well as inferences. The same is true of rhetoric: the guidelines proposed here no longer state that rationality and persuasion are mutually exclusive but suggest that they interact in what might be called the 'mixed game'. The concept of a dialogic rhetoric thus poses the question of how to integrate the different voices. Part I of the volume assembles several 'rhetorical paradigms' which are applied to real-life performance. Part II on 'rhetoric in the mixed game' contains a selection of papers which illustrate the interaction of various components. The Round Table

discussion in Part III brings proponents of different paradigms face to face with each other and shows how they justify their own positions and present arguments against rival paradigms.

This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary.

Under Development: Gender John Benjamins Publishing
When originally published in 1994 this volume was the first international review of accounting theory to focus on the contributions of its leading thinkers. Very few attempts had been made, in the accounting literature, to assess the contribution of the theorists who have had such an important influence on the direction of research and practice. Written by experts the studies in this volume provide a unique guide to the development of accounting theory and practice in regions as diverse as the USA, Japan and Europe.

Practical methods for healing after the loss of a member of the military When a loved one is killed in the line of duty, this book affirms that survivors' grief is shaped by the unique circumstances of the death. Because military deaths are almost always sudden and violent, the traumatic nature of the loss creates a two-part grief—one focused on the manner in which the person died, the other focused on the long-term repercussions of life without this special person. This guide acknowledges the unique mixture of sadness, pride, anger, and blame that often characterizes grief after a military death, including in the event of a military suicide, and offers ideas for constructively expressing thoughts and feelings. Anyone whose life has been touched by a military death will find compassionate understanding and healing guidance in the pages of this handbook.

TWENTIETH CENTURY ACCOUNTING THINKERS (RLE ACCOUNTING)

Companion Press

Governments have traditionally left the plight of street children and working children, who by some counts number over 100 million, to individuals and nongovernmental organizations, including many religious organizations. As a result, there are a

multitude of small, uncoordinated, but highly effective projects throughout the world concentrated in urban areas. The 18 case studies presented illustrate the work carried out by these organizations and demonstrate how rehabilitation can be conducted working with and for children. Part 1, "Reinsertion through Education," looks at seven projects characterized by efforts to ensure the reinsertion of street and working children into their families or mainframe society through education. The four projects in part 2 rely on work rather than education in their efforts. Part 3 describes three projects that concentrate on improving the situation of children by teaching them to use the street environment and by capitalizing on their experiences and practical intelligence. Part 4 concentrates on the administration of projects for street children. The case studies are presented without commentary to form a collection of results and ideas to stimulate imagination and interest, particularly among those responsible for government policies. Valid solutions will come only from strong governmental commitment. (SLD)

Despite various decades of research and claim-making by feminist scholars and movements, gender remains an overlooked area in development studies. Looking at key issues in development studies through the prisms of gender and feminism, the authors demonstrate that gender is an indispensable tool for social change.

Comptabilité générale SYSCOHADA révisé et audit fiscal Tome 1 (2ème édition janvier 2022) McGraw-Hill/Irwin

This title was first published in 2002: This monograph sets out to model a macroeconomy that is inherently unstable because of qualitative - or Keynesian - uncertainty. By modelling a macroeconomic theory, this approach to fixed or sticky prices also investigates the link between uncertainty, sticky prices, and macro-stability - by suggesting that such prices improve economic activity rather than impeding it.

In early research work on international communication, the countries of North Africa and the Middle East were seen as part of the "Third World", and the media had to be at the service of development. However, this situation is changing due to the transnationalization and liberalization of the media. Indeed, since the 1990s, the entry of the South - and Arab countries in this case - into the "information society" has become the dominant creed, although the vision is still globalizing and marked by stereotypes. Representations of these societies are closely associated with international relations and geopolitics, characterized by tensions and conflicts. However, a force has come to disrupt the traditional rules of the game: Arab audiences. Digital media, the dissemination of which has been enabled by the implementation of the "information society", empowers them to participate fully in a media confluence. This liberation from the

discourse has two major consequences: the media and journalism sector has become more strategic than ever, and action toward development must be reinvented.

Genetic-based animal biotechnology has produced new food and pharmaceutical products and promises many more advances to benefit humankind. These exciting prospects are accompanied by considerable unease, however, about matters such as safety and ethics. This book identifies science-based and policy-related concerns about animal biotechnology—key issues that must be resolved before the new breakthroughs can reach their potential.

The book includes a short history of the field and provides understandable definitions of terms like cloning. Looking at technologies on the near horizon, the authors discuss what we know and what we fear about their effects—the inadvertent release of dangerous microorganisms, the safety of products derived from biotechnology, the impact of genetically engineered animals on their environment. In addition to these concerns, the book explores animal welfare concerns, and our societal and institutional capacity to manage and regulate the technology and its products. This accessible volume will be important to everyone interested in the implications of the use of animal biotechnology.

Glosario Del Banco Mundial Springer Science & Business Media

This book represents a first considered attempt to study the factors that conditioned industrial chemistry for war in 1914-18. Taking a comparative perspective, it reflects on the experience of France, Germany, Austria, Russia, Britain, Italy and Russia, and points to significant similarities and differences. It looks at changing patterns in the organisation of industry, and at the emerging symbiosis between science, industry and the military.

author concludes that until there is significant change in how women are perceived in relation to domestic duties, it is unlikely that they will attain equality within the legal profession.

The kinds of ideas, technologies, identification of genes, even manipulations of life forms that can be owned and exploited for profit by giant corporations is a vital issue for our times. The author argues that this Western-inspired, unprecedented widening of intellectual property concepts does not in fact stimulate human creativity and the generation of knowledge. Instead, it is being exploited by transnational corporations to increase their profits at the expense of the health of ordinary people and of the age-old knowledge and independence of the world's farmers. Intellectual protection is being transformed into corporate plunder. Little wonder popular feeling runs so high against the WTO that polices this new intellectual order, and the
