**Alligators Always
Dress for Dinner**

Routledge
Features vintage
projects from the

1910s and 1920s first
published in the pages
of Popular Mechanics
magazine, including
step-by-step
instructions for crafting
such items as greeting
cards, model airplanes,
combined kites, and
snowshoes.

Projects for the Young Mechanic

Drawn and Quarterly
This volume contains notes for 21 of the 22 major 16-mm sound films prepared under the direction of the NCFMF and covering nearly all of the fundamental phenomena of fluid motions.

The Boy Mechanic

Sonoran Publishing
From everyday apps to complex algorithms, Ruha Benjamin cuts through tech-industry hype to understand how emerging technologies can reinforce White supremacy and deepen social inequity. Benjamin argues that automation, far from being a sinister story of racist programmers scheming on the dark web, has the potential to hide, speed up, and

deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era. Presenting the concept of the “New Jim Code,” she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies; by ignoring but thereby replicating social divisions; or by aiming to fix racial bias but ultimately doing quite the opposite.

Moreover, she makes a compelling case for race itself as a kind of technology, designed to stratify and sanctify social injustice in the architecture of everyday life. This illuminating guide provides conceptual tools for decoding tech promises with

sociologically informed skepticism. In doing so, it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture. Visit the book's free Discussion Guide [here](#).

The trading, selling, and buying of personal transport has changed little over the past one hundred years.

Whether horse trading in the early twentieth century or car buying today, haggling over prices has been the common practice of buyers and sellers alike. *Horse Trading in the Age of Cars* offers a fascinating study of the process of buying an automobile in a historical and gendered context. Steven M. Gelber convincingly

demonstrates that the combative and frequently dishonest culture of the showroom floor is a historical artifact whose origins lie in the history of horse trading. Bartering and bargaining were the norm in this predominantly male transaction, with both buyers and sellers staking their reputations and pride on their ability to negotiate the better deal. Gelber comments on this point-of-sale behavior and what it reveals about American men. Gelber's highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century, in the process adding a colorful and interesting chapter to

the history of the automobile.

The Digital Dialectic

John Wiley & Sons

Drawing on thousands of "reading autobiographies," in which generations of students wrote about their experiences with reading, this book investigates what makes young people want to read. Chapters include: (1) Growing with Books; (2) Learning To Read; (3) Literature and the Human Voice; (4) Reading Habits and Attitudes: When, Where, and How; (5) Sources for Books; (6) Reading and Human Relations; (7) What Books Do for Readers; (8) Subliterature; (9) Teachers and Teaching: The Secondary School Years; (10) Libraries and Librarians; (11)

The Reading of Poetry; (12) The Classics; (13) Barriers: Why People Don't Read; and (14) Final Discussion. (ARH) *Norman Saunders* Illustrated PressInc Among the thousands and thousands of dirt bikes, scramblers, trials bikes, play bikes and early motocross bikes; which are the best bikes to make your own? Vintage Dirt Bikes will help the reader make that decision by providing them with information on all the most popular makes.

Popular Mechanics When Duct Tape Just Isn't Enough Junior League of Atlanta Cookbooks "This book presents the histories of the major North American shortwave clubs and reviews the professional and

listener-generated shortwave literature of the era. It also covers the DX programs and other listening fare to which shortwave listeners were most attracted and the QSL-cards they sought as confirmation of their reception."--Provided by publisher.

"Offers many projects that are still functional today as well as several that are purely entertaining."--From source other than the Library of Congress
Tube Testers and Classic Electronic Test Gear Sterling Publishing Company, Inc.

The Digital Dialectic is an interdisciplinary jam session about our visual and intellectual cultures as the computer recodes technologies, media, and art forms. Unlike purely academic texts on new media, the book includes contributions by scholars, artists, and entrepreneurs, who combine theoretical investigations with

hands-on analysis of the possibilities (and limitations) of new technology. The key concept is the digital dialectic: a method to ground the insights of theory in the constraints of practice. The essays move beyond journalistic reportage and hype into serious but accessible discussion of new technologies, new media, and new cultural forms.

Rockets and Revolution

Arcadia Publishing

Popular Mechanics

knows: there are two types of people in the world--those able to fix whatever goes bust, and those who beg the first group for help when something goes wrong. But it doesn't have to be that way, because this easy-to-follow guide will give anyone the basics to

tackle those frustrating (and sometimes nerve-racking) quandaries that crop up around the house: plumbing problems, electrical snafus, appliance failures, computer and electronics breakdowns, pest infestations, and furniture in need of renewal. They range from the serious to the merely annoying, but every one is cause for concern. So, whether the issue is a fast repair for a running toilet or a leaking pipe, or a simple, inexpensive way to keep deer from pillaging the garden, it's all in here.

Tanar of Pellucidar

Noted automobile historian James M.

Flamming offers the ultimate book on the

Volkswagen and the love affair it fostered with generations of American auto owners. 16 pages in full color and more than 250 pages of text give readers the inside story on the VW, from the prewar days of Hitler's Germany to the vehicles enshrined in the American counterculture of the '60s to the models poised to roll off today's assembly lines.

WOODEN BOATBUILDING

Wildside Press LLC
Armchair Fiction
presents extra large science fiction double novels with original illustrations. "Dark Destiny" by Dwight V. Swain is the first novel.

He was known throughout the system as Sha Haral, a fierce space warrior with a lust for power. He'd blasted his way back and forth across the spaceways many times. However, Haral's fortunes had taken a turn for the worse, and he soon became a downtrodden, bitter would-be conqueror haunting the dives on a backwater planet called Ulna. But his fate took an unexpected turn when a beautiful blonde-haired priestess, fleeing from a space pirate's hordes, fell into his lap. From this priestess Haral learned of an ancient woman-goddess who, according to legend, lay sleeping in a lost city surrounded by a legion of terrifying

monsters. This ancient goddess, whose face was half-hidden by a jeweled veil, was known as a woman of ultimate beauty, possessing secrets of great power. And she still lay there, in her crumbling city, waiting for someone to awaken her... The second novel, "The Secret of Planetoid 88," is by Ed Earl Repp. Dane Cabot was just one of many slaves of the dictators--"The Hundred" as they were known--who ruled Earth with an iron hand. After a joy ride to a distant planetoid, Cabot returned to Earth to find himself falsely accused of murder. There was no trial--The Hundred didn't operate that way. He was soon sentenced to die. But when a mysterious stranger interceded,

Cabot found himself a stowaway on a space cruiser headed for Io, moon of Jupiter. There Cabot found a tiny colony of rebels with a master plan for the eventual freedom of Earth's enslaved populace. But radiation from Jupiter's Great Red Spot was slowly destroying Io. So Cabot and his fellow rebels found themselves in a desperate race against time. Could they orchestrate their plans before the rising tide of planet-wide disintegration overtook them? Deep in the void of space was a secret, a secret that was the key to freedom--if they could find it in time... *Cars & Parts* McFarland Norman Saunders was the illustrator of *Mars Attacks*, *Wacky Packages*, pre-code horror comic book

covers, hundreds of pulp magazines, and much more. This definitive reference book includes over 880 illustrations and photos from every phase of his career.

Forward Drive MIT Press

This comprehensive account of the past, present and future of the automobile examines the key trends, key technologies and key players involved in the race to develop clean, environmentally friendly vehicles that are affordable and that do not compromise on safety or design.

Undertaking a rigorous interrogation of our global dependency on oil, the author demonstrates just how unwise and unnecessary this is in light of current

developments such as the fuel cell revolution and the increasing viability of hybrid cars, which use both petrol and electricity - innovations that could signal a new era of clean, sustainable energy. The arguments put forward draw on support from an eclectic range of sources - including industry insiders, scientists, economists and environmentalists - to make for an enlightening read.

200 Classic Things to Build Courier

Corporation

The Skycrane was the last creation of aircraft design pioneer Igor Sikorsky. In *SKYCRANE: Igor Sikorsky's Last Vision*, former Sikorsky Aircraft Executive Vice President John A. McKenna traces the development of this

remarkable helicopter from original concept and early sketches to standout performer for the military and private industry. Responsible for building the first S-64 Skycrane in 1961 and for supporting its Army and commercial programs, McKenna has written a comprehensive history chronicling a radically designed helicopter that many thought would not succeed. Indeed, initial versions generated no orders. But General Harry Kinnards vision and advocacy resulted in the Skycranes support of combat operations in Vietnam as part of the groundbreaking concept of supporting Army troops with helicopters rather than trucks. In 1971 Erickson Lumber Company acquired the

first Skycrane intended for commercial use to move timber deep in American forests. Owner Jack Erickson later acquired the world manufacturing and support rights to the aircraft creating Erickson Air-Crane Inc. A half century after its first flight the Skycrane continues to save lives, provide essential services, and earn daily profits worldwide. Beautifully illustrated with scores of historical photographs, SKYCRANE features interviews with engineers who designed and tested the helicopter and with Army pilots who flew it during combat in Vietnam. This engagingly written work is the definitive history of a unique and important aircraft. [Horse Trading in the](#)

Listening on the Short Waves, 1945 to Today

Vintage American Road Racing Cars
1950-1969 American road racing began just after World War II and quickly blossomed into a movement. The Sports Car Club of America (SCCA) and the United States Auto Club (USAC), clubs that

became fierce rivals in the 1950s and 1960s, were the principal race promoters. Race tracks popped up everywhere, at first on city streets, then at airports and U.S. Air Force bases, and finally at purpose-built circuits like Road America and Laguna Seca. Although most of the cars that competed in American road racing were built in Europe, an underground movement sprang up of "special builders" who constructed their racers in home garages and small-town machine shops. Some were so homely and slow that only the builders could love them. Others trounced every Ferrari in sight and are now on the wish lists of wealthy collectors the world

over. Vintage American Road Racing Cars 1950-1970 is the first book devoted exclusively to American road racing cars of all types and sizes. Hundreds of race cars built in America have never before been mentioned in print, and this book chronicles those and other cars with vintage and modern photography, specifications, memorabilia, and the stories and characters behind each car. About the Author Harold Pace's writing and photography has appeared in such magazines as Automobile Quarterly, Class & Sportscar, Excellence, Sports Car International, Vintage Racecar Journal, and others. He lives in Weatherford, Texas.

Mark Brinker is a vintage race car enthusiast who has raced at the Monterey Historics. He is a doctor with three published medical textbooks and 70+ published scientific papers. He hails from Houston, Texas. The Boy Mechanic Best Projects from the Classic Popular Mechanics Series The inaugural title in our exclusive new series of books about traditional boats and traditional seamanship. Wooden boats didn't disappear with the invention of GRP. Building them is a classic craft that attracts people with a keen interest in traditional boats and is a thriving activity among professional craftsmen and DIY boat builders alike. This

thoroughly modern book aimed at the novice builder and accessible to the amateur takes a fresh new approach to a timeless activity. The focus is on classic boat construction and restoration, but at all stages modern methods, materials and techniques are employed, together with step-by-step diagrams and explanations. Well illustrated with color photos and detailed close-up watercolor

illustrations, this book will be invaluable for students of boat design and construction, do-it-yourself boat builders and even model makers.
