Crescendo! is a comprehensive intermediate Italian program designed to help you build proficiency in all four language skills (listening, reading, speaking, and writing) and to expand your cultural knowledge of contemporary Italy. The main goal of the textbook and the accompanying workbook/lab manual is to encourage you to use your language skills actively and creatively in meaningful communication. The text reviews and expands on all important grammar structures, but unlike other Italian grammar review books, it focuses on language usage rather than abstract concepts. To achieve these goals, chapters are thematically arranged, and the vocabulary and grammar structures emphasized in each chapter are those that you need to express your thoughts on the topics featured.

STUDI E PROBLEMI DI CRITICA TESTUALE

During the Age of Revolution, Paris came alive with wildly popular virtuoso performances. Whether the performers were musicians or chefs, chess players or detectives, these virtuosos transformed their technical skills into dramatic spectacles, presenting the marvelous and the outré for spellbound audiences. Who these characters were, how they attained their fame, and why Paris became the focal point of their activities is the subject of Paul Metzner's absorbing study. Covering the years 1775 to 1850, Metzner describes the careers of a handful of virtuosos: chess masters who played several games at once; a chef who sculpted hundreds of four-foot-tall architectural fantasies in sugar; the first police detective, whose memoirs inspired the invention of the detective story; a violinist who played whole pieces on a single string. He examines these virtuosos as a group in the context of the society that was then the capital of Western civilization. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1999.

ROUTLEDGE HANDBOOK TO LUIGI NONO AND MUSICAL THOUGHT

Heinle & Heinle Publishers

This volume gives language teachers, software designers, and researchers who wish to use technology in second or foreign language education the information they need to absorb what has been achieved so far and to make sense of it. It is designed to enable the kind of critical reading of a substantial literature that leads to a balanced and detailed knowledge of the field. Chapter by chapter, the book builds, through description, analysis, examples, and discussion, a detailed picture of modern CALL. In this book, the label "CALL" is interpreted broadly to include technology-enhanced language learning, Web-enhanced

language learning, and information and communication technologies for language learning. The work is distinguished by its attention to a range of languages rather than just English. The authors first set the scene and introduce major areas of interest and growth in CALL, and then look in depth at seven important dimensions: design, evaluation, computer-mediated communication, theory, research, practice, and technology. Chapters on each of these topics include a description that reviews the recent literature, identifies themes, and presents representative projects that illustrate the dimension, followed by a discussion that provides in-depth analysis, and a conclusion offering suggestions for further work. Detailed references and links connect the description and discussion with original works and primary sources so the reader can follow up easily on areas of personal interest. Two concluding chapters discuss how the various dimensions might be brought together, the first from a practical point of view, the second with a view to the development of CALL as a whole.

Crescendo! an Intermediate Italian Program 2E with Audio CD + Workbook/Lab Manual Ballantine Books

This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir

as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun one” by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

Of the post-war, post-serialist generation of European composers, it was Luigi Nono who succeeded not only in identifying and

addressing aesthetic and technical questions of his time, but in showing a way ahead to a new condition of music in the twenty-first century. His music has found a listenership beyond the ageing constituency of 'contemporary music'. In Nono's work, the audiences of sound art, improvisation, electronic, experimental and radical musics of many kinds find common cause with those concerned with the renewal of Western art music. His work explores the individually and socially transformative role of music; its relationship with history and with language; the nature of the musical work as distributed through text, time, technology and individuals; the nature and performativity of the act of composition; and, above all, the role and nature of listening as a cultural activity. In many respects his music anticipates the new technological state of culture of the twenty-first century while radically reconnecting with our past. His work is itself a case study in the evolution of musical activity and the musical object: from the period of an apparently stable place for art music in Western culture to its manifold new states in our century.

Routledge Handbook to Luigi Nono and Musical Thought seeks to trace the evolution of Nono's musical thought through detailed examination of the vast body of sketches, and to situate this narrative in its personal, cultural and political contexts.

Welcome to the second edition of Avanti! In the new edition our priorities remain the same as those of the first edition, to provide an introductory language course that meets the needs of both instructors and learners. Three significant characteristics set Avanti! apart from other first-year Italian texts: First, Avanti!

satisfies students' desire to communicate in everyday situations right from the start and to explore Italy's rich and unique culture in meaningful ways. Second, Avanti! responds to instructors' concern that most textbooks attempt to cover too much material in the first year. We have designed an elementary course that reflects reasonable expectations for the amount of material that most beginning learners can acquire in one year of classroom instruction. Third, the methodology of Avanti! is firmly grounded in current findings of research in second language acquisition and foreign language pedagogy. The materials provide support for instructors, particularly those with limited experience, whose goals are to teach mainly, if not exclusively, in Italian, and to create the student-centered, communicative classroom environment that is promoted by this research. The title Avanti! was chosen to convey the forward-thinking approach of this exciting new program.

How do mafias work? How do they recruit people, control members, conduct legal and illegal business, and use violence? Why do they establish such a complex mix of rituals, rules, and codes of conduct? And how do they differ? Why do some mafias commit many more murders than others? This book makes sense of mafias as organizations, via a collative analysis of historical accounts, official data, investigative sources, and interviews. Catino presents a comparative study of seven mafias around the world, from three Italian mafias to the American Cosa Nostra, Japanese Yakuza, Chinese Triads, and Russian mafia. He identifies the organizational architecture that characterizes these criminal groups, and relates different organizational models to the use of violence. Furthermore, he advances a theory on the specific functionality of mafia rules and discusses the major organizational dilemmas that mafias face. This book shows that understanding the organizational logic of mafias is an indispensable step in confronting them.
