This volume provides a clear and compelling introduction to the most controversial moral and legal problems in society. Focusing on ethical and legal decision making, it directs attention to the issues raised by the general public and by students of law, philosophy, justice, and social policy. Some frequently asked questions and examples address basic life and death issues: abortion and infanticide; care of children, at risk because of predatory priests or alternatives to medicine; capital punishment, in general and excluding juveniles and the mentally retarded; right to die, including physician-assisted suicide and euthanasia. Other frequently asked questions and examples address administrative practices: affirmative action, especially in higher education; professional conduct of lawyers, doctors, and educators; sexual conduct, including homosexual behavior and same-sex marriage; privacy, as a personal problem and a Constitutional right. The materials examine many controversies in ethical and legal decision making: where competing moral and ethical values come from; how to balance reason and faith as significant factors; what the role of personal religious, political, and philosophical views is in deciding; which method is of use in interpreting the U.S. and State Constitutions; what factors to use in the confirmation of Justices and others; the importance of stability v. the necessity for change in addressing moral problems; whether legislatures or courts can better solve contemporary problems; the wide variety of views of ethical and legal decision making. The extensive bibliography directs students and the public interested in further material to the important world where ethics and law, morality and public policy interact. This brief and readable book is the first place to look for

what most people want to know about law and ethics.

Ethical and Legal Aspects of Nursing National Academies Press
Ethics and regulation have become catchwords of the late 1990s, yet relatively little has been written about the ethical discourse and regulation of the legal professions in England and Wales. This book represents the first attempt to subject the ethical discourse of the English legal professions to in-depth analysis and sustained critique. Drawing on insights from moral philosophy, social theory, the sociology of the legal profession, public law theories of regulation, and the extensive American literature on lawyers' ethics, it argues that, in seeking to provide definitive answers to particular problems of professional conduct, professional legal ethics has failed to deliver an approach which requires lawyers actively to engage with the ethical issues raised by legal practice. Through an analysis of the core issues facing lawyers, the authors locate this failure in the profession's reliance on a liberal and adversarial role morality that conceptualises the ethical values of human dignity, autonomy and equality in a formalistic and narrowly legalistic manner. This encourages lawyers to overlook the real invasions of these values so often wrought by upholding clients legal rights, and to ignore the competing claims of affected third parties, the wider community and the environment. In seeking to move beyond critique, the authors develop throughout the book a contextual approach to individual ethical decision-making and outline a range of institutional, regulatory and educational reforms which, they suggest, could form the basis for a more ethical brand of professionalism. Professional Legal Ethics: Critical Interrogations is a wide-ranging and thought-provoking analysis written for lawyers, ethicists and policy-makers interested in this neglected area of professional ethics and regulation.

Thinking about Law and Ethics Aspen Publishing

Are all of the commonly accepted aims of the use of law justifiable? Which kinds of behavior are justifiably prohibited, which kinds justifiably required? What uses of law are not defensible? How can the legitimacy or the illegitimacy of various uses of law be explained or accounted for? These are questions the answering of which involves one in many issues of moral principle, for the answers require that one adopt positions - even if only implicitly - on further questions of what kinds of actions or policies are morally or ethically acceptable. The present work, aimed at questions of these kinds, is thus a study in the ethical evaluation of major uses of legal coercion. It is an attempt to provide a framework within which many questions about the proper uses of law may be fruitfully discussed. The framework, if successful, can be used by anyone asking questions about the defensibility of particular or general uses of law, whether from the perspective of someone considering whether to bring about some new legal provision, from the perspective of someone concerned to evaluate an existing provision, or from that of someone concerned more abstractly with questions about the appropriate substance of an ideal legal system. In addressing these and associated issues, I shall be exploring the extent to which an ethics based on respect for persons and their autonomy can handle satisfactorily the problems arising here.
