EXPORT CONTROL LAW AND REGULATIONS HANDBOOK

Amid the ongoing crisis surrounding the WTO, China's role and behaviour in the multilateral trading system has attracted overwhelming attention. This timely monograph provides the first comprehensive and systemic analysis of China's compliance with the rulings of the WTO's dispute settlement mechanism (DSM). It covers all the disputes in which China has been a respondent during its 17-year WTO membership and offers a detailed discussion of China's implementation of adverse WTO rulings, its approaches to settling WTO disputes, the possible explanations for such approaches, and post-compliance issues. The book shows how China has utilised the limitations and flexibilities of WTO rulings to ensure that its implementation of the rulings not only delivers adequate compliance but also maintains its own interests. Overall, this book argues that the issues relating to the quality of China's compliance and post-compliance practices concern the loopholes within the DSM itself which may be utilised by all WTO Members. However, despite the loopholes, China's record of compliance suggests that the DSM has been largely effective in inducing compliance and influencing domestic policy-making. It is therefore in the interest of all WTO Members and other stakeholders to protect the DSM as the 'crown jewel' of the multilateral trading system.

The book analyses how India's rise to the status of an emerging power has affected New Delhi's Africa policy, after sketching the historical evolution and normative underpinnings of Indo-African relations, and what challenges it has brought for New Delhi's engagement with the continent. India and Africa share a history dating back millennia. Today, India is one of Africa's biggest trading partner countries, second only to China. The country regularly extends lines of credit worth billions to African nations, and its pharmaceutical producers dominate many African markets; almost one-fifth of India's oil imports and more than one-quarter of its natural gas imports come from the continent. However, relations between India and Africa are far from being limited to economic cooperation. The book scrutinises three foreign policy fields: (1) India's foreign economic policy towards Africa with an in-depth analysis of Indo-African trade, investment and lines of credit; (2) New Delhi's development cooperation policy vis-à-vis Africa, its principles, instruments and volume; (3) India's politico-diplomatic foreign and security policy vis-à-vis Africa, including New Delhi's high-level diplomacy, security and diaspora policy as well as multilateral Africa policy.

The Asia-Pacific Regional Security Assessment examines key regional security issues relevant to the policy-focused discussions of the IISS Shangri-La Dialogue, Asia's premier defence summit convened by the International Institute for Strategic Studies. It is published each year in association with the Dialogue and the issues analysed within its covers are central to discussions at the event. Among the topics explored are: US Indo-Pacific strategy, alliances and security partnerships; Chinese perspectives on regional security; Taiwan's security and the possibility of conflict; the continuing challenges posed by North Korea's nuclear and missile programmes; the nuclear dynamics of Sino-American security relations; air and naval operations in the Asia-Pacific; Sino-American technology competition; Japan's competition and cooperation with China; India's role in the Quadrilateral Security Dialogue (Quad); the evolving regional security engagement of European states and the European Union; China's role as an upstream state in the Mekong sub-region; and the climate crisis and Asia-Pacific security. As this volume goes to press, the war in Ukraine overshadows the international security landscape and many chapters in this volume touch on the conflict's ramifications for security in the Asia-Pacific. Authors include leading regional analysts and academics at the forefront of research and analysis: Aidan Foster-Carter, James Crabtree, Peter A. Dutton, Brian Eyler, Michael Green, Sheryn Lee, Jeffrey G. Lewis, Tanvi Madan, Jeffrey Mazo, Ben Schreer, Yun Sun, Nicholas Szechenyi, Brendan Taylor, Ashley Townshend and Paul Triolo.

- Minerals Yearbook, 2014, V. 3: Area Reports: International: Asia and the Pacific. Volume III, Area Reports: International, is published as four separate reports. These regional reports contain the latest available minerals data on more than 180 foreign countries and discuss the importance of minerals to the economies of these nations and the United States. Each report begins with an overview of the region's mineral industries during the year. It continues with individual country chapters that examine the mining, refining, processing, and use of minerals in each country of the region and how each country's mineral industry relates to U.S. industry. Most chapters include production tables and industry structure tables, information about Government policies and programs that affect the country's mineral industry, and an outlook section.

This book is a deeply personal look at one of the most significant modern artworks in Australia. In this new publication written by the artist himself, John Olsen reflects on his Sydney Opera House mural and Kenneth Slessor's poem, Five Bells, which inspired it. The publication features Olsen's illustrated journal, one of the most spectacular art manuscripts in the National Library of Australia. His richly illustrated scrapbook of thoughts, quotes, diary entries, original drawings and clippings documents Olsen's experience. Olsen's great intellect and creativity shine through in lists of 'Things I like', haikus, and playful and poetic expression; margin notes offer great insight into the artistic process of one of our living treasures. Alongside Olsen's colourful account are full-page spreads and details of the mural, original works of art and a self-penned poem (appearing for the first time). Also included is a page from the hand-written notebook of Kenneth Slessor showing the words and imagery that so inspired Olsen.

Over the past decade, a growing body of academic literature on the economics of road cycling has been amassed. This book is the first volume to bring together a majority of the academic research and knowledge on the economics and management of professional road cycling. Each chapter treats a particular economic aspect of the sport, from organizational structure to marketing, labor, game theory, and competitive balance. By discussing the existing research and complementing it with the newest concepts, ideas and data on professional road cycling, this book sets an agenda for further academic research while providing insights for all stakeholders in cycling: governments, cycling's governing bodies, team managers, race organizers, sponsors, media. Furthermore, the unique characteristics of the sport of cycling explored within this text inform broader management and industrial organization research, as they extend analyses of team labor, broadcast revenue generation, and sponsorship financing models. This book is equally of interest to academic researchers, students studying sports economics, and policy makers, such as race organizers, team managers, and sponsors.

Corporate Governance in Russia

Kuwait is one of the biggest players in the global energy market, with its proven oil reserves currently the sixth largest in the world. Although revenues from hydrocarbons account for more than 60% of GDP and 95% of exports, the country's low production costs and sizeable fiscal reserves mean it is well positioned to cope with lower oil prices in the short term. This is clear from the government's ongoing commitment to delivering projects outlined in the national development strategy, Kuwait Vision 2035. In the financial services sector, Kuwait continues to perform well, as a series of regulations put in place by the Central Bank of Kuwait in recent years have served to shore up the sector's recovery from the global economic downturn.

This book explores discussions and practice around corporate governance in Russia from the early 1990s until 2018. It covers three major aspects of corporate governance theory and practice: a vision of corporate governance in Russia in the context of global trends and challenges, the general perception of corporate governance in Russia, and the real nature of Russia's corporate community from the viewpoint of its corporate governance practices. It provides a unique complex analysis and detailed description of how corporate governance has been perceived by both Russian regulators and the business community, and how it has been applied in Russian companies. This analysis covers the period of over 25 years: from early attempts at directing transfer and implanting the Western model of corporate governance to the nascent Russian big private business, up to the period of resurgence of the state as the dominant player both in Russian society and its economy at large. It gives an understanding of what corporate governance is in Russia in the days of "sovereign democracy" and confrontation with the West. It explains how cultural, political, economic and institutional factors have shaped corporate governance in Russia. The authors provide insights into such aspects of Russian corporate governance framework and practices as regulatory philosophy and enforcement, ownership structure, the role of the state, the impact of unfriendly domestic business climate, how the value of corporate governance is perceived in Russian context, etc. Predominantly, the book paints an interesting picture of how the "sovereign corporate governance" model has been shaped in Russia. This book will be useful not just for experts in corporate governance and investors, but also for those who have an interest in modern Russia at large.
