Feminist Political Ecology explores the gendered relations of ecologies, economies and politics in communities as diverse as the rubber tappers in the rainforests of Brazil to activist groups fighting racism in New York City. Women are often at the centre of these struggles, struggles which concern local knowledge, everyday practice, rights to resources, sustainable development, environmental quality, and social justice. The book bridges the gap between the academic and rural orientation of political ecology and the largely activist and urban focus of environmental justice movements.

Topic Continuity in Discourse HarperCollins

Making Russians is an innovative study dealing with Russian nationalities policy in Lithuania and Belarus in the aftermath of the 1863 Uprising. The book devotes most attention to imperial confessional and language policy, for in Russian discourse at that time it was religion and language that were considered to be the most important criteria determining nationality. The account of Russian nationalities policy presented here differs considerably from the assessments usually offered by historians from east-central Europe primarily because the author provides a more subtle description of the aims of imperial nationalities policy, rejecting the claim that the Russian authorities consistently sought to assimilate members of other national groups. At the same time the interpretation this study offers opens a discussion with western and Russian historians, especially those, who lay heavy emphasis on discourse analysis. This study asserts that the rhetoric of officials and certain public campaigners was influenced by a concept of political correctness, which condemned all forms of ethnic denationalisation. A closer look at the implementation of discriminatory policy allows us to discern within Russian imperial policy more attempts to assimilate or otherwise repress the cultures of non-dominant national groups than it is possible to appreciate simply by analysing discourse

alone.
