The early
modern period
is arguably
the most
pivotal of all in

the study of
the mind,
teeming with
a variety of
conceptions of
mind. Some of
these posed
serious
questions for
assumptions
about the
nature of the
mind, many of
which still
depended on

notions of the

It is an era
that witnessed
the
emergence of
theories and

dualism,
vitalism,

materialism, and idealism. Covering pivotal figures in philosophy such as Descartes, Hobbes, Kant, Leibniz, Cavendish, and Spinoza, *Philosophy of Mind in the Early Modern and Modern Ages* provides an outstanding survey of philosophy of mind of the period. Following an introduction by Rebecca Copenhaver, sixteen specially commissioned chapters by an international

team of contributors discuss key topics, thinkers, and debates, including: Hobbes, Descartes' philosophy of mind and its early critics, consciousness, the later Cartesians, Malebranche, Cavendish, Locke, Spinoza, Descartes and Leibniz, perception and sensation, desires, mental substance and mental activity, Hume, and Kant. Essential reading for students and

researchers in philosophy of mind, enlightenment philosophy, and the history of philosophy, *Philosophy of Mind in the Early Modern and Modern Ages* is also a valuable resource for those in related disciplines such as religion, history of psychology, and history of science. *Descartes* Routledge Philosophy for AS and A Level is an accessible textbook for the new 2017

AQA Philosophy syllabus. Structured closely around the AQA specification this textbook covers the two units shared by the AS and A Level, Epistemology and Moral Philosophy, in an engaging and student- friendly way. With chapters on 'How to do philosophy', exam preparation providing students with the philosophical skills they need to succeed, and an extensive glossary to	support understanding , this book is ideal for students studying philosophy. Each chapter includes: argument maps that help to develop student's analytical and critical skills comprehensio n questions to test understanding discussion questions to generate evaluative argument explanation and commentary on the AQA set texts 'Thinking harder'	sections cross- references to help students make connections bullet-point summaries of each topic. The Routledge Companion to Metaphysics Routledge Imagination occupies a central place in philosophy, going back to Aristotle. However, following a period of relative neglect there has been an explosion of interest in imagination in the past two decades as philosophers examine the role of imagination in debates about the mind and cognition, aesthetics and ethics, as well as epistemology,

science and mathematics. This outstanding Handbook contains over thirty specially commissioned chapters by leading philosophers organised into six clear sections examining the most important aspects of the philosophy of imagination, including: Imagination in historical context: Aristotle, Descartes, Hume, Kant, Husserl, and Sartre What is imagination? The relation between

imagination and mental imagery; imagination contrasted with perception, memory, and dreaming Imagination in aesthetics: imagination and our engagement with music, art, and fiction; the problems of fictional emotions and 'imaginative resistance' Imagination in philosophy of mind and cognitive science: imagination and creativity, the self, action, child development,

and animal cognition Imagination in ethics and political philosophy, including the concept of 'moral imagination' and empathy Imagination in epistemology and philosophy of science, including learning, thought experiments, scientific modelling, and mathematics. The Routledge Handbook of Philosophy of Imagination is essential reading for students and researchers in

philosophy of mind and psychology, aesthetics, and ethics. It will also be a valuable resource for those in related disciplines such as psychology and art. *Routledge Philosophy Guidebook to Heidegger and Being and Time* Psychology Press Was Descartes a Cartesian Dualist? In this controversial study, Gordon Baker and Katherine J. Morris argue that, despite the general consensus within philosophy, Descartes was neither a proponent of dualism nor guilty of the many crimes of which he has been accused by twentieth century philosophers. In lively and engaging prose, Baker and Morris present a radical revision of the ways in which Descartes' work has been interpreted. Descartes emerges with both his historical importance assured and his philosophical importance redeemed. [Routledge Philosophy Guidebook to Hegel on History](#) Routledge Descartes has often been called the 'father of modern philosophy'. His attempts to find foundations for knowledge, and to reconcile the existence of the soul with the emerging science of his time, are among the most influential and widely studied

in the history of philosophy. This is a classic and challenging introduction to Descartes by one of the most distinguished modern philosophers. Bernard Williams not only analyzes Descartes' project of founding knowledge on certainty, but uncovers the philosophical motives for his search. With acute insight, he demonstrates how Descartes' Meditations are not merely a description

but the very enactment of philosophical thought and discovery. Williams covers all of the key areas of Descartes' thought, including God, the will, the possibility of knowledge, and the mind and its place in nature. He also makes profound contributions to the theory of knowledge, metaphysics and philosophy generally. With a new foreword by John Cottingham. Routledge Philosophy

GuideBook to Wittgenstein and On Certainty Routledge Philosophy, Science, and History: A Guide and Reader is a compact overview of the history and philosophy of science that aims to introduce students to the groundwork of the field, and to stimulate innovative research. The general introduction focuses on scientific theory change, assessment,

discovery, and pursuit. Part I of the Reader begins with classic texts in the history of logical empiricism, including Reichenbach's discovery-justification distinction. With careful reference to Kuhn's analysis of scientific revolutions, the section provides key texts analyzing the relationship of HOPOS to the history of science, including texts by Santayana, Rudwick, and Shapin and Schaffer. Part II provides texts illuminating central debates in the history of science and its philosophy. These include the history of natural philosophy (Descartes, Newton, Leibniz, Kant, Hume, and du Châtelet in a new translation); induction and the logic of discovery (including the Mill-Whewell debate, Duhem, and Hanson); and catastrophism versus uniformitarianism in natural history (Playfair on Hutton and Lyell; de Buffon, Cuvier, and Darwin). The editor's introductions to each section provide a broader perspective informed by contemporary research in each area, including related topics. Each introduction furnishes proposals, including thematic bibliographies, for innovative research questions and projects in the classroom and in the field.

Psychology Press
This book develops new techniques in formal epistemology and applies them to the challenge of Cartesian skepticism. It introduces two formats of epistemic

evaluation that should be of interest to epistemologists and philosophers of science: the dual-component format, which evaluates a statement on the basis of its safety and informativeness, and the relative-divergence format, which evaluates a probabilistic model on the basis of its complexity and goodness of fit with data. Tomoji Shogenji shows that the former lends support to Cartesian

skepticism, but the latter allows us to defeat Cartesian skepticism. Along the way, Shogenji addresses a number of related issues in epistemology and philosophy of science, including epistemic circularity, epistemic closure, and inductive skepticism. *Routledge Philosophy Guidebook to Descartes and The Meditations* Routledge

UNDERSTANDING RATIONALISM

Routledge
This book introduces student to the three major figures of modern philosophy known as the rationalists. It is not for complete beginners, but it is an accessible account of

their thought. By concerning itself with metaphysics, and in particular substance, the book relates an important historical debate largely neglected by the contemporary debates in the once again popular area of traditional metaphysics. in philosophy. *Routledge Philosophy GuideBook to Anscombe's Intention* Routledge Kierkegaard is widely regarded as the 'father of existentialism' , although his

influence can be observed across the spectrum of twentieth century continental philosophy and philosophy of religion. Fear and Trembling is his most compelling and popular work and is heralded as a benchmark in twentieth century philosophy. The Routledge Philosophy Guidebook to Kierkegaard and Fear and Trembling examines the major themes that arise in this classic work of

religious and existential philosophy. It also explores the broader aspects of Kierkegaard's influence on philosophy as a whole. The book assumes no previous knowledge of Kierkegaard's work and will be essential reading for any student studying the ideas of this important thinker. Kierkegaard and *Fear and Trembling* introduces and assesses: Kierkegaard's life and the background to *Fear and Trembling* The

ideas and text of *Fear and Trembling*, his most famous work Kierkegaard's continuing importance in philosophy. *Between Two Worlds* Psychology Press This guidebook will be an indispensable introduction to what is one of the most important texts in the history of philosophy. A solid grasp of the main themes and arguments of the seventeenth-century philosopher René Descartes is essential for understanding modern thought, and a necessary entrée to the work of the Empiricists and Immanuel Kant. It is also crucial to the

study of contemporary epistemology, metaphysics, and philosophy of mind. This new edition of Georges Dicker's commentary on Descartes's masterpiece, *Meditations on First Philosophy*, features a new chapter on the Fourth Meditation and improved treatments of the famous cogito ergo sum and the notorious problem of the Cartesian Circle, among numerous other improvements

and updates. Clear and accessible, it serves as an introduction to Descartes's ideas for undergraduates and as a sophisticated companion to his *Meditations* for advanced readers. The volume provides a thorough discussion of several basic issues of epistemology and metaphysics elicited from the main themes and arguments of the *Meditations*. It also delves into the work's

historical background and critical reception. Dicker offers his own assessments of the Cartesian Doubt, the cogito, the causal and ontological proofs of	God's existence, Cartesian freedom and theodicy, Cartesian Dualism, and Descartes's views about the existence and nature of the material world. The commentary also	incorporates a wealth of recent Descartes scholarship, and inculcates -- but does not presuppose -- knowledge of the methods of contemporary analytic philosophy.
