Arbitration Concerning the South China Sea Taylor & Francis
The conflict in Ukraine and Russia's annexation of Crimea has undoubtedly been a pivotal moment for policy makers and military planners in Europe and beyond. Many analysts see an unexpected character in the conflict and expect negative reverberations and a long-lasting period of turbulence and uncertainty, the de-legitimation of international institutions and a declining role for global norms and rules. Did these events bring substantial correctives and modifications to the extant conceptualization of International Relations? Does the conflict significantly alter previous assumptions and foster a new academic vocabulary, or, does it confirm the validity of well-established schools of thought in international relations? Has the crisis in Ukraine confirmed the vitality and academic vigour of conventional concepts? These questions are the starting points for this book covering conceptualisations from rationalist to reflectivist, and from quantitative to qualitative. Most contributors agree that many of the old concepts, such as multi-polarity, spheres of influence, sovereignty, or even containment, are still cognitively valid, yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings. It is these multiple, conceptual languages that the volume puts at the centre of its analysis. This text will be of great interest to students and scholars studying international relations, politics, and Russian and Ukrainian studies.

QUESTION BANK: LEGAL ASPECTS OF BUSINESS

MPSC (Prelims) Exam 2020 | 18 Mock Test (Paper I & II) For Complete Preparation

On 22 January 2013, the Republic of the Philippines instituted arbitral proceedings against the People's Republic of China (PRC) under the United Nations Convention on the Law of the Sea (UNCLOS) with regard to disputes between the two countries in the South China Sea. The South China Sea Arbitration is a landmark case in international law because of the parties involved, the legal questions to be decided and the absence of one of the parties. As revealed in its official statements, the PRC will neither accept nor participate in this arbitration nor present written and oral arguments in the tribunal room. Such default of appearance makes applicable certain procedural rules. According to Article 9 of Annex VII, the Tribunal, before making its Award, is obligated to satisfy itself not only that it has jurisdiction over the dispute, but also that the claims brought by the Philippines are well-founded in fact and law. Therefore, it is necessary for the Tribunal to look into all the claims brought forward by the Philippines and all the disputes constituted by the claims in the procedural phase. The possible arguments the PRC could make should be explored during this process. This book brings together chapters selected from well-established scholars in Asia, Europe and North America addressing the issues arising from the South China Sea Arbitration. It contains five easy to read parts: origin and development of the South China Sea dispute; the jurisdiction and admissibility of the case; international adjudication and dispute settlement; legal issues arising from the case such as the legal status of the U-shaped line and islands, rocks and low-tide elevations; and the Arbitration case and its impact on regional maritime security.

UGC NET JRF Management Question & Answer John Wiley & Sons
Researchers developed two scenarios to envision the future of mobility in China in 2030. Economic growth, the presence of

constraints on vehicle ownership and driving, and environmental conditions differentiate the scenarios. By making potential long-term mobility futures more vivid, the team sought to help decisionmakers at different levels of government and in the private sector better anticipate and prepare for change.

VOCABULARIES OF INTERNATIONAL RELATIONS AFTER THE CRISIS IN UKRAINE

Arihant Publications India limited

Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

INTERNATIONAL CONFERENCE ON EDUCATION AND MANAGEMENT SCIENCE (ICEMS2014)

by Mocktime Publication

Teaching Ethics through Literature provides in-depth understanding of a new and exciting shift in the fields of English education, Literature, Language Arts, and Literacy through exploring their connections with ethics. The book pioneers an approach to integrating ethics in the teaching of literature. This has become increasingly relevant and necessary in our globally connected age. A key feature of the book is its integration of theory and practice. It begins with a historical survey of the emergence of the ethical turn in Literature education and grounds this on the ideas of influential Ethical Philosophers and Literature scholars. Most importantly, it provides insights into how teachers can engage students in ethical concerns and apply practices of Ethical Criticism using rich on-the-ground case studies of high school Literature teachers in Australia, Singapore and the United States.

Georgetown Journal of International Affairs, Winter/Spring 2015 Innovative Institute

The Euro-Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union (EU). Going beyond the existing literature, Federico Fabbrini's book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU, disaggregating three different dimensions: (1) the vertical relations of power between the member states and the EU institutions, (2) the relations of power between the political branches and the courts, and (3) the horizontal relations of power between the EU member states themselves. The first part of the book argues that, in the aftermath of the Euro-crisis, power has been shifting along each of these axes in paradoxical ways. In particular, through a comparison of the United States, Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs, an unprecedented level of judicialization of economic questions, and a growing imbalance between the member states in the governance of fiscal matters. As the book makes clear, however, each of these dynamics is a cause for concern - as it calls into question important constitutional values for the EU, such as the autonomy of the member states in taking decision about taxing and spending, the preeminence of the political process in settling economic matters, and the balance between state power and state equality. The second part of the book, therefore, devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends. In particular, Fabbrini considers the ideas of raising a fiscal capacity, restoring the centrality of the EU legislative process, and reforming the EU executive power, and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union.

Germany After the 2013 Elections ABC-CLIO

1. The book is prepared for SSC CHSL (10+2) Tier 1 Online Examination
2. Previous Years' Solved Papers (2020-2009) are given to know the paper pattern
3. 3 Practice Sets are given for practice
4. 3 Online Test papers are provided to give the exact feel of the examination
The Staff Selection Commission (SSC) organizes number of examinations for eligible and potential candidates every year who wish to gain entry into prestigious Government Jobs at a young age. To get recruited in different posts like Data Entry Operators, Lower Divisional Clerk (LDC), Court Clerks, etc. of SSC CHSL, here is the new updated edition of SSC CHSL (10+2) Tier 1 for Online Examination 2021 solved papers (2020-2009), proving to be one stop solution that is designed for the complete preparation. This book contains Solved Papers (2020-2009) & 3 Practice Sets giving complete idea and knowledge about the paper pattern, Questions style and weightage. With 3 Online Practice sets one can get exact feel of the examination. Packed with well-organized practice material, it is a perfect practice workbook to track your day-to-day progress to achieve success in the exam. FOR GROUP 2 - PAPER 5 (CA EXAMINATION SERIES)

Routledge

An effective and cost efficient protection of electronic system against ESD stress pulses specified by IEC 61000-4-2 is paramount for any system design. This pioneering book presents the collective knowledge of system designers and system testing experts and state-of-the-art techniques for achieving efficient system-level ESD protection, with minimum impact on the system performance. All categories of system failures ranging from 'hard' to 'soft' types are considered to review simulation and tool applications that can be used. The principal focus of System Level ESD Co-Design is defining and establishing the importance of co-

design efforts from both IC supplier and system builder perspectives. ESD designers often face challenges in meeting customers' system-level ESD requirements and, therefore, a clear understanding of the techniques presented here will facilitate effective simulation approaches leading to better solutions without compromising system performance. With contributions from Robert Ashton, Jeffrey Dunnihoo, Micheal Hopkins, Pratik Maheshwari, David Pomerence, Wolfgang Reinprecht, and Matti Usumaki, readers benefit from hands-on experience and in-depth knowledge in topics ranging from ESD design and the physics of system ESD phenomena to tools and techniques to address soft failures and strategies to design ESD-robust systems that include mobile and automotive applications. The first dedicated resource to system-level ESD co-design, this is an essential reference for industry ESD designers, system builders, IC suppliers and customers and also Original Equipment Manufacturers (OEMs). Key features: Clarifies the concept of system level ESD protection. Introduces a co-design approach for ESD robust systems. Details soft and hard ESD fail mechanisms. Detailed protection strategies for both mobile and automotive applications. Explains simulation tools and methodology for system level ESD co-design and overviews available test methods and standards. Highlights economic benefits of system ESD co-design.

UGC NET JRF MANAGEMENT PREVIOUS YEAR QUESTION PAPER & ANSWER

Arihant Publications India limited

This revisionary perspective on South Africa's celebrated Constitutional Court draws on historical and empirical sources alongside conventional legal analysis to show how support from the African National Congress (ANC) government and other political actors has underpinned the Court's landmark cases, which are often applauded too narrowly as merely judicial achievements. Standard accounts see the Court as overseer of a negotiated constitutional compromise and as the looked-to guardian of that constitution against the rising threat of the ANC. However, in reality South African successes have been built on broader and more admirable constitutional politics to a degree no previous account has described or acknowledged. The Court has responded to this context with a substantially consistent but widely misunderstood pattern of deference and intervention. Although a work in progress, this institutional self-understanding represents a powerful effort by an emerging court, as one constitutionally serious actor among others, to build a constitution.

The Return of the Neighborhood as an Urban Strategy Columbia University Press

Civil services are one of the most famous and respectable career options among the youth. Civil Service is the only body of government officials who are employed in civil occupations that are neither political nor judicial. Public Service Commissions of both central and state governments are the main recruiters of graduate civil service aspirants. The Civil Servants look after the administration of the state. Their role is not only confined to administration. Implementation and adherence of rules and regulations in their jurisdiction comprise their main task.

Taylor & Francis

In this new volume, Michael A. Pagano curates essays focusing on the neighborhood's role in urban policy solutions. The papers emerged from dynamic discussions among policymakers,

researchers, public intellectuals, and citizens at the 2014 UIC Urban Forum. As the writers show, the greater the city, the more important its neighborhoods and their distinctions. The topics focus on sustainable capital and societal investments in people and firms at the neighborhood level. Proposed solutions cover a range of possibilities for enhancing the quality of life for individuals, households, and neighborhoods. These include everything from microenterprises to factories; from social spaces for collective and social action to private facilities; affordable housing and safety to gated communities; and from neighborhood public education to cooperative, charter, and private schools. Contributors: Andy Clarno, Teresa Córdova, Nilda Flores-González, Pedro A. Noguera, Alice O'Connor, Mary Pattillo, Janet Smith, Nik Theodore, Elizabeth S. Todd-Breland, Stephanie Truchan, and Rachel Weber.

Teaching Ethics through Literature ISEAS-Yusof Ishak Institute This book is a study of the response that the police take to modern urban riots. It takes a principally police perspective on the lead-up to a riot, the police response, and the evaluation of the police response. The book is based on the development and analysis of four extensive case study riots: France 2005, London 2011, Ferguson 2014, and Baltimore 2015. The methodological approach to the case studies is comparative and includes an interactive framework that incorporates a number of key variables. These variables examine how each riot began, how they developed, the response strategies and tactics used by the police, and how the riots eventually ended. The first section looks at defining riots and examines the riot literature and research to date. The second section analyses the current police response to rioting. The third and final section includes an analysis and comparison of the case study riots, along with an examination of how the police response to riots could be improved. With its focus on police practices, this unique volume will be useful for researchers, students, police, law enforcement, and policy makers.

Scenarios for China in 2030 All Points Books

Presented in a question-answer format, "Problems and Solutions in Advanced Accounting for CA Intermediate" is specially designed for the students who are preparing for Group-II, Paper 5: Advanced Accounting. The content has been carefully carved out to cover the problems that are most frequently asked in examinations and are aligned to the syllabus. Care has been taken to include problems of simple as well as complex nature and solutions to most of the problems have been provided in a step-by-step manner which makes it easier for the student to understand the concepts and fetch marks. Salient Features: ✓ Content is strictly aligned to the topical flow as guided by the syllabus of ICAI. ✓ Coverage of Questions from RTPs and MTPs of ICAI examination. ✓ Thoroughly updated content includes latest changes in Accounting and the Companies Act, 2013. ✓ Questions from previous year ICAI examinations, Revisionary Test Papers (RTPs), Mock Test Papers (MTPs), and other professional bodies have been incorporated to provide enhanced understanding and extensive practice to the students. ✓ Each chapter is further subdivided in various sections to develop the concepts in a methodical manner.

THE CULT OF SMART

Oxford University Press

This volume is part of the ongoing collaboration between the RMC series and the Socio-Economic Institute for Firms and Organizations (ISEOR), a French intervention-research think tank co-directed by Henri Savall and Véronique Zardet. Building on an earlier collaboration on the ISEOR approach - Socio-Economic Intervention in Organizations: The Intervener-Researcher and the SEAM Approach to Organizational Analysis (IAP, 2007) - Buono and Savall bring together over 30 talented intervener-researchers to explore and examine the ongoing evolution of the Socio-Economic Approach to Management (SEAM). This volume revisits the application of SEAM in the context of intervention challenges in the wake of the recent economic crisis and the disruptive change that has taken hold across the world. The basic foundation of SEAM - built on the idea of strategic patience, the need to undertake holistic intervention in organizations, and the challenge to get organizational members to listen to themselves (through what they refer to as the mirror effect) - has remained the same. In response to economic and organizational pressures in the current environment, however, there has been a concomitant emphasis on helping client organizations achieve short-term results while still maintaining focus on the long term. Many ideas that have become part of the current discourse within ISEOR today were not as explicitly addressed in the initial volume - from the destructive effect of the Taylorism-Fayolism-Weberism (TFW) virus, to the need to focus on ways to ensure the sustainability of a SEAM intervention, the growing importance of collaborative interactions between external and internal

consultants, and the growing importance of cocreating knowledge with client firms and organizations.

UGC NET JRF Commerce Question & Answer McGraw-Hill Education

The onset of the 2004 EU enlargement witnessed a number of predictions being made about the approaches, capacity and ability of Central European judges who were soon to join the Union. Optimistic voices, foreshadowing the deep transformative power that Europe was bound to exercise with respect to the judicial mentality and practice in the new Member States, were intertwined with gloomy pictures of post-Communist limited formalism and mechanical jurisprudence that could not be reformed, which were likely to undermine the very foundations of mutual trust and recognition the judicial system of the Union is built upon. Ten years later, this volume revisits these predictions and critically assesses the evolution of Central European judicial mentality, institutions and constitutionality under the influence of the EU membership. Comparatively evaluating the situation in a number of Central European Member States in their socio-legal contexts, notably Poland, the Czech Republic, Slovakia, Hungary, Slovenia, Bulgaria and Romania, the volume offers unique insights into the process of (non) Europeanisation of national legal systems and cultures.

PLAGIARISM IN HIGHER EDUCATION: TACKLING TOUGH TOPICS IN ACADEMIC INTEGRITY

Oxford University Press, USA

Cryptoassets represent one of the most high profile financial products in the world, and fastest growing financial products in history. From Bitcoin, Ethereum and Ripple's XRP-so called "utility tokens" used to access financial services-to initial coin offerings that in 2017 rivalled venture capital in money raised for startups, with an estimated \$5.6 billion (USD) raised worldwide across 435 ICOs. All the while, technologists have hailed the underlying blockchain technology for these assets as potentially game changing applications for financial payments and record-keeping. At the same time, cryptoassets have produced considerable controversy. Many have turned out to be lacklustre investments for investors. Others, especially ICOs, have also attracted noticeable fraud, failing firms, and alarming lapses in information-sharing with investors. Consequently, many commentators around the world have pressed that ICO tokens be considered securities, and that concomitant registration and disclosure requirements attach to their sales to the public. This volume assembles an impressive group of scholars, businesspersons and regulators to collectively write on cryptoassets. This volume represents perspectives from across the regulatory ecosystem, and includes technologists, venture capitalists, scholars, and practitioners in securities law and central banking.

Case Studies from France, London, Ferguson, and Baltimore Routledge

With considerations for students, faculty members, librarians, and researchers, this book will explain and help to mitigate plagiarism in higher education contexts. Plagiarism is a complex issue that affects many stakeholders in higher education, but it isn't always well understood. This text provides an in-depth, evidence-based understanding of plagiarism with the goal of engaging campus communities in informed conversations about proactive approaches to plagiarism. Offering practical suggestions for addressing plagiarism campus-wide, this book tackles such messy topics as self-plagiarism, plagiarism among international students, essay mills, and contract cheating. It also answers such tough questions as: Why do students plagiarize, and why don't faculty always report it? Why are plagiarism cases so hard to manage? What if researchers themselves plagiarize? How can we design better learning assessments to prevent plagiarism? When should we choose human detection versus text-matching software? This nonjudgmental book focuses on academic integrity from a teaching and learning perspective, offering comprehensive insights into various aspects of plagiarism with a particular lens on higher education to benefit the entire campus community. Provides a comprehensive treatment of plagiarism in higher education Candidly presents tough topics, such as self-plagiarism and essay mills Draws from the scholarly literature to empower educators, librarians, and students to think proactively about plagiarism prevention
