This open access book describes the Reading Success project, in which a 5-step, assessment-to- intervention process, based on the Simple View of Reading, was used within a primary school setting in Australia to better support those students who struggle with reading. It provides an easily accessible overview of each step of the process involved in implementing this approach and highlights the crucial importance of collaboration between professionals involved in the teaching of reading within a school setting. It focuses on the decision-making processes used, such as rich dialogue with the leadership team and teachers, and shares participants' perspectives gathered throughout the project. Using case studies, the book describes how the 5-step approach assists in creating detailed profiles of students' strengths and weaknesses in spoken and written language skills that can be used to guide targeted intervention This book offers valuable insights for educators, speech pathologists, researchers, and pre-service teacher education students interested in the teaching of reading

### **FOURTH GRADE SUPER READING SUCCESS (SYLVAN SUPER WORKBOOKS)**

Learning Express Llc

The ultimate aim of reading is not the process but to understand what we read and comprehension can take place at many different levels. There has been an increasing emphasis on the importance of reading comprehension in recent years but despite this there is very little written on this vital topic accessible to trainee and practicing teachers. The Handbook of Reading Comprehension presents an overview of recent findings on reading comprehension and comprehension problems in children. It provides a detailed examination of the characteristics of children who have reading comprehension difficulties, and examines ways in which comprehension can be supported and improved. It is accessibly written for students and professionals with no previous background in the psychology of reading or reading problems. This indispensable handbook asks the question 'what is comprehension?' The authors consider comprehension of different units of language: understanding single words, sentences, and connected prose and outline what readers (and listeners) have to do to successfully understand an extended text. This book also considers comprehension for different purposes, in particular reading for pleasure and reading to learn and explores how reader characteristics such as interest and motivation can influence the comprehension process. Different skills contribute to successful reading comprehension. These include word reading ability, vocabulary knowledge, syntactic skills, memory, and discourse level skills such as the ability to make inferences, knowledge about text structure, and metacognitive skills. The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills (or their precursors) in pre-readers, provides the foundation for reading comprehension development. Areas covered include:- Word reading and comprehension Development of comprehension skills Comprehension difficulties Assessment Teaching for improvement Throughout the text successful experimental and classroom based interventions will be highlighted, practical tips for teachers and summary boxes detailing key points and explaining technical terms will be included in each chapter
