Venture into First for Schools is an international course preparing secondary students for the Cambridge English: First for Schools exam. The course prepares students for exam success from the outset with systematic skills development and scaffolded exam practice in every unit. Exam guides offer tips and hints for every

task type, and students can prepare for the examination with the online practice test. Covering a huge range of topics, from The Simpsons to Shakespeare, the course encourages cultural insights and critical thinking and keeps students motivated to achieve success.

The world's most popular spreadsheet program is now more powerful than ever, but it's also more complex. That's where this Missing Manual comes in. With crystal-clear explanations and hands-on examples, *Excel 2013: The Missing Manual* shows you how to master Excel so you can easily track, analyze, and chart your data. You'll be using new features like PowerPivot and Flash Fill in no time. The important stuff you need to know: Go from novice to ace. Learn how to analyze your data, from writing your first formula to charting your results. Illustrate trends. Discover the clearest way to present your data using Excel's new Quick Analysis feature. Broaden your analysis. Use pivot tables, slicers, and timelines to examine your data from different perspectives. Import data. Pull data from a variety of sources, including website data feeds and corporate databases. Work from the Web. Launch and manage your workbooks on the road, using the new Excel Web App. Share your worksheets. Store Excel files on SkyDrive and collaborate with colleagues on Facebook, Twitter, and LinkedIn. Master the new data model. Use PowerPivot to work with millions of rows of data. Make calculations. Review financial data, use math and scientific formulas, and perform statistical analyses.

LASER A2 : [NEW LEVEL]. CLASS AUDIO CD : INCLUDES MATERIAL FOR KET

Ballantine Books

Extensive additional material in the format of a full-colour workbook, that enables students to consolidate and enrich their language and practice exam skills.

Distributed Optimization and Statistical Learning Via the Alternating Direction Method of Multipliers MacMillan

Destination B1: Grammar and Vocabulary has been designed for intermediate students at B1 (Threshold) level on the Council of Europe's Common European Framework Scale. It is the ideal grammar and vocabulary practice books for all students preparing to take any B1 level exam: e.g. Cambridge PET and for students working towards B2 level exams in the future.

OPTIMISE B2 STUDENT BOOK PREMIUM PACK FOR ENGLISH CONNECTION.

Wangari Maathai, founder of The Green Belt Movement, tells its story including the philosophy behind it, its challenges, and objectives.

Gateway B1 Now Publishers Inc

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Sharing the Approach and the Experience Edumond

A comprehensive introduction to the tools, techniques and applications of convex optimization.

B1 Cambridge University Press

Destination C1 & C2 : Grammar and Vocabulary is the ideal grammar and vocabulary practice book for all advanced students preparing to take any C1 & C2 level exam: e.g. Cambridge CAE and Cambridge CPE.

Optimise B1+ (Intermediate) Teacher's Book Premium Pack

An exciting and intensive skills based course which focuses on themes from contemporary teen culture
