Quality Gaging Tips contains 144 instructive articles, arranged by topic, which originally appeared in a regular column (of the same name) in Modern Machine Shop magazine. Each of the articles presents valuable insights gained from years of experience and knowledge, and each is designed to assist the reader to 1) better understand the principles of gaging, and 2) improve their personal techniques. Both the science and the 'art' of dimensional gaging are stressed, providing a full understanding of the methodology along with detailed instructions on how to perform specific tasks properly. Emphasis throughout is on problem-solving ability, inventiveness, and creativity. In this path-breaking book, Jeb Sprague investigates the dangerous world of right-wing paramilitarism in Haiti and its role in undermining the democratic aspirations of the Haitian people. Sprague focuses on the period beginning in 1990 with the rise of Haiti's first democratically elected president, Jean-Bertrand Aristide, and the right-wing movements that succeeded in driving him from power. Over the ensuing two decades, paramilitary violence was largely directed against the poor and supporters of Aristide's Lavalas movement, taking the lives of thousands of Haitians. Sprague seeks to understand how this occurred, and traces connections between paramilitaries and their elite financial and political backers, in Haiti but also in the United States and the Dominican Republic. The product of years of original research, this book draws on over fifty interviews—some of which placed the author in severe danger—and more than 11,000 documents secured through Freedom of Information Act (FOIA)

requests. It makes a substantial contribution to our understanding of Haiti today, and is a vivid reminder of how democratic struggles in poor countries are often met with extreme violence organized at the behest of capital.

Advance Praise for The Rescue "Steven Trent Smith grapples boldly with several big subjects: the Japanese occupation of the Philippines; the capture of Japan's 'Z Plan' (the decisive-battle strategy for destroying the U.S. Pacific Fleet); the rescue by submarine of forty Americans stranded in the Philippines; the climactic Battle of the Philippine Sea. Meticulously researched and well written, The Rescue ties these elements together into an epic that is emotionally engaging from start to rousing finish."--Martin Russ, author of Breakout and The Last Parallel "Smith's thoroughly researched, detailed account of the brave American and Filipino guerrillas on Negros Island in the Philippines will do much to introduce readers to this little-known aspect of World War II in the Pacific. Operating in the most primitive conditions,

suffering the deprivations of living and fighting in the wild, these guerrillas were a formidable army and did much to win the war for the Allies in World War II. And the courageous and resourceful submariners of the USS Crevalle of the Pacific Fleet went well beyond the call of duty to rescue their fellow Americans from harm's way. This is a fascinating story well told." --Elizabeth Norman, author of the award-winning We Band of Angels: The Untold Story of American Nurses Trapped on Bataan by the Japanese "The Rescue is a delightful journey with the gallant few who resisted the Japanese occupation of the Philippines and who shaped the larger events which led to victory in the Pacific. Smith's brilliant research and unique storytelling make this account a must for all who enjoy history and a grand adventure."--Peter Huchthausen, author of Hostile Waters "With a photojournalist's eye for action and detail, Steven Trent Smith's The Rescue is a remarkable achievement. The incredible mission to save forty Americans stranded in the Philippines reads more like a work of fiction. This story could easily grace the big screen of your local movie theater, with a plot filled with non-stop action, amazing twists of fate, and an incredible cast of characters, complete with a climax that's certain to get the pulse pounding. A must-read for all those interested in one of the great secret submarine operations of World War II and all action adventure fans alike!"--Richard P. Henrick, author of Crimson Tide and Nightwatch

There was a time, as recently as the 1980s, when storefronts, murals, banners, barn signs, billboards, and even street signs were all hand-lettered with brush and paint. But, like many skilled trades, the sign industry has been overrun by the techno-fueled promise of quicker and cheaper. The resulting proliferation of computer-designed, die-cut vinyl lettering and inkjet printers has ushered a creeping sameness into our visual landscape.

Fortunately, there is a growing trend to seek out traditional sign painters and a renaissance in the trade. In 2010 filmmakers Faythe Levine, coauthor of *Handmade Nation*, and Sam Macon began documenting these dedicated practitioners, their time-honored methods, and their appreciation for quality and craftsmanship. *Sign Painters*, the first anecdotal history of the craft, features stories and photographs of more than two dozen sign painters working in cities throughout the United States. With a foreword by legendary artist (and former sign painter) Ed Ruscha, this vibrant book profiles sign painters young and old, from the new vanguard working solo to collaborative shops such as San Francisco's New Bohemia Signs and New York's Colossal Media's Sky High Murals.

The ideas of US Air Force Colonel John Boyd have transformed American military policy and practice. A first-rate fighter pilot and a self-taught scholar, he wrote the first manual on jet aerial combat; spearheaded the design of both of the Air Force's premier fighters, the F-15 and the F-16; and shaped the tactics that saved lives during the Vietnam War and the strategies that won the Gulf War. Many of America's best-known military and political leaders consulted Boyd on matters of technology, strategy, and theory. In *The Mind of War*, Grant T. Hammond offers the first complete portrait of John Boyd, his groundbreaking ideas, and his enduring legacy. Based on extensive interviews with Boyd and those who knew him as well as on a close analysis of Boyd's briefings, this intellectual biography brings the work of an extraordinary thinker to a broader public.

This little journal asks 100 questions related to political and social positions to help you better understand where you stand politically. Are you a progressive with a mind so open your brain is about to fall out, as conservatives might say? Or are you a conservative with views so primitive, a caveman looks liberal, as progressives might say? Each question gives you one page to answer, allowing you to reflect on your positions and maybe think of things in a new light. Remember, there are no right or wrong answers here, just left, right, and middle ones! Have fun with it, or rant and rage about why everyone else is wrong and stupid. This notebook is great for all political affiliations, whether Democrat, Republican, or some 3rd party like Libertarian or Green Party. As a word of caution, though, I'd keep it locked tightly away as if it were a real diary. After all, politics, especially today's politics, are apt to cause fights to break out!
