In the old days there were songs... Something is bothering Russel
Susskit. He hates waking up to the sound of his father's coughing,
the smell of diesel oil, the noise of snow machines starting up.
Only Oogruk, the shaman who owns the last team of dogs in the

village, understands Russel's longing for the old ways and the songs that celebrated them. But Oogruk cannot give Russel the answers he seeks; the old man can only prepare him for what he must do alone. Driven by a strange, powerful dream of a long-ago self and by a burning desire to find his own song, Russel takes Oogruk's dogs on an epic journey of self-discovery that will change his life forever.

Without the close, there is no sale. Pretty obvious, right? Yet, for many salespeople, closing is the most baffling and elusive part of the selling process. All too often, salespeople meet qualified clients and charm them with an eloquent presentation, only to see the sale mysteriously slip from between their fingers in the end. Which is sad when you consider all the hard work – the prospecting, preparation, planning, and practice – done for the sake of a moment of truth that never arrives. Fortunately, closing is an art that can be mastered, and now *Sales Closing For Dummies* shows you how. Packed with powerful principles that can help you become a top-producing salesperson, *Sales Closing For Dummies* is the ultimate guide to mastering that most mysterious part of the selling equation. Tom Hopkins, the legendary sales genius who, by age 30 was the nation's leading real-estate trainer, demystifies closing and shows what it takes to be a champion closer, including how to: Lead a sale without being pushy Read the signs of an interested potential buyer Use questioning methods that close sales, time and again Help clients feel good about their buying decisions Keep your clients' business

and build their loyalty Build long-term relationships and watch your sales grow With the help of dozens of real-life examples from a wide cross section of industries, Tom shows why professional selling is about communication, not coercion. And he shares his considerable insight and experience on: Verbal and visual buying cues and how to recognize them Choosing the best location for closing Addressing concerns and creating a sense of urgency Time-tested tactics and strategies for ending customer procrastination, overcoming their fear, closing from a distance, and more The ten biggest closing mistakes and how to avoid them Add-on selling and other ways of getting your clients to help you to build your business Featuring Tom's Hopkins' trademark "Red Flag" key points and situation scripts, this fun, easy-to-understand guide arms you with the hands-on tools and techniques you'll need to become a world-class closer.

The second edition of Leisure for Canadians builds on the work started in the first effort published in 2007. This second edition introduces a new theme within the larger leisure literature, that of sport and events management. Seven new chapters focusing on various aspects of sport and event planning have been added, along with a chapter on the built environment and leisure behavior. As was the case in the first edition, this text is comprised of chapters written by scholars from across Canada. All the contributors were asked to imagine they were talking with someone who asked, "What do we know about [your topic]?" The individual and collective goal was to bring the reader up to date on what is known on that topic. This text is appropriate for

new students to leisure hoping to grasp key issues as well as more advanced students seeking to explore leisure's complex role in our society. The contributors have worked hard to bring the most current thinking on a wide variety of topics. Together, they paint a picture of both the challenges and opportunities that leisure presents.

DARPA Global Autonomous Language Exploitation Macmillan Higher Education

This comprehensive handbook, written by leading experts in the field, details the groundbreaking research conducted under the breakthrough GALE program--The Global Autonomous Language Exploitation within the Defense Advanced Research Projects Agency (DARPA), while placing it in the context of previous research in the fields of natural language and signal processing, artificial intelligence and machine translation. The most fundamental contrast between GALE and its predecessor programs was its holistic integration of previously separate or sequential processes. In earlier language research programs, each of the individual processes was performed separately and sequentially: speech recognition, language recognition, transcription, translation, and content summarization. The GALE program employed a distinctly new approach by executing these processes simultaneously. Speech and language recognition algorithms now aid translation and transcription processes and vice versa. This combination of previously distinct processes has produced significant research and performance breakthroughs and has fundamentally changed the natural language processing and machine translation fields. This comprehensive handbook provides an exhaustive exploration into these latest technologies in natural language, speech and signal processing, and machine translation, providing researchers, practitioners and students with an authoritative reference on the topic.

Beautiful Lady* Emily dreams of the rapture of love and the joys of marriage. The youngest daughter of an English lord at war, she is shaken by the arrival of a mysterious stranger to her father's castle. Could this breathtaking man be Emily's yearned-for lover? Indeed, Draven de Montague, Earl of Ravenswood, has come for Emily . . . but romance has nothing to do with it. In the *Tender Embrace of an Enemy* . . . Draven would never have entered the home of his most hated adversary had not the King himself ordered him to take in his foe's daughter for a year to forge bonds of peace between their two feuding houses. Worse still, here is a lass whose exquisite loveliness could tempt Draven to betray his sworn vow never to let another close to his heart. Emily knows the searing heat of her passion could burn down the defenses of this proud warrior. But will the surrender of the sweet nectar of his

lips and his bold, sensuous caress ignite a blaze so hot it consumes them both?

Examination & Board Review Garland Science

Mind-opening writing on what kids need from school, from one of education's most outspoken voices. Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him "perhaps the country's most outspoken critic of education's fixation on grades [and] test scores." Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn's unmistakable voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question "Why Self-Discipline Is Overrated." And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both punishing and praising children for what they do instead of

parenting "unconditionally." Whether he's talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought. This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a refreshing perspective on today's debates about kids and schools.
