The crisis in Ukraine and its implications for both the Crimean peninsula and Russia's relations with the West. The current conflict in Ukraine has spawned the most serious crisis between Russia and the West since the end of the Cold War. It has undermined European security, raised questions about NATO's future, and put an end to one of the most ambitious projects of U.S. foreign policy—building a partnership with Russia. It also threatens to undermine U.S. diplomatic efforts on issues ranging from terrorism to nuclear proliferation. And in the absence of direct negotiations, each side is betting that political and economic pressure will force the other to blink first. Caught in this dangerous game of chicken, the West cannot afford to lose sight of the importance of stable relations with Russia. This book puts the conflict in historical perspective by examining the evolution of the crisis and assessing its implications both for the Crimean peninsula and for Russia's relations with the West more generally. Experts in the international relations of post-Soviet states, political scientists Rajan Menon and Eugene Rumer clearly show what is at stake in Ukraine, explaining the key economic, political, and security challenges and prospects for overcoming them. They also discuss historical precedents, sketch likely outcomes, and propose policies for safeguarding U.S.-Russia relations in the future. In doing so, they provide a comprehensive and accessible study of a conflict whose consequences will be felt for many years to come.

While it is often acknowledged that we live in a "postindustrial" age, our economic concepts have lagged far behind our postmodern sensibility. In this incisive new work, the well-known sociologist, Fred Block, sheds obsolete and shopworn economic analysis by presenting a bold, sweeping reconceptualization of the economy. Postindustrial Possibilities provides a fresh understanding of the dynamics of postindustrial change while offering a roadmap for future economic thinking. Block takes as his point of departure the tired concepts of neo-classical economics which, while still dominant, fall short as tools for comprehending contemporary economic forces. In Block's mind, the failure to revise the concepts of industrial economics means that the reality of today's economy is increasingly understood as "through a glass darkly." Intent on reinvigorating thinking in this area, Block masterfully critiques the central categories of neo-classical economics, such as the market, labor, and capital. Block argues that the neo-classical tradition has obscured the fact that capitalist prosperity has been built not on "free markets" but rather on systematic constraints on market freedom. He further suggests that measurements of capital have become increasingly problematic and that the concept obscures the critical sources of productivity within organizations. In his far-reaching analysis of the Gross National Product, Block shows that there is a growing divergence between the factors that determine people's well-being and trends in measured GNP. Postindustrial Possibilities sets forth a new intellectual paradigm that might be called "Qualitative Growth."

One of its primary foci is a shift toward improved product quality and greater priority for various non-commodity satisfactions such as leisure, interesting work, economic security and a safe and clean environment. It also promotes a recognition that greater economic efficiency rests not on infusions of capital but on cooperative labor relations and on institutional reform. Wide-ranging, intellectually vibrant and lucid, *Postindustrial Possibilities* will engender controversy and debate. It is an enormous contribution that social scientists and policymakers will need to come to terms with.

Braithwaite's argument against punitive justice systems and for restorative justice systems establishes that there are good theoretical and empirical grounds for anticipating that well designed restorative justice processes will restore victims, offenders, and communities better than existing criminal justice practices. Counterintuitively, he also shows that a restorative justice system may deter, incapacitate, and rehabilitate more effectively than a punitive system. This is particularly true when the restorative justice system is embedded in a responsive regulatory framework that opts for deterrence only after restoration repeatedly fails, and incapacitation only after escalated deterrence fails. Braithwaite's empirical research demonstrates that active deterrence under the dynamic regulatory pyramid that is a hallmark of the restorative justice system he supports, is far

more effective than the passive deterrence that is notable in the stricter "sentencing grid" of current criminal justice systems.

This text on socio-legal studies is derived from the Socio-Legal Studies Association 1995 annual conference at Leeds University. It examines the definition of the term socio-legal and the boundaries in which the lawyers of this subject fit.

The purpose of this book is to introduce the sociology of law by providing a coherent organization to the general body of literature in that field. As such, the text gives a comprehensive overview of theoretical sociology of law. It deals with the broad expanse of the field and covers a vast amount of intellectual terrain. This volume is intended to fill a gap in the literature. Most textbooks in the sociology of law are insufficiently theoretical or else do not provide a paradigmatic analysis of sociological theories. The content of this text consists of discussions of the works of scholars who have contributed the most to the cumulative development of the sociology of law. It surveys the major traditions of legal sociology but is not wedded to any one particular theoretical approach. Both the "classical," or nineteenth-century, and "contemporary," or twentieth-century, perspectives are covered. The reader will see that nineteenth-century thought has directly influenced the emergence of twentieth-century theory. One unique feature of this book is that key sociological and legal concepts, presented in bold print and italics, are defined, described, and illustrated throughout. Although the nature of the subject matter is highly theoretical and, at times, quite complex, Trevino values every effort to present the material in the most straightforward and intelligible form possible without compromising the integrity of the theories themselves. In short, this book aims to accomplish three objectives: inform about the progressive advancement of sociological theory, teach the reader to analyze the law as a social phenomenon, and develop in the reader a critical mode of thinking about issues relevant to the relationship between law and society.

Providing a critical perspective on the aspirations of advocates of restorative justice and the direction in which restorative justice is developing, this book offers an empirically researched contribution to theoretical debates. Drawing on qualitative research, the book examines the significant gaps that exist between the ideals of proponents of restorative justice and the objectives being pursued in practice. The work examines ways forward for the restorative justice movement - and the development of practices - with a coherent set of restorative justice ideals.

As the countries of East-Central Europe struggle to create liberal democracy and the United States and other Western nations attempt to rediscover their own tarnished civil institutions, Adam Seligman identifies the neglect of the idea of "civil society" as a central concern common to both cultures today. Two centuries after its origins in the Enlightenment, the idea of civil society is being revived to provide an answer to the question of how individuals can pursue their own interests while preserving the greater good of society and, similarly, how society can advance the interests of the individuals who comprise it. However, as Seligman shows, the erosion of the very moral beliefs and philosophical assumptions upon which the idea of civil society was founded makes its revival much more difficult than is generally recognized. When teenagers scuffle during a basketball game, they are typically benched. But when Will got into it on the court, he and his rival were sprayed in the face at close range by a chemical similar to Mace, denied a shower for twenty-four hours, and then locked in solitary confinement for a month.

One in three American children will be arrested by the time they are twenty-three, and many will spend time locked inside horrific detention centers that defy everything we know about how to rehabilitate young offenders. In a clear-eyed indictment of the juvenile justice system run amok, award-winning journalist Nell Bernstein shows that there is no right way to lock up a child. The very act of isolation denies delinquent children the thing that is most essential to their growth and rehabilitation: positive relationships with caring adults. Bernstein introduces us to youth across the nation who have suffered violence and psychological torture at the hands of the state. She presents these youths all as fully realized people, not victims. As they describe in their own voices their fight to maintain their humanity and protect their individuality in environments that would deny both, these young people offer a hopeful alternative to the doomed effort to reform a system that should only be dismantled. *Burning Down the House* is a clarion call to shut down our nation's brutal and counterproductive juvenile prisons and bring our children home.

Crowds and Power is a revolutionary work in which Elias Canetti finds a new way of looking at human history and psychology. Breathtaking in its range and erudition, it explores Shiite festivals and the English Civil war, the finger exercises of monkeys and the effects of inflation in Weimar Germany. In this study of the interplay of crowds, Canetti offers one of the most profound and startling portraits of the human condition.

In a tech-dominated world, the most needed degrees are the most surprising: the liberal arts Did you take the right classes in college? Will your major help you get the right job offers? For more than a decade, the national spotlight has focused on science and engineering as the only reliable choice for finding a successful post-grad career. Our destinies have been reduced to a caricature: learn to write computer code or end up behind a counter, pouring coffee. Quietly, though, a different path to success has been taking shape. In *YOU CAN DO ANYTHING*, George Anders explains the remarkable power of a liberal arts education - and the ways it can open the door to thousands of cutting-edge jobs every week. The key insight: curiosity, creativity, and empathy aren't unruly traits that must be reined in. You can be yourself, as an English major, and thrive in sales. You can segue from anthropology into the booming new field of user research; from classics into management consulting, and from philosophy into high-stakes investing. At any stage of your career, you can bring a humanist's grace to our rapidly evolving high-tech future. And if you know how to attack the job market, your opportunities will be vast. In this book, you will learn why resume-writing is fading in importance and why "telling your story" is taking its place. You will learn how to create jobs that don't exist yet, and to translate your campus achievements into a new style of expression that will make employers' eyes light up. You will discover why people who start in eccentric first jobs - and then make their own luck - so often race ahead of peers whose post-college hunt focuses only on security and starting pay. You will be ready for anything.

With the rapid growth of knowledge concerning ethnic and national group differences in human behaviors in the last two decades, researchers are increasingly curious as to why, how, and when such differences surface. The field is ready to leapfrog from a descriptive science of group differences to a science of cultural processes. The goal of this book is to lay the theoretical foundation for this exciting development by proposing an original process model of culture. This new perspective discusses and extends contemporary social psychological theories of social cognition and social motivation to explain why culture matters in human psychology. We view culture as a loose network of imperfectly shared knowledge representations for coordinating social transactions. As such, culture serves different adaptive functions important for individuals' goal pursuits. Furthermore, with the increasingly globalized and hyper-connected multicultural space, much can be revealed about how different cultural traditions come into contact.

Nothing seems more far removed from the visceral, bodily experience of emotions than the cold, rational technology of the Internet. But as this collection shows, the internet and emotions intersect in interesting and surprising ways. *Internet and Emotions* is the fruit of an interdisciplinary collaboration of scholars from the sociology of emotions and communication and media studies. It features theoretical and empirical chapters from international researchers who investigate a wide range of issues concerning the sociology of emotions in the context of new media. The book fills a substantial gap in the social research of digital technology, and examines whether the internet invokes emotional states differently from other media and unmediated situations, how emotions are mobilized and internalized into online practices, and how the social definitions of emotions are changing with the emergence of the internet. It explores a wide range of behaviors and emotions from love to mourning, anger, resentment and sadness. What happens to our emotional life in a mediated, disembodied environment, without the bodily element of physical co-presence to set off emotional exchanges? Are there qualitatively new kinds of emotional exchanges taking place on the internet? These are only some of the questions explored in the chapters of this book, with quite surprising answers.
