Proceedings of the 2016 International Conference on Leadership, Innovation and Entrepreneurship (ICLIE)

Christos Frangos
This research attempts to explore and identify eventual relationships between the evolution of ERP systems and information systems integration or disintegration. The aim of this research is to know if the relationships between the ERP systems and the information systems are guided by certain factors and, as a result, to understand, more in-depth, the factors affecting these relationships. More precisely, this analysis aims to study whether assigned values given to these factors could guide the evolution of ERP systems in a manner that promotes IS integration; and if the opposite assigned values to these same factors could guide the evolution of ERP

systems in a manner that provokes IS disintegration instead.

John Wiley & Sons
Institutions of higher learning rely heavily on technological innovation to effectively deliver educational services and provide students with a quality experience. Thus, the ability of leaders and administrators at these institutions to produce effective policy and to innovate in an evolving world hinges on successfully applying technological solutions to everyday challenges facing their college or university. Cases on Technologies for Educational Leadership and Administration in Higher Education brings together a collection of practical case studies exploring the application of new technologies, such as student management systems and enterprise resource planning, along with strategies that educational leaders can use to foster organizational change. Targeted toward college and university administrators and

leaders, this book discusses successful strategies for managing universities in the tech-savvy 21st century. [A Practical Guide to Information Systems Process Improvement](#) CRC Press

For many years now Enterprise Information Systems have been critical in helping businesses successfully navigate the global market. The development that started with design and implementation of integrated systems has evolved to incorporate a multitude of perspectives and ideas. The Enterprise Information Systems functionality extends from principally an ERP (Enterprise Resource Planning) system to a portfolio of standard systems including CRM (Customer Relationship Management) systems and SCM (Supply Chain Management) systems. *Advances in Enterprise Information Systems II* is divided into seven thematic sections, each exploring a distinct topic. In "Concepts in Enterprise Information Systems" the

authors present new concepts and ideas for the field. "Cases in Enterprise Information Systems" introduces studies of enterprise information systems in an organizational context. "Business Process Management" is one of the major themes within enterprise information systems and "Designing Enterprise Information Systems" discusses new approaches to the design of processes and system and also deals with how design can be taken as a specific perspective. "Enterprise Information Systems in various domains" features generic studies that contribute to advancing the practical knowledge of the field as well as towards "Global issues of Enterprise Information Systems". Finally, in "Emerging Topics in Enterprise Information Systems", new technologies and ideas are explored. Cloud computing in particular seems to be setting the agenda for future research in enterprise information systems. The book will be invaluable to academics and professionals interested in recent developments in the field of enterprise information systems.

The 3-volume set LNCS 9731, 9732, and 9733 constitutes the refereed proceedings of the 18th International Conference on Human-Computer Interaction, HCI 2016, held in Toronto, ON, Canada, in July 2016. The total of 1287 papers and 186 posters presented at the HCI 2016 conferences and were carefully reviewed and selected from 4354 submissions. The papers thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The volumes constituting the full 27-volume set of the conference proceedings.

FIELD STUDIES AND THEORETICAL REFLECTIONS ON THE FUTURE OF WORK

IGI Global
"This book is to provide comprehensive coverage and understanding of various enterprise information systems (EIS) such as enterprise resource planning (ERP) and electronic commerce

(EC) and their implications on supply chain management and organizational competitiveness"-- Provided by publisher.

RE-CONCEPTUALIZING ENTERPRISE INFORMATION SYSTEMS

Assessing ERP Implementation Critical Success FactorsThe Case of Middle East Airlines & Central Bank of LebanonAn enterprise resource planning (ERP) system is an integrated set of programs that provides support for core organizational activities. ERP is a software infrastructure embedded with "best practices" or best ways to do business based on common business practices and academic theory. The aim is to improve the cooperation and interaction between all the organizations' departments, such as the products planning, manufacturing, purchasing, marketing and customer service department. ERP systems implementation is costly and complex. In many cases, an ERP system is the largest single investment in any corporate-wide project.

The software is expensive, and the consulting costs even more. The ERP systems implementation is the process where business process and ERP system match each other. Usually the firm has to change the business process per ERP systems. Sometimes most positions have to be redesigned according to the ERP systems. Thus the difficulties and high failure rate in implementing ERP systems. The failure percentage of ERP systems was determined by one study as ranging from 40 to 60% and from another study as between 60 and 90% (Langernwalter, 2000). This research examines what factors facilitate or inhibit the success of ERP projects. It uses a case study methodology to compare successful ERP implementation with an unsuccessful one. Data was collected by conducting interviews at various levels of the subject organizations and by examining their archived records when available. The study proposes that worked with functionality, maintained scope, project team, management support, consultants, internal readiness, training, planning and adequate

testing are critical to a successful ERP project implementation and also dealing with organizational diversity, development, and budgeting are other important factors that are contributing to a successful implementation. Qualitative Case Studies on Implementation of Enterprise Wide Systems This book constitutes the proceedings of the 6th International IFIP Working Conference on Research and Practical Issues of Enterprise Information Systems (CONFENIS 2012), held in Ghent, Belgium, during September 19–21, 2012. The theme of the conference was "enterprise information systems of the future -- evolving toward more performance through transparency and agility," mirroring the trend toward more open and more flexible systems. In all, 53 contributions were submitted and after a rigorous review process 10 full papers and 15 short papers were selected for publication in this book. These 25 papers present a well-balanced mix between the traditional social sciences and the novel design science paradigms in

enterprise information systems research, and they also include practitioner-oriented and practice-driven contributions. The topics covered fall into three categories: information management in businesses (e.g., enterprise modeling or business process management), information systems from a management perspective (e.g., service innovation, business intelligence, or decision support systems), and ERP offerings and implementations (e.g., software as a service or ERP case studies). [Advances in Enterprise Information Systems II](#) Springer For many years now Enterprise Information Systems have been critical in helping businesses successfully navigate the global market. The development that started with design and implementation of integrated systems has evolved to incorporate a multitude of perspectives and ideas. ENTERPRISE INFORMATION SYSTEMS OF THE FUTURE

CRC Press
Assessing ERP Implementation Critical Success Factors The Case of Middle East Airlines & Central Bank of Lebanon
State of Art of IS Research in SMEs Tata McGraw-Hill Education
Enterprise Resource Planning (ERP) by Alexis Leon - In print for over two decades, continues to be a one-stop reference on the subject covering Basic Concepts, Benefits and Risks, ERP Related Technology, ERP Implementation Process, ERP Deployment Models, ERP Operations and Management, E-Business in ERP, and Future Directions in ERP. It is developed to be used as a conceptual resource for the students pursuing Management and Computer Science courses; and as a

reference for the ERP Professionals. This book also examines enterprise software and shows the readers how ERP software can refine the operations of a company, how it can streamline its various overlapping functions, and how the core areas of any ERP package are related to each other. This fourth edition is substantially revised to keep pace with advances in ERP to provide a thorough introduction to the world of ERP and prepare the readers for a concrete understanding of today's ERP marketplace. Highlights: • Content presentation supports outcomes-based learning approach • 12 case studies on ERP software included, like: ♦SAP at Coca Cola Hellenic Bottling ♦3i Infotech at Faber-Castell India ♦Epicor at Knightsbridge Chemicals ♦Epicor at Howe Corporation ♦Ramco at Adani Logistics Ltd. ♦IQMS at Custom Profile ♦Sage at Agarwal Fasteners Pvt. Ltd. ♦Oracle JD Edwards at AVO Carbon India • Inclusion of contemporary topics like Business Intelligence, Business Analytics, e-Commerce, m-Commerce, Data Warehousing, Data Mining, SaaS and Cloud

ERP with their Market Dynamics • Coverage on ERP Software like SAP, Infor, Epicor, QAD, 3i Infotech, Sage, Oracle etc. • Inclusion of functional features of SAP – Sales and Distribution, Controlling, Financial Integration, HCM, Production Planning, Quality Management. • Extensive pedagogical aid at the end of each chapter is provided.

Cases on Technologies for Educational Leadership and Administration in Higher Education Springer

"This set of books represents a detailed compendium of authoritative, research-based entries that define the contemporary state of knowledge on technology"--Provided by publisher.

10th International Conference, PROFES 2009, Oulu, Finland, June 15-17, 2009,

Proceedings IGI Global
This volume aims to outline the fundamental principles behind leadership, innovation and entrepreneurship and show how the interrelations between them promote business and trade practices in the global economy. Derived from the 2016 International Conference on Leadership, Innovation,

and Entrepreneurship (ICLIE), this volume showcases original papers presenting current research, discoveries and innovations across disciplines such as business, social sciences, engineering, health sciences and medicine. The pace of globalization is increasing at a rapid rate and is primarily driven by increasing volume of trade, accelerating pace of competition among nations, freer flows of capital and increased level of cooperation among trading partners. Leadership, innovation, and entrepreneurship are key driving forces in enhancing this phenomenon and are among the major catalysts for contemporary businesses trading in the global economy. This conference and the enclosed papers provides a platform in which to disseminate and exchange ideas to promote a better understanding of current issues and solutions to challenges in the globalized economy in relation to the fields of entrepreneurship, business and economics, technology management, and Islamic finance and management. Thus, the

theories, research, innovations, methods and practices presented in this book will be of use to researchers, practitioners, student and policy makers across the globe.

Research and Practice IGI Global

This book establishes and explores existing and emerging theories on Small and Medium-sized Enterprises (SMEs) and the adoption of IT/IS. It presents the latest empirical research findings in that area of IS research and explores new technologies and practices. The book is written for researchers and professionals working in the field of IS research or the research of SMEs. Moreover, the book will be a reference for researchers, professionals and students in management information systems science and related fields.

Implementing for Effectiveness IGI Global

This fifteen-chapter monograph edited by Joanna Paliszkievicz is an interesting read that focuses on light to moderate topics in the areas of management and information technology. The topics are from cryptocurrencies and their online exchanges in Poland to using the

concept of blockchain in agribusiness, using virtual reality, creating knowledge and innovation in family businesses, the importance of social media in education, risk analysis, security and forensic science, and effective communication in enterprises. The monograph continues with topics of CRM/ERP implementation in SMEs in Poland, big data/agri-food industry and innovative solution for knowledge management, the impact of digital technologies on competences, digitization in agriculture, and the impact of merchandising on consumer behaviour. Although there is little connection in terms of reading structure from one chapter to the next, each chapter uniquely stands alone to offer insights into the topic it examines in a very simple and understandable manner.

Handbook of Enterprise Integration Springer

This book constitutes the refereed proceedings of the IFIP WG 8.6 International Working Conference on Transfer and Diffusion of IT, TDIT 2013, held in Bangalore, India, in June 2013. The 35 revised full papers presented together with an invited paper, 12 short

papers and 3 poster papers were carefully reviewed and selected from 65 submissions. The full papers are organized in the following topical sections: IS success and failure; studies of IT adoption; software development; IT in the public sector; and theory and methods.

Planning, Implementation and Evaluation Springer

"This book presents the latest research, case studies, best practices, and methodologies within the field of IT project management, offering research from top experts around the world in a variety of IT project management applications and job sectors"--Provided by publisher.

Management Accounting in Enterprise Resource Planning Systems

Butterworth-Heinemann This book brings together recent qualitative research studies in enterprise-wide implementations. This collection is useful as a teaching case for academia, a student reference and also for academics, researchers and IT practitioners who wish to gain a broad view of ERP implementation success and failure, This book provides relevant methodologies and recent

empirical research findings in the area and includes sufficient background information for an understanding of each case but focuses on providing a rich description of more than a dozen real life cases.

Leadership, Innovation and Entrepreneurship as Driving Forces of the Global Economy

CRC Press

Managing Business with SAP: Planning, Implementation and Evaluation is important to all IT managers as it addresses the reasons why many ERP systems fail, and how IT managers can improve the rate of successful implementation.

ENTERprise Information Systems, Part II Pearson Education India

As information resource management becomes increasingly dependent on emerging technologies to combat its challenges and decipher its effective strategies, the demand builds for a critical mass of research in this area. Innovative Technologies for Information Resource Management brings together compelling content related to the continually emerging technologies in areas of information systems such

as Web services, electronic commerce, distance learning, healthcare, business process management, and software development. Focusing on the implications innovative technologies have on the managerial and organizational aspects of information resource management, this book provides academicians and practitioners with a requisite and enlightening reference source.

[Introduction to Information Systems](#)

Springer

Organizations of all types are consistently working on new initiatives, product lines, or implementation of new workflows as a way to remain competitive in the modern business environment. No matter the type of project at hand, employing the best methods for effective execution and timely completion of the task at hand is essential to project success. *Project Management: Concepts, Methodologies, Tools, and Applications* presents the latest research and practical solutions for managing every stage of

the project lifecycle. Emphasizing emerging concepts, real-world examples, and authoritative research on managing project workflows and measuring project success in both private and public sectors, this multi-volume reference work is a critical addition to academic, government, and corporate libraries. It is designed for use by project coordinators and managers, business executives, researchers, and graduate-level students interested in putting research-based solutions into practice for effective project management.

International Conference, CENTERIS 2010, Viana do Castelo, Portugal, October 20-22, 2010, Proceedings, Part II IGI Global

Current evidence points to management accountants using traditional software (such as spreadsheets) for budgeting, ABC, balanced scorecards and other performance management techniques independent of, rather than integrated with Enterprise Resource Planning (ERP) Systems.

While there has been some limited research on the effects of ERP systems on management accountants, this report provides a comprehensive analysis of the consequences of implementation of ERP systems for management accountants. • This report provides a theoretical basis for studying the impact of Enterprise Resource Planning (ERP) systems on management accounting and provides critical insights into the opportunities provided by ERP systems for the most efficient use of management accounting techniques. • The seven UK case studies of ERP implementations reveal the correlation between the success of the system implementation and the development of the role of management accountants in business partners thereby identifying the changes and skills required of management accountants. • The book provides guidance to management accountants on the changes they need to make in order to achieve the most from an ERP system implementation.
