## SIENA LYRIC

**Air Born** Rowman & Littlefield  
Founded by Thomas H. Davis in 1948, Piedmont Airlines was one of the most respected regional airlines of its time. This exhaustive history follows the airline from its humble beginnings at Smith Reynolds Airport in Winston-Salem, North Carolina, to its 1989 absorption into USAir after a buyout at the highest price ever commanded by a regional airline. Drawing upon corporate documents, local news stories, and countless personal interviews with former Piedmont employees, the author tells the airline's history in detail. Nearly 100 photographs show the airline's development, and two appendices provide

comprehensive lists of its fleet and service destinations. Fully indexed.

## FIRST TO FLY

Penguin Classics

On a windy afternoon in early spring Rory MacLean fell to earth in Anissari, a village surrounded by white mountains in an ancient corner of Crete. MacLean's mother had died only a few months earlier and he had been engulfed by grief. But an old desire had also taken hold to build and fly an aeroplane. And so he set off to the land where Daedalus and Icarus had made their maiden flight and settled in to days of eating lamb and drinking wine with his Cretan neighbours and, with their help, attempting to build a Woodhopper from scratch and make it fly.

DigiCat Publishing presents to you this special edition of "A Book of Myths" by Jean Lang. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature. **American Heritage History of Flight** Steam Press  
"The Flight has been safe for months, now. The locals have no idea that we spend every spare hour in the air, soaring high above their tiny rural town. Our cover story was a stroke of genius, even if I say so myself." "It's been the best summer ever." "Of course, it couldn't last." When a

stranger appears asking awkward questions, the Flight knows the fragile peace is over. Their cover is blown, and their enemies are closing in. But even with the promise of another Icarus, and the possibility of a new haven, the Flight is divided. Tensions rise, tempers flare, and loyalties are tested. With the Flight splintering, Kestrel is once again caught in the middle. Her conscience pushes her after Condor, while her heart is not ready to give Hawk up. Kestrel is forced to choose. And she doesn't know it, but the very lives of the Flight are at stake.

### **A Feminist Reader in Early Cinema**

It's the ultimate battle of good versus good. They were best friends at an elite academy for superheroes in training, but now Callie Bradford, code name Iridium, and Joannie Greene, code name Jet, are mortal enemies. Jet is a by-the-book hero, using her Shadow power to protect the citizens of New Chicago. Iridium, with her mastery of light, runs the city's underworld. For the past five years the two have played an elaborate, and frustrating, game of cat and mouse. But now playtime's over. Separately Jet and Iridium uncover clues that point to a looming evil, one that is entwined within the Academy. As Jet works with Bruce Hunter—a normal man with an extraordinary ability to make her weak in the knees—she becomes convinced that Iridium is involved in a scheme that will level the power structure of America itself. And Iridium, teaming with the mysterious vigilante called Taser, uncovers an insidious plot that's been a decade in the making...a plot in which Jet is key. They're both right. And they're both wrong. Because nothing is as simple as Black and White.

Earth's survivors cling to life on an unforgiving, distant planet, next to the sun! Three generations after the crash of the colony ship Icarus, lapyx is barely hanging on: one of thirteen cities suspended halfway down deep chasms. The sun on the diamond lands above will kill a man in less than five minutes. The ticktock monsters in the fog forest below are a little slower -- but quite a bit smarter. An electromagnetic wash has disabled the computers, the radios, even the lightbulbs. It's the steam and clockwork age reborn: a careful society, rationed and stratified. Which suits Simon Daud just fine. Simon likes the rules, and knows his place -- in the shadow of his older brother, Isaac. All he wants is to earn his wings as an ornithopter pilot and get to work in the flight bays. But on his final test

flight, something goes wrong. Isaac is killed. Simon is burned; his body will never be the same. Neither will his world. Not everything in lapyx is quite as it seems, and through his rehabilitation Simon falls into the middle of a conspiracy that will bring everything he's ever known to the ground. Down in the fog forest, monsters await -- but so does the truth . . . if Simon can survive long enough to find it.

*Mars Geological Enigmas* Compass Point Books

The first anthology in a rapidly expanding area of cinema studies.

### **THE FLIGHT OF ICARUS; AN IDYL OF PRINTING-HOUSE SQUARE**

Xlibris Corporation

"On-point historical photographs combined with strong narration bring the story of the historic first flight ever to life. Kids will feel as though they are at Kitty Hawk with Wilbur and Orville Wright as the brothers prepare to test their aircraft. They'll also learn about the history of flight and the skepticism that greeted the Wrights when they, at first, refused to release the photograph of their successful flight"--

*Minos and the Moderns* Spectra

An original inquiry into how the artistic psyche interacts with myth; includes a catalogue of the works of British artist Michael Ayrton.

### **GENERATIONS**

DigiCat

"There is a palpable need for business to explore the issues Dhanda raises. Guiding Icarus offers a flight plan." -from the Foreword by Philip R. Reilly Guiding ICARUS Merging Bioethics with Corporate Interests Rahul K. Dhanda While bioethicists may enjoy the most thorough appreciation of both the promise and perils of new biotechnologies, international corporations are in fact the entities generating these technologies and determining their application. An industry insider versed in the language of bioethics, Rahul Dhanda offers in Guiding Icarus: Merging Bioethics with Corporate Interests a Rosetta stone to these two camps, explaining why each needs the other, why their disparate concerns often cohere, and why an ethical business is likely a successful one. The author develops a dialogue between bioethics and corporate interests by examining case studies of several hot-button issues, including: \* Genetically modified foods \* DNA data banking \* Personalized medicine \* Stem cell research In each instance he provides a treatment of the particular science under consideration, a list of the benefits of the technology, a description of the ethical

issues involved, an account of past industry response, and recommendations for future action. Given the expansive nature of biotechnology, ramifications in the pharmaceutical and agricultural industries are covered in depth as well. The book also features a Foreword by world-renowned bioethicist and biotechnology CEO Philip R. Reilly as well as a step-by-step discussion of the components of business and bioethical issues. Written for a general audience, Guiding Icarus will be particularly useful to biotechnologists, regulatory affairs managers, and corporate officers of biotechnology firms, as well as bioethicists in the academic community. Dhanda's peerless text provides a unique tool for understanding and addressing the ethical dilemmas confronting society in the 21st century.

### **Falling for Icarus** Air Born

NASA—the National Aeronautics and Space Administration created in the wake of the Space Act—has and continues to accomplish those precepts every day. With many hundreds of satellites launched into space and close to 200 human spaceflights, NASA is a proven leader in space exploration. Most of the US space exploration efforts have been led by NASA, including the Apollo moon-landing missions, the Skylab space station, and later the Space Shuttle. Currently, NASA is supporting the International Space Station and is overseeing the development of the Orion Multi-Purpose Crew Vehicle, the Space Launch System and Commercial Crew vehicles. NASA is also responsible for the Launch Services Program which provides oversight of launch operations and countdown management for unmanned NASA launches. The Historical Guide to NASA and the Space Program contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 500 cross-referenced entries on space missions, astronauts, technical terms, space shuttles, satellites and the international space station. This book is an excellent access point for students, researchers, and anyone wanting to know more about NASA and space exploration. *Bits of Spirit & Parts of Soul* "...reclaiming the archetypes of creation within. Oxford University Press

Among the many successes of the Soviet Union were inaugural space flight—ahead of the United States—and many other triumphs related to aviation. Aviators and cosmonauts enjoyed heroic status in the Soviet Union, and provided supports of the Soviet project with iconic figures which could be used to bolster the regime's

visions, self-confidence, and the image of itself as forward looking and futuristic. This book explores how the themes of aviation and space flight have been depicted in film, animation, art, architecture, and digital media. Incorporating many illustrations, the book covers a wide range of subjects, including the representations of heroes, the construction of myths, and the relationship between visual art forms and Soviet/Russian culture and society.

For decades, Germany has been shaped and reshaped by the sounds of popular music—whether viewed as uniquely German or an ideological invader from abroad. This collected volume brings together leading figures in the field of German Studies, popular music studies, and cultural studies at large to survey the sociopolitical impact of music on conceptions of the German state and national identity, gender and sexuality, and transnational cultural production and consumption, expanding on the ways in which sounds, technologies, media practices, and exchanges of popular music provide a unique glimpse into the cultural dynamics of postwar Germany.

**Third Time Lucky** Berghahn Books

In late 19th-century Paris, the writer Hubert is shocked to discover that Icarus, the protagonist of the new novel he's working on, has vanished. Looking for him among the manuscripts of his rivals does not solve the mystery, so a detective is hired to find the runaway character.

**Historical Guide to NASA and the Space Program** Wayne State University Press

Called by some the French Borges, by others the creator of le nouveau roman a generation ahead of its time, Raymond Queneau's work in fiction continues to defy strict categorization. The Flight of Icarus (*Le Vol d'Icare*) is his only novel written in the form of a play: seventy-four short scenes, complete with stage directions. Consciously parodying Pirandello and Robbe-Grillet, it begins with a novelist's discovery that his principal character, Icarus by name, has vanished. This, in turn, sets off a rash of other such disappearances. Before long, a number of desperate authors are found in search of their fugitive characters, who wander through the Paris of the 1890s, occasionally meeting one another, and even straying into new novels. Icarus himself—perhaps following the destiny his name suggests—develops a passion for horseless carriages, kites, and machines that fly. And throughout the almost

vaudevillian turns of the plot, we are aware, as always, of Queneau's evident delight at holding the thin line between farce and philosophy.

*Piedmont Airlines* Elsevier

*Minos and the Moderns* considers three mythological complexes that enjoyed a unique surge of interest in early twentieth-century European art and literature: Europa and the bull, the minotaur and the labyrinth, and Daedalus and Icarus. All three are situated on the island of Crete and are linked by the figure of King Minos. Drawing examples from fiction, poetry, drama, painting, sculpture, opera, and ballet, *Minos and the Moderns* is the first book of its kind to treat the role of the Cretan myths in the modern imagination. Beginning with the resurgence of Crete in the modern consciousness in 1900 following the excavations of Sir Arthur Evans, Theodore Ziolkowski shows how the tale of Europa-in poetry, drama, and art, but also in cartoons, advertising, and currency—was initially seized upon as a story of sexual awakening, then as a vehicle for social and political satire, and finally as a symbol of European unity. In contrast, the minotaur provided artists ranging from Picasso to Dürrenmatt with an image of the artist's sense of alienation, while the labyrinth suggested to many writers the threatening sociopolitical world of the twentieth century. Ziolkowski also considers the roles of such modern figures as Marx, Nietzsche, and Freud; of travelers to Greece and Crete from Isadora Duncan to Henry Miller; and of the theorists and writers, including T. S. Eliot and Thomas Mann, who hailed the use of myth in modern literature. *Minos and the Moderns* concludes with a summary of the manners in which the economic, aesthetic, psychological, and anthropological revisions enabled precisely these myths to be taken up as a mirror of modern consciousness. The book will appeal to all readers interested in the classical tradition and its continuing relevance and especially to scholars of Classics and modern literatures.

### MYTH AND THE CREATIVE PROCESS

Duke University Press

*Generations* injects fresh energy into tired debates about England's plural and protracted Reformations by adopting the fertile concept of generation as its analytical framework. It demonstrates that the tumultuous religious developments that stretched across the sixteenth and seventeenth centuries not merely transformed the generations that experienced them, but were also forged

and created by them. The book investigates how age and ancestry were implicated in the theological and cultural upheavals of the era and how these, in turn, reconfigured the relationship between memory, history, and time. It explores the manifold ways in which the Reformations shaped the horizontal relationships that early modern people formed with their siblings, kin, and peers, as well as the vertical ones that tied them to their dead ancestors and their future heirs. *Generations* highlights the vital part that families bound by blood and by faith played in shaping these events, as well as in mediating our knowledge of the religious past and in the making of its archive. Drawing on a rich array of evidence, it provides poignant glimpses into how people navigated the profound challenges that the English Reformations posed in everyday life.

*First Flight* Calder Publications Limited

In *The Icarus Deception*, Seth Godin's most inspiring book, he challenges readers to find the courage to treat their work as a form of art. Everyone knows that Icarus's father made him wings and told him not to fly too close to the sun; he ignored the warning and plunged to his doom. The lesson: Play it safe. Listen to the experts. It was the perfect propaganda for the industrial economy. What boss wouldn't want employees to believe that obedience and conformity are the keys to success? But we tend to forget that Icarus was also warned not to fly too low, because seawater would ruin the lift in his wings. Flying too low is even more dangerous than flying too high, because it feels deceptively safe. The safety zone has moved. Conformity no longer leads to comfort. But the good news is that creativity is scarce and more valuable than ever. So is choosing to do something unpredictable and brave: Make art. Being an artist isn't a genetic disposition or a specific talent. It's an attitude we can all adopt. It's a hunger to seize new ground, make connections, and work without a map. If you do those things you're an artist, no matter what it says on your business card. Godin shows us how it's possible and convinces us why it's essential. 'If Seth Godin didn't exist, we'd need to invent him' Fast Company 'Seth Godin is a demigod on the web, a bestselling author, highly sought-after lecturer, successful entrepreneur, respected pundit and high-profile blogger' Forbes Seth Godin is the author of thirteen international bestsellers that have changed the way people think about marketing, the ways ideas spread, leadership and change including

Permission Marketing, Purple Cow, All Marketers are Liars, The Dip and Tribes. He is the CEO of Squidoo.com and a very popular lecturer. His blog, [www.sethgodin.typepad.com](http://www.sethgodin.typepad.com), is the most

influential business blog in the world, and consistently one of the 100 most popular blogs on any subject..
