The chess playing mind does not work like a machine. Selecting a

move results from rather chaotic thought processes and is not the logical outcome of applying a rational method. The only problem with that, says International Master Willy Hendriks, is that most books and courses on improving at chess claim exactly the

opposite. The dogma of the chess instruction establishment is that if you only take a good look at certain 'characteristics' of a position, then good moves will follow more or less automatically. But this is not how it happens. Chess players, weak and strong, don't first judge the position, then formulate a plan and afterwards look at moves. It all happens at the same time, and pretending that it is otherwise is counterproductive. There is no use in forcing your students to mentally jump through theoretical hoops, according to experienced chess coach Hendriks. This work shows a healthy distrust of accepted methods to get better at chess. It teaches that winning games does not depend on ticking off a to-do list when looking at a position on the board. It presents club and internet chess players with loads of much-needed no-nonsense training material. In this provocative, entertaining and highly instructive book, Hendriks shows how you can travel light on the road to chess improvement!

Every chess player needs to decide which openings he is going to play. But where do you start? The risk of drowning in the turbulent sea of opening theory is only too real for beginning amateurs. Often your goals and ambitions will be misguided. If you are trying to win in 20 moves, copy what's in fashion among top-GM's or memorize variations, you are wasting your time. Most likely you will never get to play your 'preparation' and end up aimlessly switching from one opening to the other. Experienced French chess trainer Vincent Moret provides a complete, ready-to-go chess opening repertoire for White with a sound set of lines that do not outdate rapidly, do not require memorization and are easy to digest for beginners and post-beginners. To show the typical plans and the underlying ideas in the various lines of his repertoire, Moret not only selected games of grandmasters. He mainly uses games of young, improving players to highlight the errors they tend to make. With many exercises to test your understanding of the ideas behind the repertoire.

#### Modernized Comprehensive Chess Course Series

Over a quarter of a century ago, the first edition of this book (published in East Germany in 1981) was a huge best seller. Yet unfortunately it was never reprinted and it soon became a scarce collector's item. The reason: one of its co-authors, the chess trainer Gerhard Schmidt, left for the West. He thus became persona non grata in East Germany and the book was banned there. Despite the book's excellent qualities, which were acclaimed in chess circles, from then on its success could only be an underground one. However, the subject of the book is timeless and transcends frontiers, and so at last we have a new edition, fully revised by the original authors themselves to include modern games by world-class players such as Garry Kasparov, Vishy Anand, Vladimir Kramnik and Judit PÁlgar. The book explains, clearly, systematically and comprehensively, the strategy and tactics associated with the open file: how files are opened, blocked, occupied and exploited as roads along which to invade the enemy position. A brief introduction lays the theoretical foundations and is followed by carefully selected and organised material in the form of illustrative games, in all of which the open file is the dominant or deciding factor. In each game there is a pause at a key position where a clear verbal assessment is given; these assessments alone are of huge instructional value, since they do nothing less than teach the reader how strong chessplayers think: what to look for, how to assess, how to plan. The book benefits not only from Gerhard Schmidt's experience as a trainer but also from the huge knowledge and skill gained by Grandmaster Wolfgang Uhlmann during his long and successful career in top-class chess, which at one point brought him close to putably one of Germany's greatest ever Book jacket.

Every chess player needs to decide which openings he or she is going to play. But where do you start? The risk of drowning in the turbulent sea of chess opening theory is only too real for beginning amateurs. Often your goals and ambitions will be misguided. Most likely you will never get to play your 'preparation' and end up aimlessly switching from one opening to the other.

After the success of his volume for White, experienced French chess trainer Vincent Moret now provides a complete, ready-to-go chess opening repertoire for Black. It consists of a sound set of lines that do not outdate rapidly, do not require memorization and are easy to digest for beginners and post-beginners. To show the typical plans and the underlying ideas in the various lines of his repertoire, Moret not only selected games of Grandmasters. By carefully choosing variations that lead to similar structures, IM Sam Collins has put together a powerful repertoire book ideal for players with limited study time. White opens with 1 e4 and develops his pieces to natural squares, seeking open lines and the initiative. The dominant theme of this sound and active repertoire is that - where reasonable - White seeks out Isolated Queen Pawn (IQP) positions: i.e. with the c3 Sicilian, Panov Caro-Kann, Tarrasch French, and the Italian Game with early c3 and d4. There are no speculative gambits here, just plenty of healthy aggression and new ideas. Because so many of Collins's recommendations lead to familiar structures, ideas can easily be transplanted from one opening to another. He gives illustrative games that emphasize the key themes, including White's many opportunities to forcibly weaken and attack the black king. The specific analysis is up-to-the-minute and features ideas that have proven their worth in grandmaster practice. Throughout there is attention to move-order subtleties, with clever nuances in 'sidelines' that your opponents are unlikely to have examined in detail. Irish international master Sam Collins won the championship of his home country in 2002 and 2014. He has represented Ireland in numerous Olympiads, winning an individual gold medal at Bled in 2002. He is also an experienced chess teacher who has lectured at the Berkeley Chess School in California. His previous books for Gambit were Chess Explained: The c3 Sicilian and the highly successful general opening work Understanding the Chess Openings.
