A linguist's entertaining and highly informed guide to what languages are and how they function. Think you know language? Think again. There are languages that change when your mother-in-law is present. The language you speak could make you more prone to accidents. Swear words are produced in a special part of your brain. Over the past few decades, we have reached new frontiers of linguistic knowledge. Linguists can now explain how and why language changes, describe its structures, and map its activity in the brain. But despite these advances, much of what people believe about language is based on folklore, instinct, or hearsay. We imagine a word's origin is its "true" meaning, that foreign languages are full of "untranslatable" words, or that grammatical mistakes undermine English. In *Don't Believe A Word*, linguist David Shariatmadari takes us on a mind-boggling journey through the science of language, urging us to abandon our prejudices in a bid to uncover the (far more interesting) truth about what we do with words. Exploding nine widely held myths about language while introducing us to some of the fundamental insights of modern linguistics, Shariatmadari is an energetic guide to the beauty and quirkiness of humanity's greatest achievement.

Some Questions about Language Simon and Schuster

Is it a good time to be alive? Is ours a good society to be alive in? Is it possible to have a good life in our time? And finally, does a good life consist of having a good time? Are happiness and "a good life" interchangeable? These are the questions that Mortimer Adler addresses himself to. The heart of the book lies in its conception of the good life for man, which provides the standard for measuring a century, a society, or a culture: for upon that turns the meaning of each man's primary moral right - his right to the pursuit of happiness. The moral philosophy that Dr. Adler expounds in terms of this conception he calls "the ethics of common sense," because it is as a defense and development of the common-sense answer to the question "can I really make a good life for myself?"

The Great Ideas *How to Speak How to Listen*

"Among the funniest [letters] ever dispatched in the vain hope of steering a black sheep onto something like the straight and narrow." —The Wall Street Journal Nostalgic, witty, and original, *Dear Lupin* by Roger Mortimer and Charlie Mortimer tracks the entire correspondence between a father and his only son. When the book begins, Charlie, the son, is studying at Eton, although the studying itself is not a priority, much to his father's chagrin. After Charlie graduates and moves from South America to Africa and eventually back to London, Roger continues to write regularly, offering advice (which is rarely heeded) as well as humorous updates from home ("Your mother has had the flu. Her little plan to give up spirits for Lent lasted three and a half days"). Roger's letters range from reproachful ("You may think it mildly amusing to be caught poaching in the park; I would consider it more hilarious if you were not living on the knife edge") to resigned ("I am very fond of you, but you do drive me round the bend"), but his correspondence is always filled with warmth, humor, and wisdom that offers unique insight into the relationship between father and son.

PLANNING FOR CHRISTIAN EDUCATION FORMATION

Zondervan

The Paideia Proposal is a system of liberal education intended for all children. It was a response to what Adler characterized as the United States' antidemocratic or undemocratic educational system, a holdover from the 19th century, when the understanding of basic human rights fell short of 20th century expectations. The Paideia Proposal was based upon the following assumptions: 1) All children are educable; 2) Education is never completed in school or higher institutions of learning, but is a lifelong process of maturity for all citizens; 3) The primary cause of learning is the activity of the child's mind, which is not created by, but only assisted by the teacher; 4) Multiple types learning and teaching must be utilized in education, not just teacher lecturing, or telling; and 5) A student's preparation for earning a living is not the primary objective of schooling. Adler stressed that the proposal is much more than just a return to the basic skills of reading, writing and arithmetic. It is not simply a return to the values of classical civilization, but a return to what is of enduring value. It is a democratic proposal intended for the education of all, and not an elitist program as some have

alleged.

Maori Made Easy Ballantine Books

Every teacher knows the challenge of trying to engage reluctant readers and struggling writers--students whose typical response to a writing prompt is a few sentence fragments scribbled on a sheet of paper followed by an elaborate shrug of the shoulders. The best way to engage less confident readers and writers is to give them something powerful to think about. The Discourse and Writing Cycle explores writing as a means to focus student thinking, fuel deeper learning, and build complex understanding in English, social studies, math, and science. This field-tested approach from well-respected experts Eleanor Dougherty, Laura Billings, and Terry Roberts is designed for use in grades 4-12. The book explores the three interrelated sequences of the cycle--the Discourse Sequence, the Transition to Writing Sequence, and the Writing Sequence--and includes classroom examples and sample lesson plans from across the content areas. The cycle will inspire you as a teacher and help you to inspire your students to write with confidence and competence. "How often we dim or extinguish the creative sparks that can come from good writing! William Butler Yeats proclaimed that 'Education is not the filling of a pail, but the lighting of a fire.' This book lights the fire for the teaching of writing." --John Hattie, author of the Visible Learning books
