THE EUROPA WORLD YEAR BOOK 2003

Martinus Nijhoff Publishers
First published in 2001. Routledge is an imprint of Taylor & Francis, an information company.
Old and New Islam in Greece Marshall Cavendish International Asia Pte Ltd
This first-of-a-kind volume provides a snapshot of existing science communication policy and practice in India across different S&T sectors, and offers solutions to building effective communication. It provides an understanding on how to avoid societal clashes in situations when science meets the public in these sectors. The editors and contributors argue that effective S&T communication leads not only to a more informed public but also benefits research itself, and in a changing society like India this is a crucial element related to good governance and policy making. In this volume, experienced masters of the craft provide practical solutions to

making S&T communication more effective in a vast democracy like India, which has complex issues related to literacy levels, diverse languages, varying political will, reach, and resources. Through discussions on cases of creating information modules for the public on the Internet, television and radio, social media, as well as traditional ways of outreach like people's science movements, holding popular science events, and fairs, the volume provides highly valuable directions on how developing countries with low resources and complex populations can communicate S&T research to the public and bridge communication gaps. This volume will interest researchers from science, social science, mass communication and public relations departments, journalists, as well as practitioners and policy makers from government and non-government institutions involved in S&T policy, practice and communication and people who want to understand the complex S&T landscape of India.

"Today's hearing, as the title indicates,

will examine the 2010 Census Integrated Communications Campaign in hard-to-count areas. The hearing will assess and examine ethnic print and broadcast media's role in preventing an undercount. We will further examine avenues to aid the Census Bureau in its efforts to reach those who are more likely to be undercounted--children, minorities, and renters."--P. 1.

Peppered with heartfelt accounts and charming anecdotes, Urdu film magazines were in great favour with the public from the 1930s through the 1990s – a considerable period of seven decades. Unfortunately, as Urdu got progressively marginalised in later years, these magazines were not archived, for the most part; leading to their inevitable disappearance from popular imagination. Tracking down these lost publications, Yasir Abbasi followed leads – some futile, some fruitful – to obscure towns and people's homes in a last-ditch effort to save valuable records of Indian cinema. As challenging as it was to locate faded issues and original texts, he managed to uncover and translate many fabulous memoirs covering a wide gamut of our favourite old artistes at their candid best. A gloom-laced piece on Meena Kumari by Nargis, a rollicking description by Raja Mehdi Ali Khan of an eventful evening with Manto (not to mention a mysterious woman and a house on fire), Jaidev writing about his chequered career, Balraj Sahni introspecting about the relevance of Hindi and Urdu in films –

it's a rich mix of engrossing narratives brought back from oblivion.

The Islamic resistance movement
'Hamas' is, arguably, one of the most
important Palestinian organizations in
recent decades. Since Hamas'
establishment, it has extensively utilized
media as a means of mobilization for its
political and ideological agendas, and its
tactics have undergone a remarkable
evolution, from graffiti art to satellite
broadcasting. This book presents the
first systematic and historical
contextualization of the development of
Hamas' media strategy. It determines
three key phases in Hamas'
development and explores the complex
and important relationship at work
between its politics and use of media.
Assessing four elements of the Hamas
media strategy; the media message
(discourse), the media objectives, the
infrastructure, and the target audience,
this book tracks how Hamas grew its
media infrastructure, and looks at how
the idea of resistance has permeated the
media discourse. Determining both

tactical and strategic objectives and detailing the various layers to the target audience, it offers the first in-depth academic study of the Hamas media strategy. This book's exploration of the key role the media plays in the Palestinian issue makes it a timely and relevant contribution to the study of the Israeli-Palestinian Conflict and a valuable resource for students, scholars and policymakers working in Middle Eastern studies.

From Historical Minorities to Immigrant Newcomers All India Radio (AIR), New Delhi

Since independence in 1947 India has remained a stable and functioning democracy in the face of enormous challenges. Amid a variety of interlinking contraries and a burgeoning media – one of the largest in the world – there has been a serious dearth of scholarship on the role of journalists and dramatically

changing journalism practices. This book brings together some of the best known scholars on Indian journalism to ask questions such as: Can the plethora of privately run cable news channels provide the discursive space needed to strengthen the practices of democracy, not just inform results from the ballot boxes? Can neoliberal media ownership patterns provide space for a critical and free journalistic culture to evolve? What are the ethical challenges editors and journalists face on a day-to-day basis in a media industry which has exploded? In answering some of these questions, the contributors to this volume are equally sensitive to the historical, social, and cultural context in which Indian journalism evolved, but they do not all reach the same conclusion about the role of journalism in Indian civil society and democracy. This book was originally published as a special issue of *Journalism Studies*.
