#### DATA SHEET RECIPROCATING HOLDER APPARATUS 7 AGILENT

Data Sheet Reciprocating Holder ApparatusThe standard apparatus has seven reciprocating positions for each of the six rows with 100 or 300 mL outer tubes. The holder has a stroke length of 20 mm and agitates at 5 to 40 dips per minute. Following a designated time period, the dosage form is transported from one row to the next, and can be programmed to move to a fresh row of media, up to six media changes.Reciprocating Holder Apparatus 7 | AgilentDATA SHEET Reciprocating Holder Apparatus 7 Agilent Reciprocating Holder Apparatus 7 is designed for modified, extended and sustained drug-release performance testing. The system uses a reciprocating motion to dip the dosage form into fresh media at programmed time intervals. Configurable. Select standard 50 mLDATA SHEET Reciprocating Holder Apparatus 7Data Sheet Reciprocating Holder Apparatus DATA SHEET Reciprocating Holder Apparatus 7 Agilent Reciprocating Holder Apparatus 7 is designed for modified, extended and sustained drug-release performance testing.
