The Republic of Korea achieved a double revolution in the second half of the twentieth century. In just over three decades, South Korea transformed itself from an underdeveloped, agrarian country into an affluent, industrialized one. At the same time, democracy replaced a long series of military authoritarian regimes. These historic changes began under President Park Chung Hee, who seized power through a military coup in 1961 and ruled South Korea until his assassination on October 26, 1979. While the state's dominant role in South Korea's rapid industrialization is widely accepted, the degree to which Park was personally responsible for changing the national character remains hotly debated. This book examines the rationale and ideals behind Park's philosophy of national development in order to evaluate the degree to which the national character and moral values were reconstructed.

Reassessing the Park Chung Hee Era, 1961-1979 Ibooks for Young Readers

An unflinching portrayal of the Korean immigrant experience from an extraordinary new talent in fiction. Spanning Korea and the United States, from the postwar era to contemporary times, Krys Lee's stunning fiction debut, *Drifting House*, illuminates a people torn between the traumas of their collective past and the indignities and sorrows of their present. In the title story, children escaping famine in North Korea are forced to make unthinkable sacrifices to survive. The tales set in America reveal the immigrants' unmoored existence, playing out in cramped apartments and Koreatown strip malls. A makeshift family is fractured when a shaman from the old country moves in next door. An abandoned wife enters into a fake marriage in order to find her kidnapped daughter. In the tradition of Chang-rae Lee's *Native Speaker* and Jhumpa Lahiri's *Interpreter of Maladies*, *Drifting House* is an unforgettable work by a gifted new writer.

Based on personal interviews with the principal policy-makers of the 1970s, *Korea's Development under Park Chung-Hee* examines how the president sought to develop South Korea into an independent, autonomous sovereign state both economically and militarily. Kim provides a new narrative in the complex task of exploring the paradoxical nature and effects of Korea's rapid development which maintains that any judgement of Park must consider his achievements in the socio-economic, cultural and political context in which they took place. Aspects of Park's government analyzed include: *his abhorrence of Korea's reliance on the US presence *the Korean model of state-guided industrialization *Park's rapid development strategy *the role of the ruling elites *Park's clandestine nuclear development program *the heavy chemical industrialisation of the 1970s The prevailing popularity of Park in the eyes of the Korean public is significant and relevant to their acceptance of how their national development was achieved. This book tells that story while simultaneously recognizing the flaws in the process. With a great deal of material never before published, scholars of Korean politics and history at all levels will find this book a stimulating account of South Korea in the 1960s and 1970s.

American business folklore is awash with the adventures of successful entrepreneurs. Still, most of these stories are about Americans, neglecting important and courageous entrepreneurs from other countries. *Made in Korea* recounts the story of how Chung Ju Yung rose from poverty to build one of the world's largest and most successful building empires - Hyundai - through a combination of creative thinking, tenacity, timing, political skills, and a business strategy that few competitors ever understood. Chung entered the shipbuilding business with no experience and went on to create the world's largest shipyard. He began making automobiles when foreign experts unanimously predicted he would fail, and he started a global construction company that has built some of today's greatest architectural wonders. He even convinced the International Olympic Committee to

select South Korea over Japan as the site for the highly successful 1988 Olympics. Unlike most CEO's of major firms, Chung has always preferred the company of his workers to that of the global executive elite. Hard work, creativity and a capacity to never give up - this is the essence of Chung's life. In each of his ventures, he exhibited a sheer determination to succeed, regardless of the obstacles, and he worked tirelessly to instil this drive in all of his employees. Even today, in the midst of Korea's worst economic crisis in over four decades, Chung's company is busy implementing plans to emerge as an even stronger contender in the world economy. Illustrated with 32 pages of colour photographs not previously seen in the West, including photos of Chung's recent historic visit to North Korea in 1998, Made in Korea takes stock of Chung's entire life, highlighting both his contributions to society and the lessons his work can teach to aspiring entrepreneurs.

Yet over time, even Jaehee leaves Young to settle down, leaving him alone to care for his ailing mother and to find companionship in his relationships with a series of men, including one whose handsomeness is matched by his coldness, and another who might end up being the great love of his life. A brilliantly written novel that takes us into the glittering nighttime of Seoul and the bleary-eyed morning after with both humor and emotion, Love in the Big City is a wry portrait of millennial loneliness as well as the abundant joys of queer life.

The multi-faceted tensions created in developing countries between a burgeoning popular desire for democracy and the harsh imperatives of modernisation and industrialisation are nowhere more evident than in the so-called 'Asian tiger' nations. Of all those nascent economies, South Korea in the 1960s and 1970s stands pre-eminent for the magnitude and speed of its development and the extraordinarily oppressive and inhumane conditions that its labour force, mainly women and young girls, were compelled to endure. The author of this book was one of those young girls who suffered in the warren of sweat-shop garment factories in the slums of central Seoul. With little or no support from male co-workers, and despite their political naivety and the traditionally subordinate status of Korean females, the women textile and garment workers confronted the ruling authority at all levels. The author's mother was one of their leaders, and her eldest brother sacrificed his life for their cause. Despite appalling state-directed violence, betrayal by erstwhile colleagues, the chicanery and mendacity of employers' cooperatives and countless other setbacks, these uneducated and overworked women finally succeeded in forming the first fully democratic trade union in the history of Korea. Based on compelling personal accounts this is the first published account of the women's struggle, and it throws much light on the process of modernisation and industrialisation in Korea and beyond.

Based on actual events, The Guest is a profound portrait of a divided people haunted by a painful past, and a generation's search for reconciliation. During the Korean War, Hwanghae Province in North Korea was the setting of a gruesome fifty-two day massacre. In an act of collective amnesia the atrocities were attributed to American military, but in truth they resulted from malicious battling between Christian and Communist Koreans. Forty years later, Ryu Yosop, a minister living in America returns to his home village, where his older brother once played a notorious role in the bloodshed. Besieged by vivid memories and visited by the troubled spirits of the deceased, Yosop must face the survivors of the tragedy and lay his brother's soul to rest. Faulkner-like in its intense interweaving narratives, The Guest is a daring and ambitious novel from a major figure in world literature.

A NATIONAL BESTSELLER This beloved memoir "is an extraordinary, honest, nuanced and compassionate look at adoption, race in America and families in general" (Jasmine Guillory, Code Switch, NPR) What does it mean to lose your roots—within your culture, within your family—and what happens when you find them? Nicole Chung was born severely premature, placed for adoption by her Korean parents, and raised by a white family in a sheltered Oregon town. From childhood, she heard the story of her adoption as a comforting, prepackaged myth. She believed that her biological parents had made the ultimate sacrifice in the hope of giving her a better life, that forever feeling slightly out of place was her fate as a transracial adoptee. But as Nicole grew up—facing prejudice her adoptive family couldn't see, finding her identity as an Asian American and as a writer, becoming ever more curious about where she came from—she wondered if the story she'd been told was the whole truth. With warmth, candor, and startling insight, Nicole Chung tells of her search for the people who gave her up, which coincided with the birth of her own child. All You Can Ever Know is a profound, moving chronicle of surprising connections and the repercussions of unearthing painful family secrets—vital reading for anyone who has ever struggled to figure out where they belong.

Cursed Bunny is a genre-defying collection of short stories by Korean author Bora Chung. Blurring the lines between magical realism, horror, and science-fiction, Chung uses elements of the fantastic and surreal to address the very real horrors and cruelties of patriarchy and capitalism in modern society. Anton Hur's translation skilfully captures the way Chung's prose effortlessly glides from being terrifying to wryly humorous. Winner of a PEN/Heim Grant.

"Passionate, cantankerous, and fascinating. Rather like Korea itself."—Nicholas D. Kristof, New York Times Book Review Korea has endured a "fractured, shattered twentieth century," and this updated edition brings Bruce Cumings's leading history of the modern era into the present. The small country, overshadowed in the imperial era, crammed against great powers during the Cold War, and divided and decimated by the Korean War, has recently seen the first real hints of reunification. But positive movements forward are tempered by frustrating steps backward. In the late 1990s South Korea survived its most severe economic crisis since the Korean War, forcing a successful restructuring of its political economy. Suffering through floods, droughts, and a famine that cost the lives of millions of people, North Korea has been labeled part of an "axis of evil" by the George W. Bush administration and has renewed its nuclear threats. On both sides Korea seems poised to continue its fractured existence on into the new century, with potential ramifications for the rest of the world.
