The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been

overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's

fleet are also noted. An appendix gives the location of all major African airports.

Local Air Service to Small Communities, Hearings Before the Subcommittee on Aviation...91-2, April 10, 13, May 27, 28, June 19, and August 24, 1970

Up-to-date, authoritative information on military capabilities in the Middle East. The explosion of violence between Israelis and Palestinians that began in late 2000 is a tragic reminder of the potential for armed conflict in the Middle East. Although many developments in the 1990s appeared to have reduced the likelihood of war in the region, stability between Israel and its Arab neighbors

remains tenuous. Security in the Persian Gulf also remains uncertain, as Iran and Iraq have continued their pursuit of weapons of mass destruction. Understanding the dynamics of security in the Middle East requires detailed information on the military capabilities of the region's countries. The Middle East Military Balance is prepared annually by the Jaffee Center for Strategic Studies in Tel Aviv. It is based on data from many sources, including some that are unavailable to other institutes. With its wealth of current, hard-to-find information, it offers an authoritative and indispensable guide to military capabilities in the

Middle East. Governments, the media, and researchers pay close attention to its data and analysis each year.
