The multiple and diverse forces of globalization have, indeed, affected Japan significantly over the past decades. But so, it must be said, has Japan influenced a variety of critical global developments - globalization is not a one-way street, particularly for a nation as economically influential and technologically advanced as Japan. The chapters in this collection examine the impact of globalization on Japan and the impact of Japan on the forces of globalization from the various disciplinary perspectives of business, the economy, politics, technology, culture and society. They also explain the manner in which the nation has responded to the economic and cultural liberalization that has been such a profound force for change around the globe. This comprehensive collected works brings the latest research to bear on this important subject and provides evidence of the long history of global influences on Japan - and Japanese impacts on the rest of the world. This book will be of interest to students and scholars of globalization, Japanese Studies, and Asian Studies.

Buying shares either to invest in the short or long term or for trading only requires information on how the issuer or company places its shares on the IDX. Information regarding the type of business run by the issuer, ownership information and composition must at least be known by investors and traders or even prospective stock players who are still in the learning stage. This book briefly reveals the business background of all issuers listed on the IDX. As of January 2022, 769 issuers with 769 stock codes have been listed on the IDX from various industries.

Set your pulse racing with this stunning visual guide to over 1000 pin-up machines - iconic symbols of wanderlust, speed, and the open road. From Gottlieb Daimler's gas-powered "engine on a bicycle" which set fire to the seat on its first outing, to superbikes such as the Ducati 916, Motorcycle:

The Definitive Visual History takes you on an enthralling tour of the bike's history. It shows you bikes that appeal to the head - practical forms of transport - and to the heart - a parade of classic pin-ups including cult machines such as the Honda RC30, the Triumph Bonneville, and the Harley-Davidson XR750. Motorcycle: The Definitive Visual History shows the brilliance and impracticality of different designs and features detailed cross-sections of engines such as the air-cooled two-stroke. It explains how the great marques such as the Royal Enfield, the "legendary" Indian Scout, Vespa, and Norton all became household names. Whether you are a hardcore enthusiast or looking forward to your first machine, this is one title you cannot be without.

This book provides a new opportunity for corporate strategy analysis within a Japanese context. It is the first academic textbook to be published in English which regroups case studies to emphasize key concepts in Japanese management. Where previous literature has set a separate focus on cultural, managerial and strategic variables, a holistic look is now taken at their influence on effective decision-making. Over 11 detailed cases depict issues in entering the Japanese market, strategic issues when managing in Japan, marketing management, crisis management, cross-cultural encounters and future technologies. The sophistication and depth of these studies, along with their teaching notes, provide the basis for pragmatic analysis. The mysticism surrounding Japanese culture seems magnified by the success of Japanese companies abroad, and the shortcomings of many MNEs that entered Japan ineffectively. Studying the empirical implications of these issues is a helpful exercise to develop more acute management reflexes in a Japanese setting. The book's carefully laid out cases will benefit business and humanities students who are researching Japan, as well as professionals who work within this sphere.

Teach cello with the popular Suzuki Cello School. The Suzuki Method(R) of Talent Education is based on Shinichi Suzuki's view that every child is born with ability, and that people are the product of their environment. According to Shinichi Suzuki, a world-renowned violinist and teacher, the greatest joy an adult can know comes from developing a child's potential so he/she can express all that is harmonious and best in human beings. Students are taught using the mother-tongue approach. Each series of books for a particular instrument in the Suzuki Method is considered a Suzuki music school, such as the Suzuki Cello School. Suzuki lessons are generally given in a private studio setting with additional group lessons. The student listens to the recordings and works with their Suzuki cello teacher to develop their potential as a musician and as a person. This Suzuki book for Volume 4 is integral for Suzuki cello lessons. Titles: Sonata in E Minor, Op. 14, No. 5 (Largo, Allegro, Largo, Allegro) (Vivaldi) * Danse Rustique, Op. 20, No. 5 (Squire) * Arioso from Cantata 156 (Bach) * Rondo from Concerto No. 4, Op. 65 (Goltermann). The motor vehicle industry is one of the world's largest. More than 1 billion vehicles are in use around the world, and 80 million are produced and sold annually. Motor vehicles—including passenger cars, trucks, and commercial vehicles such as buses and taxis—are the principal means by which people and goods are transported within and among most communities in the world. This book details the history of the motor vehicle and of the leading carmakers. Inside, you'll learn just how cars are made and sold; the leading suppliers of parts that go into a car; the increasing role of government in regulating vehicles; and future challenges for the industry. The motor vehicle industry includes corporations that design, develop, and manufacture cars and trucks. These carmakers, such as Ford and Toyota, are among the world's most-familiar corporate brands. The motor vehicle industry also encompasses lesser-known businesses, including several thousand parts makers, tens of thousands of retailers, and specialized lending agencies. The importance of the motor vehicle industry transcends even its central role in the global economy. The industry was responsible for many of the fundamental innovations of 20th century production, such as corporate organization, manufacturing processes, and labor relations, as well as sales innovations including product branding and consumer financing. In the 21st century, the motor vehicle industry has been a leader in adopting new production strategies and expanding into new markets.

Daisetsu Teitarō Suzuki was a key figure in the introduction of Buddhism to the non-Asian world. Many outside Japan encountered Buddhism for the first time through his writings and teaching, and for nearly a century his work and legacy have contributed to the ongoing religious and cultural interchange between Japan and the rest of the world, particularly the United States and Europe. This fourth volume of Selected Works of D. T. Suzuki brings together a range of Suzuki's writings in the area of Buddhist studies. Based on his text-critical work in the Chinese canon, these essays reflect his commitment to clarifying Mahāyāna Buddhist doctrines in Indian, Chinese, and Japanese historical contexts. Many of these innovative writings reflect Buddhological discourse in contemporary Japan and the West's pre-war ignorance of Mahāyāna thought. Included is a translation into English for the first time of his "Mahāyāna Was Not Preached by Buddha." In addition to editing the essays and contributing the translation, Mark L. Blum presents an introduction that examines how Suzuki understood Mahāyāna discourse via Chinese sources and analyzes his problematic use of Sanskrit.

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

This book clarifies the direction of business innovation using new ICT such as the Internet of things (IoT), artificial intelligence (AI), smartphones, and cloud computing through a series of case studies on successful trials and advanced businesses in the Asia-Pacific where many industry sectors have been growing successfully in the 21st century. ICT has been playing an important role in value creation for customers and in profit generation for providers, contributing to various service innovation and business innovation. Now, digitalization using IoT and AI provides solutions to address various issues in the human society, which is transforming services and businesses in the 21st century. "What is the direction of the business innovation using new ICT?" is a highly concerned question for business researchers and practitioners. Aiming to answer the question, this book conducts a number of cases studies in the Asia-Pacific region, including the Mainland China, Taiwan, Japan, Malaysia, Vietnam, as well as Australia. Among the studies, there are 4 cases from ICT providers, 4 cases from traditional and services, and 6 cases from new ICT applications and businesses. Each case analyzes social needs and human desires, new value created, roles of new technologies, processes and difficulties in developing new businesses, the relationship among customers, providers, and stakeholders, value chain co-creation and optimization, factors of success, and business models. Finally, the direction of business innovation with new ICT in the Asia-Pacific is suggested by summarizing the findings from the case studies through the lens of the theoretical analysis in service science.

This Proceedings contains over 260 papers on cutting-edge research presented at the eighth international Symposium on Coastal Sediment Processes, held May 11 ? 15, 2015, in San Diego, California, USA. This technical specialty conference was devoted to promoting an interdisciplinary exchange of state-of-the-art knowledge among researchers in the fields of coastal engineering, geology, oceanography, and related disciplines, with the theme of Understanding and Working with Nature. Focusing on the physical aspects of the sediment processes in various coastal environments, this Proceedings provides findings from the latest research and newest engineering applications. Sessions covered a wide range of topics including barrier islands, beaches, climate and sea level, cohesive and noncohesive sediments, coastal bluffs, coastal marsh, dredged sediments, inlet and navigation channels, regional sediment management, river deltas, shore protection, tsunamis, and vegetation-sediment interaction. Several special sessions included: Relevant science for changing coastlines: A Tribute to Gary Griggs; North Atlantic Coast Comprehensive Study and post-super-storm Sandy work; long-term coastal evolution; barrier islands of Louisiana; sea-level rise and super storms in a warming world; predicting decadal coastal geomorphic evolution; and contrasting Pacific coastal behavior with El Niño Southern Oscillation (ENSO), are also featured. This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

In the wake of the Great Recession of 2008–09, economists feared that protectionist policies might sweep the world economy, echoing the wave of tariff escalations during the Great Depression of the 1930s. To some surprise, officials were more restrained and largely avoided traditional forms of protection (tariffs and quotas). As a result, economists underestimated the incidence of new protectionism because policymakers increasingly turned to more opaque behind-the-border nontariff barriers (NTBs). Using a combination of statistical analysis and case studies, the authors show that local content requirements (LCRs), a form of NTB, have become increasingly popular. How much was global trade actually reduced on account of LCRs? A conservative estimate might be \$93 billion. Case studies featured cover the healthcare sector in Brazil, wind turbines in Canada, the automobile industry in China, solar cells and modules in India, oil and gas in Nigeria, and "Buy American" restrictions on government procurement.
