RICHARD WIGGINS

Adult Development and Aging McGraw-Hill Humanities/Social

Sciences/Languages Reflects the most important theoretical foundations and research directions concerning aging and older adulthood This authoritative volume

provides the latest insights into, and theoretical interpretation of, our understanding of the human aging process. Newly updated and revised, this edition of the

well-established student textbook offers relatable scenarios that touch upon real-world issues faced by older adults and their families. The book explains how research studies attempt to answer questions of both theoretical and practical importance as they relate to aging and older adulthood, and it explains the hypotheses and findings of the studies in a manner that is comprehensible to readers of all levels of research experience. *Aging and Older Adulthood* begins by describing the demographic characteristics of the older population, and follows with a chapter on theoretical models that apply to the study of adult development and aging, as well as approaches commonly taken to conduct research and ethical concerns involved in the study of this group. It then offers a series of chapters exploring biological aging, sensation perception and attention, memory, intellectual functioning, cognition and real-world problem-solving, personality and coping, social interaction and social ties, lifestyles and retirement, mental health and

psychotherapy, and death and bereavement. The final chapter looks at aging in the future. Each chapter includes fully updated research findings, as well as new and expanded coverage of concepts and ideas in areas such as neuroscience, and diabetes. New edition of a highly respected text exploring our contemporary understanding of a broad range of topics related to older adulthood and the psychology of aging. Offers thematic treatment of core issues including health, sensory perception, memory, intellect, social interactions, employment and retirement, and mental health. Uses a dual lens of two models – the selective optimization with compensation model and the ecological model – to provide cohesiveness to the presentation of both theoretical and applied material. Introduces each chapter with a relevant real-world scenario and refers back to it throughout the chapter. Includes pedagogical feature boxes that reflect current understanding of contemporary issues in the field as well as key points and issues for

further discussion. *Aging and Older Adulthood*, 4th Edition is an excellent text for upper division undergraduate and graduate courses focusing on the older adulthood and aging, the psychology of aging, gerontological studies, and lifespan development.

[Handbook of Adult Development](#) Springer Publishing Company

The new edition of the leading textbook on the biopsychosocial processes of aging in adults, fully revised and updated. *Adult Development and Aging*, Second Canadian Edition helps student readers understand the aging process both in themselves and in those around them.

Approaching the subject from the biopsychosocial perspective — an innovative model of adult development that takes into account the influences and interactions of complex biological, psychological, and social processes, the authors explore the latest concepts and applications in this exciting academic discipline. Based on Susan Whitbourne's classroom experience teaching her *Psychology of Aging* course, this engaging textbook integrates current research, real-

world data, detailed explanations, and relatable examples to provide a balanced and accessible examination of the subject. This important work is an invaluable source of topically relevant information for traditional college-age learners and mature returning students alike, as well as for instructors and academic researchers in areas of adult aging and lifespan development.

ADULT DEVELOPMENT AND AGING

John Wiley & Sons
This book provides sufficient background for students who do not have any knowledge of psychology without watering down the concepts or terminology. It features breadth of coverage, an interdisciplinary viewpoint, and extensive applications from a variety of disciplines.

ADULT DEVELOPMENT AND AGING

Washington : American Psychological Association
The field of emotions research has recently seen an unexpected period of growth and expansion, both in traditional psychological

literature and in gerontology. The Handbook of Emotion, Adult Development, and Aging provides a broad overview and summary of where this field stands today, specifically with reference to life course issues and aging. Written by a distinguished group of contributing authors, the text is grounded in a life span developmental framework, while advancing a multidimensional view of emotion and its development and incorporating quantitative and qualitative research findings. The book is divided into five parts. Part One discusses five major theoretical perspectives including biological, discrete emotions, ethological, humanistic, and psychosocial. Part Two on affect and cognition discusses the role of emotion in memory, problem solving, and internal perceptions of self and gender. Part Three on emotion and relationships expands on the role of emotion in sibling and parent/child relationships, as well as relationships between friends and romantic partners, and the emotional reaction to interpersonal loss across

the life span. Part Four on stress, health, and psychological well-being treats issues of stress and coping, religion, personality, and quality of life. The final part on continuity and change in emotion patterns and personality discusses emotion and emotionality throughout the life span. An ideal reference source for professionals across a wide range of disciplines, the text summarizes recent important developments in this fast growing area of psychology and proposes many new directions for future research. Provides a biopsychological view on emotion in adulthood from a life span context Presents the new perspective on emotion in older adults actively engaged in emotion self-regulation Describes the intimate connection between emotion and the structure of personality Demonstrates a new perspective on what emotion is, its importance across the life span, its connections with cognition, its role in interpersonal relation, and the way it influences both stability and change in adulthood Illustrates the interpersonal nature of emotion Provides theoretically based,

leading edge research from international authors
 Five areas of coverage include: Theoretical perspectives Affect and cognition Emotion and relationships Stress, health, and psychological well-being Continuity and change in emotion patterns and personality
 Coverage includes: Five major theoretical perspectives, including biological, discrete emotions, ethological, humanistic, and psychosocial The role of emotion in memory, problem-solving, and internal perceptions of self and gender The role of emotion in sibling and parent/child relationships, relationships between friends and romantic partners, and the emotional reaction to interpersonal loss across the lifespan Issues of stress and coping, religion, personality, and quality of life Emotion and emotionality throughout the lifespan

Adult Development and Aging HarperCollins College
 This comprehensive book helps readers process a clear picture of adult development and aging with the help and results of intensive scientific research. It challenges common stereotypes about this subject matter, and interprets the research data into an optimistic yet realistic appraisal of the many problems faced by the elderly in today's society. Chapter topics look at independence and intimacy in young adulthood; responsibility and failure in the middle years; the reintegration or despair of later life; research methodology; families; careers; personality development; learning and memory; intellectual and biological development; mental disorders; and death and bereavement. For individuals who want to view the potential richness of life— at all stages, and/or understand the lives of older adults they may care for.
Aging and Older Adulthood Little, Brown Spark

Designed to meet the needs of today's students by presenting a uniquely positive perspective on aging, *Adult Development and Aging*, The Canadian Experience, challenges readers to examine their own ageism and to consider the gains as well as the losses people experience across adulthood. This first truly Canadian edition provides relatable examples, case studies, up-to-date research, and relevant global and Canadian demographics as well as loads of StatsCan data--all set within a conversational, approachable narrative that avoids overly academic or clinical language. Engaging pedagogy, which is built to help students retain information, supplement their learning, and consider career options appears throughout the text and digital solution, CourseMate

ADULT DEVELOPMENT AND AGING

Wiley Global Education
 This popular, topically organized, and thoroughly updated child and adolescent development text presents you with the best theories, research, and practical advice that developmentalists have to

offer today. Authors David R. Shaffer and Katherine Kipp provide you with a current and comprehensive overview of child and adolescent development, written in clear, concise language that talks 'to' you rather than 'at' you. The authors also focus on application showing how theories and research apply to real-life settings. As a result, you will gain an understanding of developmental principles that will help you in your roles as parents, teachers, nurses, day-care workers, pediatricians, psychologists, or in any other capacity by which you may one day influence the lives of developing persons. Available with InfoTrac® Student Collections <http://gocengage.com/info trac>. National Academies Press This text offers a clear account of the salient issues and concerns that dominate the field of adult development. Gender differences and race/ethnic diversity are discussed in their relation to all major topics. There is also coverage on the impact of religion and spirituality.

Adult Development and Aging

American Psychological Association (APA)

The new edition of the leading textbook on the biopsychosocial processes of aging in adults, fully revised and updated. *Adult Development and Aging* helps student readers understand the aging process both in themselves and in those around them.

Approaching the subject from the biopsychosocial perspective — an innovative model of adult development that takes into account the influences and interactions of complex biological, psychological, and social processes — authors Susan Krauss Whitbourne and Stacey B. Whitbourne explore the latest concepts and applications in this exciting academic discipline. Based on Susan's classroom experience teaching her Psychology of Aging course, this engaging textbook integrates current research, real-world data, detailed explanations, and relatable examples to provide a balanced and accessible examination of the subject. This fully updated and revised seventh edition offers inclusive coverage of recent advances in neuroscience and genetics, cognitive functions, vocational development, sociocultural influences, mental health issues, health and prevention, and much more. "AgeFeeds" provide key information for each chapter, while new graphics, charts, tables, and figures enhance the

text's visual appeal and strengthen student comprehension and retention. Acclaimed for its depth, currency, and student-friendly presentation, this popular textbook: Uses a multidisciplinary approach for understanding adult aging and development Offers positive images of aging and the newest and most relevant research in the field Provides new and updated illustrations, references, quizzes, examples, and research Offers practical self-help tips and up-to-date links to online resources Includes extensive supplementary teaching and learning material including a test bank, PowerPoint slides, and an instructor's manual *Adult Development and Aging: Biopsychosocial Perspectives, 7th Edition* is an invaluable source of topically relevant information for traditional college-age learners and mature returning students alike, as well as for instructors and academic researchers in areas of adult aging and lifespan development. *Adult Development and Aging* McGraw-Hill Humanities, Social Sciences & World Languages Topically organized, Adult

Development and Aging: Growth, Longevity and Challenges provides students with a comprehensive understanding of the aging process in adulthood from multiple perspectives. The authors use principles of lifespan development to show readers the directionality of changes in early, middle, and late adulthood. Within its framework of scientific literacy, the text charts four key themes to guide learners: a focus on aging as development; a global perspective on contexts; a vibrant, integrated approach to diverse coverage; and psychological science that translates into real-life experiences. A final chapter focuses on ways to improve the experience of aging for all adults. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides. *DEVELOPMENTAL PSYCHOLOGY: CHILDHOOD and ADOLESCENCE* Sage Publications Incorporated Conveys an understanding of the

ongoing process of adult ageing and development. The coverage ranges from basic topics such as theory and research to high-interest, current issues such as minority ageing, elder abuse, dual-career marriages, industrial gerontology and single parenthood.

Adult Development and Aging Wiley

This authoritative reference work contains more than 300 entries covering all aspects of the multi-disciplinary field of adult development and aging Brings together concise, accurate summaries of classic topics as well as the most recent thinking and research in new areas Covers a broad range of issues, from biological and physiological changes in the body to changes in cognition, personality, and social roles to applied areas such as psychotherapy, long-term care, and end-of-life issues Includes contributions from major researchers in the academic and clinical realms 3 Volumes www.encyclopediaadulthoodandaging.com
Adult Development and Aging SAGE Publications
This undergraduate text takes a comprehensive approach to adult

development and aging. It is based on the author's extensive experience in teaching and research within the field. Its major theme is that individuals can take an active role in their aging process and make it both rich and successful. Evenly balanced between biological, social, cognitive, and personality theories, it focuses upon "successful aging." Students will gain a positive approach to the field along with many suggestions for ways that they can incorporate major concepts into their own professional and personal development. An online instructor's manual, test bank, and powerpoint slide set provides a variety of supplemental materials for instructors ranging from novice to experienced.

Adult Development and Aging Addison Wesley Publishing Company
For undergraduate courses in Adulthood and Aging, Gerontology, and Adult Development. This text provides an engaging perspective on the issues, challenges, and joys of adult development and

aging. It provides a balanced and integrated treatment of young, middle, and later adulthood, concluding with a discussion of life satisfaction and quality of life issues. More than ever there is a need to inform those who will be therapists, health care professionals, social workers, and all others who plan to work with adults in some capacity of the challenges and opportunities that often come our way in adulthood. In addition, this text covers areas which are often neglected, such as self development and individual differences, life-long learning, community and political life, and values and moral development. The addition of these and other topics, along with a positive-growth focused perspective sets this book apart from other textbooks in this area that have grown out of

gerontology backgrounds with a focus on physical decline and illness. The pedagogical features of the book direct students to key information, and the special features engage the reader in current ethical dilemmas and life-planning issues. *The Encyclopedia of Adulthood and Aging, 3 Volume Set* John Wiley & Sons

Renowned experts in adult development and aging, Manfred Diehl and Hans-Werner Wahl synthesize decades of psychological research into a comprehensive volume that considers later life in the context of lifespan development, social and physical environmental factors, and historical-cultural influences. In so doing, they review important research on cognitive functioning, behavioral processes, personality and identity development, and overall well-being in

middle to late adulthood. Diehl and Wahl's three-part framework helps readers better understand that the development process is influenced by multiple factors and can take many different trajectories. Through this contextualized perspective, they examine the influence that previous life experiences, beginning in early childhood, can have on the aging process in older adults. This includes social relations, technological advances, societal perspectives on aging, and education. The authors also examine the challenges and opportunities of aging, using a strength-based approach to promote a diverse, nuanced understanding of successful, healthy aging. Chapters also conclude with dialogues from other experts in the field, offering multiple different perspectives on the research.
