This book addresses a perennial challenge for product planners and designers alike: how to objectively specify and quantify the aesthetics of products. It provides automotive product planners with a framework for the grammar of aesthetics and a tool for quantifying the aesthetics of an intended product. Further, it equips styling designers

with a tool for connecting engineering and aesthetics. Given the author's extensive experience in motorcycle design, the motorcycle has been chosen as the frame of reference for automobiles. Specifically in the field of automobile design, where engineering and aesthetics go hand in hand, it also becomes important to clearly and objectively define the relationship between engineering design and aesthetics. Accordingly, this book (1) clearly establishes the objective

parameters of aesthetics, (2) puts forward a method for quantifying aesthetics, (3) identifies the engineering design parameters affecting aesthetics, and (4) determines the relationship between parameters of aesthetics and engineering design. As such, it offers a useful guide not only for design professionals, but also for students and researchers of design.

“Shades of THE HUNGER GAMES permeate a story centered around two courageous teens determined to buck all odds in an effort to regain their loved ones....ARENA ONE builds a believable, involving world and is recommended for those who enjoy dystopian novels, powerful female characters, and stories of uncommon courage.” -- Midwest Book Review A bundle of Books 2 and 3 in THE SURVIVAL TRILOGY, the #1 bestselling series! New

York. 2120. America has been decimated, wiped out from the second Civil War. Survivors, far and few between, join violent gangs, predators who live in the big cities. There is only one rule to their stadium, where opponents are made to fight to the death: no one survives. Ever. In ARENA TWO, having just escaped from the treacherous island that was once Manhattan, Brooke, Ben, Logan, Bree and Rose make their way up the Hudson river in their stolen boat, low on fuel,

low on food, and desperately needing shelter from the cold. On their tails are the slaverunners, who will stop at nothing until they capture them and bring them back. An action-packed dystopian thriller featuring a tough female heroine whom readers worldwide have fallen in love with, ARENA THREE is the shocking conclusion to the bestselling Survival Trilogy, and one that will leave you turning pages late into the night. "Addicting...ARENA ONE was one of those books

that you read late into the night until your eyes start to cross because you don't want to put it down." -Dallas Examiner

## **Global Marketing**

Motorbooks Motor trikes have been around since the dawn of motoring, with many

starting out as utility vehicles or prototypes of cars. But trikes haven't died out or become mere relics of motoring history - companies all over the world still produce them today, and many will convert a motorcycle into a trike. Trikes are not only huge fun, but can also be a lifestyle choice. They are as diverse as the people who ride them, and this book illustrates the vast range of machines available. The reader will discover a plethora of trike designs and layouts from the late

19th century to the present day. Some influential designs include Piaggio's three wheeled vehicles, the Morgan three wheeler, and the Harley-Davidson Servicar. The book also features the products of companies that convert motorcycles into trikes, and shows some mass-produced examples that you can buy today. Then there are the weird and wonderful machines built by individual enthusiasts – a testament to their engineering skills and true eccentricity ...

### **RIDING IN THE ZONE**

McGraw Hill Professional Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday

problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the

motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
