## **COAST GUARD BULLETIN**

Forgotten Books  
This monograph examines China's approach to using sea power to defend and advance its maritime claims in the East China Sea and South China Sea. This approach, which Chinese strategists sometimes called "echelon defense," involves the use of non-military instruments of sea power--especially maritime law enforcement forces--to vie with other states for control over disputed maritime space. These non-military forces operate on the first line (or echelon) of China's expanding frontier. Behind them, on the second line, China

employs naval forces to deter foreign leaders from using force, thereby compelling them to compete on China's own terms. The echelon defense approach allows China to gradually achieve its objectives without risking a conflict or giving other great powers such as the United States sufficient grounds to intervene. Since 2006, when this approach was pioneered, it has enabled China to expand its influence and control in maritime East Asia. But it has also harmed China's relations with its neighbors and other great powers. *Annual Report* DIANE Publishing  
Reviews the recruiter incentive systems that the military services use to optimize the performance of military recruiters and ensure that only fully qualified applicants are enlisted. Reviews the services' recruiting processes to: (1) screen, select, and train recruiters; (2) screen, select, and prepare recruits for basic training; and (3) measure and reward recruiter performance. Identifies practices in each service that enhance recruiter performance and retention of recruits and could be expanded to other services.
