The true story of two mass-casualty incidents that occurred within days of each other at a US Air Force base. Using the words of the people who experienced the tragedies, the book provides in-depth look at the before, during and after of a preventable active-shooter incident and an avoidable fatal plane crash. The base psychiatrist knew the airman was dangerous. "This is the kind of patient who ... one day ... he's going to come back and kill you." Aircrews knew the rogue pilot was dangerous. "We predicted the worst air-show disaster in history when we found out that he was gonna fly." Written by Andy Brown, the man who ended the killing spree,

the result of more than seven years of research. Brown "masterfully weaves" the two stories together in a powerful narrative. He also reveals the preparations he made that enabled him to end a pistol-versus-rifle gunfight with a 70 yard shot from his handgun. Part true crime, part law-enforcement biography memoir and part military history. Warnings Unheeded is presented in an objective style that shows what can happen when authorities become complacent, when the precursors of violence are ignored and the lessons from history are forgotten.

Andrew Carnegie is remembered as one of the world's great philanthropists. As a boy, he witnessed the benevolence of a businessman who lent his personal book collection to laborer's apprentices. That early experience inspired Carnegie to create the "Free to the People" Carnegie Library in 1895 in Pittsburgh, Pennsylvania. In 1896, he founded the Carnegie Institute, which included a music hall, art museum, and science museum. Carnegie deeply believed that education and culture could lift up the common man and should not be the sole province of the wealthy. Today, his

Pittsburgh cultural institution encompasses a library, music hall, natural history museum, art museum, science center, the Andy Warhol Museum, and the Carnegie International art exhibition. In *Palace of Culture*, Robert J. Gangewere presents the first history of a cultural conglomeration that has served millions of people since its inception and inspired the likes of August Wilson, Andy Warhol, and David McCullough. In this fascinating account, Gangewere details the political turmoil, budgetary constraints, and cultural tides that have influenced the caretakers and the collections along the way. He profiles the

many benefactors, trustees, directors, and administrators who have stewarded the collections through the years. Gangewere provides individual histories of the library, music hall, museums, and science center, and describes the importance of each as an educational and research facility.

Moreover, Palace of Culture documents the importance of cultural institutions to the citizens of large metropolitan areas. The Carnegie Library and Institute have inspired the creation of similar organizations in the United States and serve as models for museum systems throughout the world.

This book is a step-by-step guide to building your own SharePoint farm in a home lab setting. Learn how to build a windows domain and then join servers into the domain in order to create your own testing and learning environment. After you get the domain stood up, where you go from there is up to you. This book will help you learn how to spin up SharePoint in a least privileged fashion. This isn't strictly a SharePoint book, though. For example, if you're not a SharePoint professional and are just looking to create a working windows domain for other purposes; the home-lab domain that you'll create will work great for Exam preparation

for non-SharePoint purposes. You could even use it for learning how to install Exchange Server. After all, it's your Home Lab domain. In this book you will build your home-lab domain and you'll have a great place for learning how to administer SharePoint and develop SharePoint Apps. Here are just some of the tasks you'll complete in easy to follow exercises: Create a windows domain and a certificate authority, so that you can run SharePoint on SSL Join servers to the domain and configure other technology on the member servers as needed Install SQL Server, and correctly partition the server in accordance with best practices Install and

configure a SharePoint farm Spin up Host Named Site Collections (HNSC's) Install and configure Visual Studio Who This Book Is For: This book is suitable for both developers and administrators. No technical knowledge is assumed beyond a general familiarity with computers and computing terminology. The resulting domain will be suitable for both IT and developer testing needs.

We've all taken a dislike to someone for no real reason. But few of us nurture this hatred like the narrator of "Moon-Face". The target of his irrational malice is a man named John Claverhouse. With cold precision, the narrator sets to planning the man's downfall. Why he has this urge, he can't explain. But he knows he'll feel immense satisfaction when John Claverhouse is made to suffer. In this macabre little tale, Jack London pinpoints a very common but unpleasant human trait. And then takes it to a horrifying extreme. This short story collection also includes "All Gold

Canyon", which was adapted as part of the Netflix anthology movie "The Ballad of Buster Scruggs". Jack London (1876–1916) was one of the first American writers to achieve worldwide celebrity. He did so with rugged adventure stories set in forbidding landscapes. And heroes who survive by embracing their most primal instincts. His breakthrough best seller was "The Call of the Wild". Inspired by his time in the Klondike Gold Rush, this hard-hitting novel is told from the perspective of a sled dog named Buck. It's inspired many adaptations, including a big-budget movie starring Harrison Ford. Among London's other notable works are "White Fang", also featuring a canine

protagonist, as well as "Eden" and "The Iron
"The Sea-Wolf", "Martin Heel".
