International provides courses for participants that intend to work on onshore drilling and production platforms. Training courses are taught by professionals from the oil and gas industry with current knowledge and years of field experience. The participants will get all the necessary competencies to work on the onshore drilling rigs and on the onshore oil

and gas rigs. It is intended also for non-drilling and non-production personnel who work in drilling, exploration and production industry. This includes logistics personnel, accounting, administrative and support staff, environmental professionals, etc. This course provides a non-technical overview of the phases, operations and terminology used on

onshore oil and gas rigs. It is intended also for non-production personnel who work in the onshore drilling, exploration and production industry. This includes logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of production operations is required. This course will provide participants a better

understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations. *Objective Electrical Technology* S. Petrogav International "University Physics is a three-volume collection that meets the scope and sequence requirements for two- and three-

semester calculus-based physics courses. Volume 1 covers mechanics, sound, oscillations, and waves. This textbook emphasizes connections between theory and application, making physics concepts interesting and accessible to students while maintaining the mathematical rigor inherent in the subject. Frequent, strong examples focus on how

to approach a problem, how to work with the equations, and how to check and generalize the result."--Open Textbook Library.
