EconEdLink In this lesson from Advanced Placement Economics  
(4th Edition), students examine the effect of net capital flows on  
the macroeconomy through the loanable funds market. The  
loanable funds market is used to analyze capital flows in an  
economy because financial capital affects the amount of money  
available for borrowers and shifts the supply curve for loanable  
funds. Students also graph and explain how changes in the  
current account and balance of trade affect the foreign exchange  
market. EconEdLink - AP Macroeconomics - Net Exports and
