*Case Studies in Clinical Laboratory
Science* Garland Science

This case study is about a 29-year-old professional oboe player who was first diagnosed for optic neuritis and then for multiple sclerosis (MS). MS is an example of a T-cell mediated autoimmune disease, wherein there is an autoimmune attack on the integrity of the central nervous system.

CASE STUDIES IN IMMUNOLOGY: DEFICIENCY OF THE C8 COMPLEMENT COMPONENT

Garland Science

The second edition of *Avian Immunology* provides an up-to-date overview of the current knowledge of avian immunology. From the ontogeny of the avian immune system to practical application in vaccinology, the book encompasses all aspects of innate and adaptive immunity in chickens. In addition, chapters are devoted to the immunology of other commercially important species such as turkeys and ducks, and to ecoimmunology summarizing the knowledge of immune responses in free-living birds often in relation to reproductive success. The book contains a detailed description of the avian innate immune system, encompassing the mucosal, enteric, respiratory and reproductive systems. The diseases and disorders it covers include

immunodepressive diseases and immune evasion, autoimmune diseases, and tumors of the immune system.

Practical aspects of vaccination are examined as well. Extensive appendices summarize resources for scientists including cell lines, inbred chicken lines, cytokines, chemokines, and monoclonal antibodies. The world-wide importance of poultry protein for the human diet, as well as the threat of avian influenza pandemics like H5N1 and heavy reliance on vaccination to protect commercial flocks makes this book a vital resource.

This book provides crucial information not only for poultry health professionals and avian biologists, but also for comparative and veterinary immunologists, graduate students and veterinary students with an interest in avian immunology. With contributions from 33 of the foremost international experts in the field, this book provides the most up-to-date review of avian immunology so far. Contains a detailed description of the avian innate immune system reviewing constitutive barriers, chemical and cellular responses; it includes a comprehensive review of avian Toll-like receptors. Contains a wide-ranging review of the "ecoimmunology" of free-living avian species, as applied to studies of population dynamics, and reviews methods and resources available for carrying out such research.

*Case Studies in Immunology:
Rheumatoid Arthritis* Garland Science
This text emphasizes the human immune system and presents concepts with a balanced level of detail to describe how the immune system works.

Written for undergraduate, medical, veterinary, dental, and pharmacy students, it makes generous use of medical examples to illustrate points. This classroom-proven textbook offers clear writing, full-color illustrations, and section and chapter summaries that make the content accessible and easily understandable to students.

CASE STUDIES IN IMMUNOLOGY: INTERFERON- γ RECEPTOR DEFICIENCY

Garland Science

This book presents case histories to illustrate in a clinical context essential points about the mechanisms of immunity. It includes cases that illustrate both recently discovered genetic immunodeficiencies and some more familiar and common diseases with interesting immunology.

Case Studies in Immunology: Congenital Asplenia Garland Science Immunology 4E, by Roitt, Brostoff and Male, is now the standard immunology textbook. Hundreds of specially designed full color artworks explain the whole topic, from basic concepts through to recent advances. Case Studies in Immunology builds on this approach with 42 clinical case studies to emphasize the importance of this science to clinical practice. Each case study is followed by test questions and answers so that you can check your understanding of the pathogenesis, diagnosis and management of immune-related diseases. Detailed discussion of each ensures that this is truly a learning exercise. Page references to Immunology 4E make it easier for you to refer back to the basic immunology when considering your answers. As a revision aid, or as a companion to

Immunology 4E, this book is an essential self-learning study tool for all students of immunology.

Case Studies in Immunology Garland Science

Case Studies in Immunology, Seventh Edition is intended for medical students and undergraduate and graduate students in immunology. It presents major topics of immunology through a selection of clinical cases that reinforce and extend the basic science. Each case history is preceded by essential scientific facts about the immunological mechanisms o

JANEWAY'S IMMUNOBIOLOGY

Garland Science

Written in the same engaging conversational style as the acclaimed first edition, *Primer to The Immune Response*, 2nd Edition is a fully updated and invaluable resource for college and university students in life sciences, medicine and other health professions who need a concise but comprehensive introduction to immunology. The authors bring clarity and readability to their audience, offering a complete survey of the most fundamental concepts in basic and clinical immunology while conveying the subject's fascinating appeal. The content of this new edition has been completely updated to include current information on all aspects of basic and clinical immunology. The superbly drawn figures are now in full color, complemented by full color plates throughout the book. The text is further enhanced by the inclusion of numerous tables, special topic boxes and brief notes that provide interesting insights. At the end of each chapter, a self-test quiz allows students to monitor their mastery of major concepts, while a set of conceptual questions prompts them to

extrapolate further and extend their critical thinking. Moreover, as part of the Academic Cell line of textbooks, *Primer to The Immune Response, 2nd Edition* contains research passages that shine a spotlight on current experimental work reported in Cell Press articles. These articles also form the basis of case studies that are found in the associated online study guide and are designed to reinforce clinical connections. Complete yet concise coverage of the basic and clinical principles of immunology
 Engaging conversational writing style that is to the point and very readable
 Over 200 clear, elegant color illustrations
 Comprehensive glossary and list of abbreviations

Case Studies in Immunology:

Myasthenia Gravis Oxford University Press

Infections in the Immunosuppressed Patient offers an illustrated, case-based matrix for treatment of infections across all types of immunosuppressed patients. As the challenges of managing these infections continues to evolve, this collection offers lucid, authoritative guidance to diagnosing and treating these infections effectively. Comprising 81 cases from leading experts across specialties, this collection offers a guide to both common and uncommon presentations of infections in: · Cancer patients · Solid-organ transplant recipients · Stem-cell recipients · Patients on immunosuppressive drugs · Patients with other immunosuppressive conditions
 Supplemented with rich color illustrations and insights from more than 100 experts, *Infections in the Immunosuppressed Patient* is the new benchmark reference work for treatment of these difficult cases.

Immunology Garland Science

Case Studies in Veterinary Immunology

presents basic immunological concepts in the context of actual cases seen in clinics. It is intended for veterinary medicine students, interns, residents, and veterinarians, and serves as a valuable supplement and companion to a variety of core immunology textbooks and courses. The book includes cases describing primary immune system defects, secondary immune system defects, and hypersensitivity and autoimmune disorders, as well as dysproteinemias and lymphoid neoplasia. Drawing on the successful approach of Geha's *Case Studies in Immunology*, each representative case is preceded by a discussion of the principles underlying that specific immunological mechanism. The case itself includes the presenting complaint (signalment), physical examination findings, pertinent diagnostic laboratory data, diagnosis, and treatment options. In those instances in which a specific disorder occurs in both animals and humans, the differences and similarities in the immunological mechanisms and manifestations of the disease are explored. End of case questions highlight important concepts and serve as a review aid for students. Details on standard vaccines and vaccination schedules, as well as descriptions of the types of assays used for evaluation of the immune system, are included as appendices.

Case Studies in Immunology Garland Science

Case Studies in Allergic Disorders is designed for undergraduate and graduate students in immunology, medical students, and resident physicians. It describes the basic cellular and molecular mechanisms involved in the pathogenesis of commonly occurring allergic diseases and introduces the

rationale for targeted treatment of allergy. Replicating the

CASE STUDIES IN IMMUNOLOGY: DRUG-INDUCED SERUM SICKNESS

Garland Science

This book presents case histories that are chosen for two purposes: to illustrate in a clinical context essential points about the mechanisms of immunity; and to describe and explain some of the immunological problems often seen in the clinic.

Avian Immunology John Wiley & Sons

26 real-life cases illustrate the applications of basic immunology in clinical settings May be utilized alone or as a companion to *Immunology: A Short Course*, 7th Edition by Richard Coico and Geoffry Sunshine (ISBN

9781118396919) Each case study is introduced by clearly written descriptions of the major immunological disorders Full colour photographs and illustrations complement complete presentation of real data Includes complete set of problems and discussion questions for each chapter

Case Studies in Immunology: Common Variable Immunodeficiency Garland Science

This book presents case histories that are chosen for two purposes: to illustrate in a clinical context essential points about the mechanisms of immunity; and to describe and explain some of the immunological problems often seen in the clinic.

REVIEW OF MEDICAL MICROBIOLOGY AND IMMUNOLOGY 15E

Academic Press

Case Studies in Public Health contains selected case studies of some of the

most important and influential moments in medicine and epidemiology. The cases chosen for this collection represent a wide array of public health issues that go into the makeup of what can be termed the New Public Health (NPH), which includes traditional public health, such as sanitation, hygiene and infectious disease control, but widens its perspective to include the organization, financing and quality of health care services in a much broader sense. Each case study is presented in a systematic fashion to facilitate learning, with the case, background, current relevance, economic issues, ethical issues, conclusions, recommendation and references discussed for each case. The book is a valuable resource for advanced students and researchers with specialized knowledge who need further information on the general background and history of public health and important scientific discoveries within the field. It is an ideal resource for students in public health, epidemiology, medicine, anthropology, and sociology, and for those interested in how to apply lessons from the past to present and future research. Explores the history of public health through important scientific events and flashpoints Presents case studies in a clear, direct style that is easy to follow Uses a systematic approach to help learn lessons from the past and apply them to the present

CASE STUDIES IN IMMUNOLOGY: PEMPHIGUS VULGARIS

Garland Science

Case Studies in Veterinary Immunology presents basic immunological concepts in the context of actual cases seen in clinics. It is intended for veterinary medicine students, interns, residents, and veterinarians, and serves as a

valuable supplement and companion to a variety of core immunology textbooks and courses. The book includes cases describing primary immune system defects, secondary immune system defects, and hypersensitivity and autoimmune disorders, as well as dysproteinemias and lymphoid neoplasia. Drawing on the successful approach of Geha's Case Studies in Immunology, each representative case is preceded by a discussion of the principles underlying that specific immunological mechanism. The case itself includes the presenting complaint (signalment), physical examination findings, pertinent diagnostic laboratory data, diagnosis, and treatment options. In those instances in which a specific disorder occurs in both animals and humans, the differences and similarities in the immunological mechanisms and manifestations of the disease are explored. End of case questions highlight important concepts and serve as a review aid for students. Details on standard vaccines and vaccination schedules, as well as descriptions of the types of assays used for evaluation of the immune system, are included as appendices.

Case Studies in Veterinary

Immunology McGraw-Hill Education / Medical

This book presents a case history of a patient with toxic shock syndrome, to illustrate in a clinical context essential points about the mechanisms of immunity and to explain some of the immunological problems often seen in the clinic. It is helpful for medical students and pre-medical students.

CASE STUDIES IN IMMUNOLOGY:

MHC CLASS II DEFICIENCY

Garland Science

This book presents case histories to illustrate in a clinical context essential points about the mechanisms of immunity. It includes cases that illustrate both recently discovered genetic immunodeficiencies and some more familiar and common diseases with interesting immunology.

Case Studies in Immunology: Factor I Deficiency Newnes

This book presents a case history of a patient with MHC class I deficiency, to illustrate essential points about the mechanisms of immunity and to explain some of the immunological problems often seen in the clinic. It is helpful for medical and pre-medical students.

CASE STUDIES IN IMMUNOLOGY

Case Studies in Immunology

In medical practice there are often complex cases that make extraordinary demands on a clinician's knowledge and ingenuity. In Challenging Cases in Allergy and Immunology, the authors provide these types of fascinating, and informative cases to complement a basic knowledge of diagnosis and management in these fields. As such, this novel title will be of interest to a wide array of allergists and clinical immunologists, as well as all students of medicine and allied health. Written by a multidisciplinary group of national and international experts, the book covers in detail two or more challenging, real-life cases in each disorder discussed. Each case is followed by a work-up, treatment plan, and discussion that includes a differential diagnosis, up-to-date references, and up to ten thought-provoking, multiple-choice questions that enhance the book's value as a

comprehensive reference and teaching text. The cases include not only the common allergic diseases such as allergic rhinitis, asthma, and food allergy, but also disorders in immune regulation, autoimmunity, and immunodeficiencies. There are chapters on subjects as wide-ranging as anaphylaxis, occupational asthma, and immune-mediated rheumatic diseases. State-of-the-art and evidence-based, Challenging Cases in Allergy and Immunology is an important resource for all clinicians searching for ways to

improve their ability to diagnose and manage patients with allergic and immunologic problems.

PRIMER TO THE IMMUNE RESPONSE

W.W. Norton & Company

This book presents a case history of a patient with interferon-gamma receptor deficiency to illustrate essential points about the mechanisms of immunity and to explain some of the immunological problems seen in the clinic. It is intended to help medical students and pre-medical students.
